Keeping middle school students engaged in learning this summer – in the Spanish Journal July 22
Mantener a los estudiantes de secundaria interesados en aprender este verano - en el Spanish Journal 22 de julio

Aprendizaje de Verano con Seeds of Health
Summer Learning with Seeds of Health

Fernando Muniz is a math teacher at Tenor High School, one of Seeds of Health’s schools. He provides fun and educational ways to keep our kids engaged.

I’m going to highlight a few activities you can do with your children to keep them engaged in learning material and learning during the summer. Let’s keep our middle school students engaged in learning this summer!

Middle school students are at a special age – old enough to study solo, yet not always motivated to do the work without being prompted. Help your child by setting expectations for daily learning. Remind them that reviewing material and learning during the summer will make it easier for them in the fall. Explain that summer learning is non-negotiable.

Remember: teens crave structure, even if they don’t show it!

Encourage your children to:

- Learn a book, a magazine, a website every day.
- Read a book, a magazine, or a website every day.
- Watch a documentary about science, geography, or history.
- Search online for “Summer Math Activities” to review skills.
- Observe and participate in the math activities of the real world.
- Consider Seeds of Health’s Summer School.

Seeds of Health Elementary and Tenor High School have summer programs for students.

Now enrolling K-8th grade students for the 2020-2021 school year.
Matriculas abiertas para estudiantes de grados K-8 para el año escolar 2020-2021.

Tenemos vacantes en K-8 Seeds of Health Elementary and Tenor High School.
