

Mrs. Martens semester review
Intro to technology (robotics)

You need to go onto Canvas.ccsd.net to review for the test. Open up and review each of the unit tests that you have taken.

- Simple machines
- Getting Started
- Basic Movements
- Sensors
- Program Flow

Open up each quiz. It will show the questions, your answer, and the correct answer. If you got the answer correct, just review the question and answer. If you missed the question, make a flashcard with the question and correct answer.

The final is a combination of all the unit tests you have taken.

The unit quizzes will close on December 18, so do NOT wait until the last minute to study.
