Summer Assignment

Congratulations!

You have just been named most interesting and accomplished student of your college graduation class of 2022! The college has asked you to introduce their program to the incoming freshmen by showcasing your success and life while at their University. This is going to be used to advertise for your college major because they want students just like you!

You may use any form of media presentation that you have access to such as Adobe Spark, Adobe Photoshop, or imovie.

Some things you should think about including:

- *3 notable facts about your University or major.*
- *Your school colors, majors, mascot, local community and housing.*
- *Notable graduates or accolades of "your" program.*
- *Imagine yourself there and be creative to showcase your experience. Let the viewer see you in this college major.*
- *Potential career goals achieved by graduating from your University with your specific major.*
- *Showcase your media and design skills.*
- *Have fun with your college vision!*
