March 5, 2019

To Whom it may Concern,

Reeds Spring School District is seeking bids for one (1) new chiller system for Gibson Technical Center.

The existing chiller system consists of two 30 ton capacity outdoor condensers piped to a shared evaporator known as a chiller barrel with a capacity of 60 tons. The replacement system can assume *one of the following two configurations*:

- Configuration 1—The outdoor component will consist of two 30 ton single circuit chillers piped to a shared chiller barrel indoors having a 60 ton capacity. A total of four pipes, two high-pressure and two low-pressure, will run between the indoor and the outdoor components. Each outdoor unit will have staging which will enable operation between 17% and 100% of its capacity and will be fitted with hail guards. Outdoor units will have controls which enable low-ambient operation.
- Configuration 2—The outdoor component will consist of two 30 ton dual circuit chillers piped to a shared chiller barrel indoors having a 60 ton capacity. A total of eight pipes, four high-pressure and four low-pressure, will run between the indoor and the outdoor components. Each outdoor unit will have four stages of capacity and be fitted with hail guards. Outdoor units will have controls which enable low-ambient operation.

Any installing contractors must have expertise in CTC building automation systems. Units must be York, Carrier, or Bryant brand units and must be commercial grade. It is the responsibility of the installer to ensure all prices are comprehensive. Field measurements and observations are scheduled for Tuesday, March 19<sup>th</sup>, 2019 at 10 a.m. at Gibson Technical Center (GTC). GTC is located at 386 West State Hwy 76, Reeds Spring, MO 65737.

Sealed bids are due to the Office of the Director of Operations by March 25, 2019. The address is listed below.
