Background information:
All PVPUSD students have been provided with an @pvpusd.net student email account. Students will be able to communicate and collaborate with teachers and students with @pvpusd.net accounts. Student email accounts will not be able to send or receive email to/from and account outside of the @pvpusd.net domain.

How students access their student email account:
1. The Student email feature is built directly into a student’s Office365 account. In order to access the email account students will need to login to https://portal.pvpusd.net/_auth/Login.aspx?ru===== using studentid@pvpusd.net and their password. The initial password is their date of birth mmddyy.

2. Once logged in to the Office 365 account the app dashboard will be available where the “Mail” app appears. By clicking on the Mail app, students will be taken to their email inbox.
