

Upcoming Educator Workshops

Deepen your science content knowledge and sharpen your STEM teaching skills while engaging in hands-on lessons and activities designed to model 3D science. All Natural History Museum of Utah educator workshops are **free** for Utah public and charter school educators thanks to funding from the Utah State Legislature, and **relicensure points** or **USBE credit** will be given for each workshop attended. Every NHMU workshop ALWAYS includes a **free** USB full of resources and lesson plans covered in the workshop!

Rock Encounters of the Third Kind:

the 3D Science of Rocks and Minerals

December 8th (Saturday) from 11:00am - 2:00pm

February 2nd (Saturday) from 1:00pm - 4:00pm

Encounter museum quality specimens hands-on to build a deeper understanding of the processes that form minerals and rocks and the identifying characteristics of these processes. Get a chance to walk through engaging lesson plans developed specifically around 3D Science and Utah's new SEEd standards. Walk away confident in your ability to guide your students in 3D Science Practices like constructing explanations and engaging in arguments from evidence about Earth's materials.

This workshop is designed for 2nd, 4th, and 7th grade teachers, but all welcome.

** Earn 3 relicensure points for attending*
