

## Homework

The Governing Board believes that homework should be meaningful, developmentally appropriate, engaging, and relevant to classroom learning. The purpose of homework is to reinforce skills learned in class, prepare for upcoming projects or assessments, apply concepts to real life experiences and situations, and extend the classroom learning experience. The Board expects that the number, frequency, and degree of difficulty of homework assignments will increase with the grade level and the maturity of students. The Board promotes student wellness and academic rigor, and to these ends, values quality over quantity, and recognizes the distinction between load and rigor. The Board supports the practice of not assigning homework during school breaks, school-observed holidays, and standardized testing time for grades 3-8.

Students should be able to complete homework independently and, as a result, further develop essential skills and gain deeper understanding of course content. At times, students may be given choice or options within homework to increase engagement and address various learning needs. Homework should align with practices and time allotments per grade level as identified in district guidelines and administrative regulations. Homework practices should be reviewed periodically by the teachers at each grade level or subject area to ensure alignment to academic standards and consistency of practices.
