Digital Classroom Readiness

LOGGING IN USING CLASSLINK

What is ClassLink?

All students will start their daily learning by logging in to ClassLink at my.classlink.com/nps.

In the ClassLink Launchpad, students will access Schoology, their Google Drive, various learning resources and applications that their teacher may utilize for learning. Parents may also access MiStar through students’ ClassLink Launchpad.

All teachers will use the Schoology learning management system. Schoology will support an online learning environment in the following ways:

- Schoology offers students the opportunity to see assignments and grades, participate in group discussions, interact with teachers and other students, track their progress, turn in assignments, monitor progress and homework due dates, plus much more.
- Schoology is a tool that students use daily to interface with the teacher on assignments and coursework.
- Parents will manage their child’s academic progress, including combining children into one parent login.
