MEDICATION/ALBUTEROL INHALER/SPECIALIZED PROCEDURE SIGN-OFF

Student: _____ Grade: _____
School: _____ Teacher: _____

Check one:
_____ Medication during school hours
_____ Specialized health procedure during school hours

Physician's written order received on _____
Date
Parent permission request for assistance received on _____
Date

MEDICATION	DOSAGE	TIME
Metered-Dose Inhaler (MDI)	_____ puffs every	_____ hours

SPECIAL HEALTH PROCEDURE: Inhaler is used to relieve asthma symptoms such as wheezing, coughing and/or difficulty breathing. Verify child's name, medication and physician order. Shake inhaler. Remove small plastic cap covering mouthpiece. Attach inhaler to the aerochamber (mouthpiece of inhaler fits into aerochamber – only one slot fits the mouthpiece). Press the inhaler one time to spray medication into the aerochamber. Have child inhale the medication from the mouthpiece of the aerochamber. Wait 1-2 minutes and press inhaler to spray the second puff of medication into the aerochamber. Let child inhale medication as noted in previous step. Child may rinse mouth with water after using the inhaler. Symptoms should be relieved quickly by the inhaler.

TIME SCHEDULE:
Inhaler may be given every _____ hours as ordered by the physician.

INDICATIONS/PRECAUTIONS:
Used to relieve asthma symptoms (see above). Medication may cause increased activity, shaking or tremors, increased heart rate and or headache. Notify parent the time medication was given and child's response.

The following district personnel* acknowledge receiving instruction from the school nurse in providing the above service to this student. The school nurse will provide ongoing monitoring and supervision as determined by Section 3001(T) of the California Code of Regulations, Title 5, and Education. Instruction has been given for proper administration, handling and storage of medications. Medications must be stored under lock and key at all times.
