Captive Portal
When students connect their iPad to a private network (any WiFi not in the school network), Apple will require the student to register with Captive Portal prior to Internet connectivity being established. The device will appear to have connected to a network but any request will fail until the student has logged into Captive Portal.

How to login to Captive Portal

1. Open the Google Chrome browser using the Google Chrome app.
3. Select K12 Active Directory and enter the student’s username and password. (This is the K12 account information.)

*Login will expire every 24 hours or when the student leaves the private network.
*The username and password are case sensitive. Please make sure the username is all lowercase.
*You may also select Google and login using the Google Account information.
