

## S.O.S. SAVE OUR SUMMER

### Put the Fun back into Parenting – the Love and Logic<sup>®</sup> way.

Do you have mornings when you feel the need to place your child next to a stationary object – just to see if the kid is actually moving?

Is your child glued to electronic devices?

Are you certain your child is destined to become a defense attorney because they can argue so well?

Join Kate Turner MA, CSC, LPC for some laughter, learning, and empathy – as she shares some tips that really work. She’s used these techniques in her own “lab” ...and survived with a smile on her face. There will be door prizes and an evening of guaranteed fun!

#### **April 11<sup>th</sup> – Raising Responsible and Respectful Adults**

Every parent’s goal is to raise responsible and respectful adults. Come learn some new tried and true methods the Love and Logic<sup>®</sup> way.

#### **April 25<sup>th</sup> – Technology and Social Media – Taming the Technology Monster**

Technology overuse is more than being glued to a screen – it can create depression, anxiety, isolation, and loneliness. Kids share intimate details of their lives with strangers on-line – yet clam up when a parent asks about their day. The virtual “suburban gang” can (if unchecked) take the place of flesh and blood relationships. Thankfully, there are tried and tested tools that work!

#### **May 16<sup>th</sup> – Helicopters, Drill Sergeants, and Consultants**

There are so many different parenting styles, but we can all use new tools in our toolbox.

**6:30 – 7:30 PM in the Tomball Memorial High School Auditorium**

**Join us for one evening, two evenings, or all three!**

**While child care will NOT be provided, we are hopeful all parents and guardians can attend.  
Make it a date night!**
