

**STUDENT TEACHERS**

The Northern Humboldt Union High School District will cooperate with teacher-training institutions to provide in-service field training for student teachers.

The Board of Trustees feels that this district has an obligation in the training of future teachers, but this is subordinate to the obligation of providing the best possible education to its students.

It shall be the responsibility of the chief district administrator to determine the degree of participation by student teachers in order that the quality of instruction is not adversely affected.

Training institutions shall be advised to attempt to place a spouse, child, or near relative of certificated personnel or member of the Board of this district in another school district for student teaching. If this is not possible and should such training be performed in the district, it shall be at a school other than the one to which the spouse, child, or near relative is assigned.

The above also applies to Field Experience, Observation, and such other training which involves being assigned to work in a school for a period of time.
