

Coronavirus (COVID-19) Info & Resources

Jubilee Academies is working to ensure you have the most up-to-date information associated with the Coronavirus (COVID-19) as it pertains to your campuses. Please visit our district website www.jubileeademies.org for the most up-to-date communications and for information about closures, distant learning, grab & go meal distribution, and other resources. If you have any questions or concerns, please [email](#) us.

CORONAVIRUS UPDATE

There are officially over 200K cases reported around the world, with over **190** confirmed cases in Texas. As we all know, the state has closed all schools in Texas. Our main goal is to be a part of the solution and not the problem by being safe and listening to the health professionals. Currently, we are taking the following actions to help families:

- Serving meals at **Jubilee-San Antonio** and **Jubilee-Kingsville** and working hard to figure out the safest way to provide meals in every region
- Counselors and teachers will be calling our students and families to check in
- All campuses have been cleaned with high powered cleaning solutions and access to the campuses have been restricted to ensure our campuses are virus free

AT-HOME INSTRUCTION

To support continued student learning, the Curriculum and Instruction Department has developed Texas Essential Knowledge & Skill (TEKS) based lessons and activities for students to complete at home. Our goal is to prevent a decline in skills by providing assignments that allow students to incorporate what they have learned through projects, reinforcement activities, and cross-curricular work.

Students will also receive instructional support from their teachers through emails, phone calls, and videos. Some of our teachers have also communicated **optional** instructional resources to be used at home. In collaboration with our partners in education, Jubilee has established complimentary access to quality digital programs for students and families. Links to those programs will be provided each week along with the student assignments. If your child's teacher established distance learning routines earlier this year using Istation, Mathia, Imagine Math, STEMscopes and/or Google Classroom, we encourage students to continue using their existing devices and credentials.

Students in enrolled in **dual credit classes** with Universities will need to visit the university website to understand what is required to complete their courses.

TECHNOLOGY DISTRIBUTION

We have established a plan for distribution of technology/ devices which will begin the week of March 23. Please watch out for further details in the coming days. We expect to finish having devices distributed by April 3.

GRADUATION

We know that the biggest concern on the minds of our seniors and their families is graduation. The state has left this process up to school districts to determine what the requirements will be for students to complete the work for their diploma. Many of our students have begun an End-of-Year project that was assigned by their teachers. We will expand this project-learning approach to all of our seniors. Students can anticipate assignments, sent from their teachers, to be completed in order to earn the class credit.

SHARE YOUR SMILES FROM HOME

We miss seeing everyone's smiling faces and can't wait to hopefully see them again soon! For now, we want to see what everyone is up to at home. Share a fun photo or video of you and your students' at-home activities on your Facebook, Instagram, or Twitter using #JubileeFromHome
