

Parent Technology Survey

Parents are invited to participate in the Farmersville ISD survey of technology use in the home. Information from this survey helps the district know how to provide better access to technology and training for students and their families.

This survey will remain available through the end of February. As always, the school is very appreciative of parent feedback, and this is one of the best ways that parents can help the school assess student needs and improve its ability to help students.

How to Take the Survey

The parent survey takes about five minutes to complete and can be accessed by following the Parent Survey link(s) based on which campus(es) your child(ren) attend
