

**Nampa School District No. 131  
Student Transportation Request for Proposals March 2019  
Addendum #2**

**Addition to Contract Amendment Section**

4. The State of Idaho's transportation funding model includes two comparability traits to the other Districts/Charters in the State. If a District is over on these two comparability traits, their reimbursable cost percentage is determined to be "CAPED". Situations could arise that could "CAP" the District's reimbursable costs. If the District's reimbursable costs fail to remain below the State of Idaho's "CAP", the District will have the right to negotiate with the Contractor concepts to reduce costs to bring the District's reimbursable costs under the "CAP".
