DISTRICT MISSION STATEMENT

Comal ISD, where we encourage collaboration and communication, promote critical thinking, embrace high standards of accountability, and establish a winning tradition through perseverance and grit.

Curriculum and Instruction Support Staff

Kerry Gain, Assistant Superintendent for Academics and Student Services

Corbee Wunderlich, Executive Director for Secondary Education

Krista Moffatt, Executive Director for Elementary Education

Michele Martella, Executive Director of Special Education

Jarrett Cochran, Director for Technology

Shanie Bowers, Director for Special Education

Carla Schumann, Director for Fine Arts

Becky Walker, Director for CTE

Hannah Schramm, Director for Professional Learning

Courtney Witherell, Director for Accountability, Data Integrity, and Research

Karen Stevens, Director for Student Support Services

Ronessa McDonald, Director of Curriculum and Instruction, ELA

Renée Martinez, Director of College, Career, and Military Readiness

Sarah Permenter, Director of Bilingual/ESL

Tiffany Newkirk, Coordinator for Counseling, Foreign Exchange and Migrant

Patty Nieto, Curriculum Coordinator, Social Studies

Glenda Thacker, Curriculum Coordinator, Math

Kristen Lueck, Curriculum Coordinator, ELA

Taylor Keller, Curriculum Coordinator, Science

Melody Howard, Curriculum Coordinator, English

Carina Merkel, Coordinator for Bilingual/ESL

Jamie Brown, Coordinator for Accountability

Sarah King, Coordinator for Gifted and Talented

Stephanie Ehler, Coordinator for PBL Education

General Information

Please Note:

Specific school-related questions should be directed to campus staff. When a parent or guardian has a question or concern, he or she should contact the person who made the initial decision. After discussing the matter, if the concern continues, the principal should be contacted.

Grade Level Classifications

All students entering high school as a Freshman will need to meet the following credit requirements.

| | | |
|-----------|--------------|------------------------|
| Freshman | 1st year | 0-4.5 earned credits |
| Sophomore | 2nd year (+) | 5-9.5 earned credits |
| Junior | 3rd year (+) | 10-17.5 earned credits |
| Senior | 4th year (+) | 18 earned credits |

These classifications are based on the number of credits actually completed prior to registration

Grade Averaging

For a two-semester course in which both semesters are completed in the same school year, each semester's grade stands on its own; however, a full credit will be awarded if the average of both semesters is at least 70. Students transferring in during the spring semester with a failing fall semester grade may receive credit under this policy.

Ranking Classification

1. Recognition for academic honors will be given to the following graduating seniors:

- Valedictorian - Highest-ranking student
- Salutatorian - Second highest-ranking student
- Honor students –
 - Summa Cum Laude - be in top 5% of class
 - Magna Cum Laude - be in top 10% of class
 - Cum Laude - be in top 15% of class

2. To be eligible for valedictorian or salutatorian, a student shall have been enrolled in a Comal ISD high school for two full years immediately prior to graduation and must be a fourth year student.

3. The following numerical values will be used for letter grades transferred to the school:

| | | | | |
|---------|---------|---------|---------|--------|
| A+ = 97 | B+ = 87 | C+ = 79 | D+ = 74 | F = 60 |
| A = 94 | B = 84 | C = 77 | D = 72 | |
| A- = 90 | B- = 80 | C- = 75 | D- = 70 | |

Class Rank

Class rank is the academic position a student has in relation to other students in the grade level. The student with the highest rank average is number one in the grade level and the student with the lowest rank average is the last student in the grade level. All other students are ranked in between highest (number one) and lowest (last). Class rank is reported comparing that student to the total number of students in the grade level. Students will receive a higher weighted rank point for the more difficult level courses.

For example, given 250 students in a grade level, the highest ranked student (number one) would be reported as 1 of 250; lowest ranking students would be reported as 250 of 250.

Weighted class ranking encourages students to take more challenging academic courses in preparation for further

learning after high school. Institutions of higher learning require a student's class rank for admission purposes.

The weighted rank chart on page 10 is used to calculate a student's weighted cumulative rank average and is not reflected in the actual numerical grade recorded for each course on the academic achievement record (transcript), or the report card. Actual numerical semester grades are converted to weighted rank points according to the Weighted Class Rank Chart. Please see page 11 for a complete list of courses used to calculate class ranking.

Official class standing reports shall be issued to students each school year. Senior class ranking for the purpose of determining Valedictorian and Salutatorian is calculated at the end of the eighth semester. Other honor graduates will be calculated at the end of the seventh semester.

Please refer to Board Policy EIC Local for further details regarding Academic Honors for Seniors.

Pre-Advanced Placement (Pre-AP), Advanced Placement (AP), and Dual Credit Courses

Pre-Advanced Placement (Pre-AP) Courses

Pre-AP courses at the high school include activities and strategies designed to engage students in active, high-level learning. Students will develop the skills, habit of mind, and concepts needed to succeed in college. Depth of material requires students to read and write extensively in and out of class. All students are encouraged to take at least one advanced academics course each year of their high school experience.

Advanced Placement (AP) Courses

AP Courses are developed by the College Board and are designed to provide college level studies for high school students using college level materials and strategies. Amount and depth of material requires students to read and requires students to develop advanced reasoning and problem solving skills.

AP and Pre-AP Grading Policies

Student performance is evaluated on rigorous standards appropriate for the grade and content of the course. Courses are weighted when figuring class rank; however, actual grades earned will appear on all report cards and transcripts. In order to receive weighted points at the semester for an AP or Pre-AP course, the student must be enrolled in the advanced course for the entire semester and fulfill all requirements for the course. If the course is dropped within a semester, the un-weighted grade transfers to the new class.

Should students take all Pre-AP or AP Classes?

Students are encouraged to challenge themselves but also to find a balance among advanced courses, extra-curricular activities, and outside activities. Students should not feel that they have to take all classes at the Pre-AP/AP level. The decision on the number of Pre-AP/AP classes should be an individual decision based on the schedule and interest of each student.

Dual Credit Courses

Dual credit courses are offered to students interested in taking College Credit courses while still in high school. Students are taught and graded in the same way as college students who take the same course. CISD has analyzed college courses against the state curriculum and has determined which courses will be accepted as dual credit. Students will receive college

credit from the Dual Credit Institution/College immediately after they complete the course. Most courses will transfer to any public Texas college or university when a student earns a "C" or better. All college level courses are not "dual credit" courses; however there are a variety of courses offered in both the Academic and Career and Technology Areas. This list may be obtained from the school counselor. **Students are responsible for completing the college application process within a designated time frame and making arrangements to take the on-line entrance exam prior to enrollment in Dual Credit courses.**

Gifted and Talented Program for High School Students

In Comal ISD, the needs of Gifted and Talented students are met in several ways. In the four core subject areas – Language Arts, Mathematics, Science and Social Studies – identified gifted students may choose to participate in Pre-Advanced Placement and Advanced Placement courses with gifted instruction being provided by teachers trained in both Gifted Education and Advanced Placement methodologies.

Graduation Ceremony Participation and Diploma Requirements

The following guidelines will be used for fourth/fifth year students to be able to participate in the graduation ceremony and receive a diploma from the home campus:

1. Students entering high school as a freshman in 2011 or thereafter are expected to meet the following conditions in order to receive a diploma:
 - a. Complete **ALL** credit requirements
 - b. Pass all required EOC exams (English I, English II, Algebra I, Biology, United States History) with a scale score indicating satisfactory performance
2. Students may only participate in one graduation ceremony.

Early Graduation

Students who anticipate completing high school in fewer than four years must file an application for early graduation in the counselor's office. Students graduating early may participate in graduation ceremonies only if all graduation requirements are completed prior to the graduation ceremony. Students may not be ranked higher than 3rd in the senior class rank and shall share the third ranking position with fourth year student.

Students wishing to graduate early will need to schedule a meeting with their school counselor. The student's 4 year plan will need to be adjusted in order to plan for the early graduation. Students declaring early graduation in 3.5 years will need to have a completed Request for 3.5 year Early Graduation Form and on file with their counselor no later than the last day of their Junior year. Students declaring early graduation in 3 years will need to have a completed Request for 3 year Early Graduation Form and on file with their counselor no later than the last day of their Sophomore year.

It is the responsibility of the student to attend graduation rehearsal, pick up cap and gown, and pick up invitations at the designated times. Students who graduate early and wish to participate in graduation exercises will be required to abide by the same school rules and regulations as other students. Students who are not enrolled in Comal ISD in the spring semester shall be able to participate in senior activities during the remainder of the year with principal approval. This includes such activities as the senior trip, junior-senior prom, and other class functions. Diplomas shall be awarded at the end of the school year.

College Assessment Information

Students entering public community colleges or universities in Texas must meet minimum standards as established by the Texas Higher Education Coordinating Board as part of the Texas Success Initiative before enrolling in any college course work. Students not meeting minimum standards may have to take an additional test to demonstrate college readiness. The campus college and career center has detailed college registration and exemption information. Please contact the individual college to see what standards or tests are required.

Automatic Admission to Texas Public University for Top 10%

Top students in Texas are eligible for automatic admission to any public university in Texas under state admissions policies. Under House Bill 588 passed by the 75th Legislature in 1997, students who are in the top 10 percent of their graduating class are eligible for automatic admission to any public university in Texas. However, SB 175 caps the number of students admitted under the top 10% law and UT is required to offer automatic admission to 75% of the university's enrollment capacity designated for first-time resident undergraduate students in an academic year; thus, acceptance rates will vary. The University will determine the acceptance rate. To be eligible for the top 10 percent automatic admission, a student must:

- Graduate in the top 10 percent of his/her class at a public or private high school in Texas;
- Enroll in college no more than two years after graduating from high school; and
- Submit an application to a Texas public university for admission before the institution's application deadline. Since deadlines vary, please check with the specific university to verify the application deadline.

Once a student is admitted, a university may review a student's high school records to determine if the student is prepared for college-level course work. A student who needs additional preparation may be required to take a developmental, enrichment, or orientation course during the semester prior to the first semester of college.

The Texas Higher Education Coordinating Board was responsible for creating rules for this new admissions policy and adopted the "top 10 percent" rules in October 1997. For more information, see Appendix B.

Alternative Credit Opportunities

All credits earned through alternative means, as described below, will be used in determining academic honors. All grades earned, including high school courses taken at the middle school, will be used in class ranking except for those courses not included in the ranking system. Grades transferred must be from a four-year accredited high school to be accepted. If a student transfers from an unaccredited school, only grades earned through Comal ISD high school will be used for determining averages for ranking for academic honors.

Correspondence Courses

Students may use distance-learning courses, including correspondence courses, as a means of earning credit in a subject or course. In order to receive credit, a student shall obtain approval from the principal or designee prior to enrollment in the course. Only correspondence courses from the University of Texas (Austin) or Texas Tech University are acceptable. Seniors should complete their work and submit the grade for recording at least thirty days prior to their graduation date in order to be eligible for graduation at the end of the term.

Credit by Examination with Prior Instruction

A student who has previously taken a course or subject – but did not receive credit for it – may, in circumstances determined by the principal or attendance committee, be permitted to earn credit by passing an exam on the essential knowledge and skills defined for that course or subject. Prior instruction

may include, for example, incomplete coursework due to a failed course or excessive absences, home-schooling, or coursework by a student transferring from a non-accredited school. The counselor or principal will determine if the student is able to take the exam for this purpose. If approval is granted, the student must score at least a 70 on the exam to receive credit for the course or subject. The attendance review committee may also offer a student with excessive absences an opportunity to earn credit for a course by passing the exam. [For further information, visit your counselor and policy EHDB (LOCAL).] The cost of the exam will be the responsibility of the student.

Credit by Examination for Acceleration

A student will be permitted to take an exam to earn credit for an academic course for which the student has had no prior instruction or to accelerate to the next grade level. Students may take exams offered by the University of Texas or Texas Tech University for courses in which no prior instruction has been received. A score of 80 must be achieved. Test dates will be published in the spring and fall. Credit by examination for acceleration may be attempted a maximum of two times in each course. Once the credit is earned through Credit by Examination for Acceleration, the student will not be allowed to retake. There is no limit to the number of credits that can be earned through credit by exam. Students should contact a counselor for registration information.

Credit Obtained through College Programs

Comal ISD (CISD) provides college level opportunities for credit. Students must meet eligibility and enrollment requirements at the participating college. To receive credit toward a Performance Acknowledgement, the grade must be a "B" or better.

- Dual Credit – Dual credit is offered to students interested in taking College Credit courses while still in high school. Students are taught and graded in the same way as college students who take the same course. CISD has analyzed college courses against the state curriculum and has determined which courses will be accepted as dual credit. Students will receive college credit from the Dual Credit Institution/College immediately after they complete the course. Most courses will transfer to any public Texas college or university when a student earns a "C" or better. All college level courses are not "dual credit" courses, however there are a variety of courses offered in both the Academic and Career and Technology Areas. This list may be obtained from the school counselor. Students are responsible for completing the college application process within a designated time frame and making arrangements to take the on-line entrance exam prior to enrollment in Dual Credit courses. A student may take a maximum of two courses per semester at no cost to the student.
- Concurrent Enrollment – Concurrent enrollment courses are college courses students can take for college credit while enrolled in high school. Concurrent courses count toward a Performance Acknowledgement.

Texas Virtual School Network

During the 80th Texas Legislative Session, Senate Bill 1788 established a state virtual school network to provide online courses for Texas students. The Texas Virtual School Network (TxVSN) first offered courses to students in Texas districts and open enrollment charter schools beginning January 2009. Course offered for grades 8-12 ensure 100% alignment with the Texas Essential Knowledge and Skills as well as the INACOL National Standards of Quality for Online Courses. All courses offered through the TxVSN are provided by public school

districts, open-enrollment charter schools, institutions of higher education, or education service centers. All high school courses are taught by an instructor that is Texas-certified in the course subject area and grade level that have completed a TxVSN approved professional development on effective online instruction. **Tuition and fees for TxVSN courses will be the responsibility of the student and parent.** For more information regarding the TxVSN or other online course opportunities, please see your high school Academic Dean. You may also visit the TxVSN website at <http://www.txvsn.org/>.

Summer School/Semester

Students may attend an accredited summer school, provided that approval of the principal or counselor is obtained before enrolling. Summer school work can be used for the purpose of making up work that has been failed during the regular term, strengthening areas where a student is weak, giving a student an opportunity to avail himself/herself of courses that cannot be taken during the regular term because of scheduling conflicts, and obtaining credits for acceleration purposes.

Credit Recovery

Student may gain credit through computer-assisted instruction for courses previously failed. Not all courses are eligible for recovery. Students should contact their school counselor for information.

The Advanced Technical Credit Program (Statewide

Articulation) is an advanced placement program initiated to provide a method for high school students who continue technical programs of study in college to receive credit for knowledge and skills without duplication of coursework. Students successfully demonstrating college level competence in content enhanced high school courses are eligible to receive banked (in escrow) credit for courses that are part of an associate of applied science (AAS) degree or certificate plan offered by public two-year colleges. Some universities may also honor these courses, particularly those that offer BAAS, BAT, BSIS, or similar baccalaureate degrees.

Transcript of Credits

Many schools and colleges require students to submit a copy of their high school record before entering. If students plan to move to another school district, students should request the registrar to send the transcript to the student's new school at the time of withdrawal. If a student plans to attend college, the transcript should be requested sufficiently early for receipt by the college registrar before the end of July. Transcripts will be sent only by request. Students under the age of 18, who want their transcript sent to a college, must have a parent signature of approval.

NCAA Guidelines

All high-school athletes wishing to compete in college athletics must register with the Initial-Eligibility Center. Information about eligibility can be found in the Guide for the College-Bound Student-Athlete at www.eligibilitycenter.org. Students who are interested in attending college on athletic scholarships should carefully select high school courses that qualify under the National Collegiate Athletic Association guidelines. After you have registered and paid appropriate fees, please submit paperwork to the high school registrar.

Course Availability

Courses are offered according to student need and teacher availability. Students and parents are reminded that course selection determines how the school's schedule is built, faculty is hired and room assignments are made.

Schedule Changes

Schedule changes can have a significant impact on the calculation of the nine-weeks average. Therefore, schedule changes will be considered for the following reasons only:

- The student is a senior not scheduled in a course needed for graduation.

- The student has already earned credit for a course in which he/she is currently scheduled.
 - The student does not have the prerequisite(s) for a class listed on his/her schedule.
 - The student has previously failed this course under the same teacher.
 - The student has been dismissed from a program for which approval must be granted for placement.
 - The student does not have a full schedule.
 - There is a data entry error (no lunch, class listed twice, free period, etc.).
 - Other as approved by building administrator or designee.
 - Course level changes:
- o To transfer to a lower level class, the student must have made a sincere effort to succeed, as determined by the campus personnel, by completing work and attending tutorials. If these conditions are met and the student is earning less than a grade of 75, that student will be considered for a change. An administrator or administrative designee must approve schedule changes. State law mandates 90% attendance in each class each semester. An administrator or administrative designee must approve schedule changes. State law

mandates 90% attendance in each class each semester.

Course Selection

The school cannot take the total responsibility for the proper choice of subjects for either students' graduation or college entrance. Students should carefully check the local graduation requirements and the catalog of the college of choice before choosing courses. A useful reference site in this regard is www.collegeboard.org. Under no circumstances should students depend on any high school official to choose the correct courses for their future. The counselors, the administration, or other faculty members will be glad to assist students at any time, but students and parents must make the final choice. The parent must approve changes. The administrator or administrative designee must approve schedule changes. The Foundation High School Plan is one of the requirements to receive additional State financial aid. The Texas Grant and Exemption Program is an award of varying amounts to assist certain students who graduate on the Foundation High School Program with college expenses. For more information, visit www.collegeforalltexas.com/ or call 1-800-242-3062 x6344.

Class Rank Chart

| Actual Grade | 1.0 – General Education | 1.1 – Pre-AP | 1.2 – Dual Credit | 1.25 Advanced Placement |
|--------------|-------------------------|--------------|-------------------|-------------------------|

| 71 | 71 | 78.1 | 85.2 | 88.75 |
| 70 | 70 | 77.0 | 84.0 | 87.50 |

Explanation of Eligibility for Automatic College Admission

Under the Automatic Admission policy (Texas Education Code §51.803), Texas students may be eligible for automatic admission to a state college or university as an undergraduate student if they meet certain criteria. To qualify for automatic admission, a student **must**:

- (1) the applicant graduated from a public or private high school in this state accredited by a generally recognized accrediting organization or from a high school operated by the United States Department of Defense;
- (2) the applicant:
 - (A) Successfully completed:
 - (i) at a public high school, the curriculum requirements established under Section 28.025 for the distinguished level of achievement under the foundation high school program; or
 - (ii) at a high school to which Section 28.025 does not apply, a curriculum that is equivalent in content and rigor to the distinguished level of achievement under the foundation high school program; or
 - (B) satisfied ACT's College Readiness Benchmarks on the ACT assessment applicable to the applicant or earned on the SAT assessment a score of at least 1,500 out of 2,400 or the equivalent; and
- (3) if the applicant graduated from a high school operated by the United States Department of Defense, the applicant is a Texas resident under Section 54.052 or is entitled to pay tuition fees at the rate provided for Texas residents under Section 54.241 (d) for the term or semester to which admitted.

*For students entering high school in the 2014-2015 school year or later, a distinguished level of achievement is needed to be considered for the top 10% automatic admission.

Admission and Enrollment

State colleges and universities may admit a student accepted under the Automatic Admission policy for either the fall semester of the academic year for which the student applied or for the summer session that precedes that fall semester. Additionally, the admitting college or university may require that applicants in need of additional preparation for college-level work enroll in enrichment courses or programs during the summer immediately after the student is admitted. Colleges and universities are required to admit an applicant as an undergraduate student if the applicant is the child of a public servant who was killed or fatally injured in the line of duty and who meets the minimum entrance requirements set by the college or university.

*The University of Texas at Austin

Beginning with admissions for the 2011-2012 school year, The University of Texas at Austin (UT) is no longer required to automatically admit applicants in excess of 75% of its enrollment capacity for first-time resident undergraduate students. Should the number of applicants who qualify for automatic admission exceed 75% of enrollment capacity, UT shall provide notice of the percentage of qualified applicants that are anticipated to be offered admission. For the 2018-2019 academic year, UT has determined that it will automatically admit all eligible applicants who rank within the **top 6%** of their high school graduating classes. For the 2019-2020 academic year, UT has determined that it will automatically admit all eligible applicants who rank within the **top 6%** of their graduating classes. Please note that students admitted to UT under the Automatic Admission policy will be required to complete at least 6 semester credit hours during evening or other low-demand hours in order to ensure the efficient use of available classrooms.

-

Endorsements

Students entering high school in 2014 and beyond are required to declare an endorsement. These students are also eligible for a distinguished level of achievement and performance acknowledgements. The endorsements are selected from the following:

STEM

A student entering high school in 2014 and beyond can earn a STEM endorsement by taking courses directly related to science; including environmental science, technology, including computer science; engineering; and advanced mathematics.

Business and Industry

A student entering high school in 2014 and beyond can earn an endorsement in Business and Industry by completing courses directly related to database management, architecture, information technology, construction, communications, welding, accounting, logistics, finance, automotive technology, marketing, agricultural science, graphic design, culinary arts and hospitality, and HVAC.

Public Services

A student entering high school in 2014 and beyond can earn an endorsement in Public Services by completing courses directly related to health sciences and occupations, education and training, and law enforcement.

Arts and Humanities

A student entering high school in 2014 and beyond can earn an endorsement in Arts and Humanities by completing courses directly related to political science, English literature, world languages, history, cultural studies, and fine arts.

Multidisciplinary Studies

A student entering high school in 2014 and beyond can earn an endorsement in Multidisciplinary Studies by completing courses from the curriculum of each endorsement area and earning credits in a variety of advanced courses from multiple content areas sufficient to complete the distinguished level of achievement.

Distinguished Level of Achievement

A student may earn a distinguished level of achievement by successfully completing the curriculum requirements for the Foundation High School Program and the curriculum requirements for at least one endorsement, including four credits in science and four credits in mathematics to include Algebra II.

Performance Acknowledgements

A student may earn a performance acknowledgment on the student's diploma and transcript for outstanding performance in a dual credit course by successfully completing:

- At least 12 hours of college academic courses with a grade equivalent of 3.0 or higher; or
- An associate degree while in high school.

For students who have participated in and met the exit criteria for a bilingual or English as a second language (ESL) program and scored at the Advanced High level on the Texas English Language Proficiency Assessment System (TELPAS), the English language learner may earn a performance acknowledgment by:

- Completing all English language arts requirements and maintaining a minimum GPA of an 80 on a scale of 100; and
- Satisfying one of the following:
 - Completion of a minimum of three credits in the same language in a language other than English with a minimum GPA of an 80 on a scale of 100; or
 - Demonstrated proficiency in the TEKS for Level IV or higher in a language other than English with a minimum GPA of an 80 on a scale of 100; or
 - Completing of at least three credits in foundation subject area courses in a language other than English with a minimum GPA of an 80 on a scale of 100; or
 - Demonstrated proficiency in one or more languages other than English through one of the following methods:
 - A score of 3 or higher on a College Board Advanced Placement exam for a language other than English; or
 - Performance on a national assessment of language proficiency in a language other than English of at least Intermediate High or its equivalent.

A student may earn a performance acknowledgment by earning a score of 3 or above on a College Board Advanced Placement Exam.

A student may earn a performance acknowledgement by:

- Earning a score on the PSAT/NMSQT that qualifies the student for recognition as a commended scholar or higher by the College Board and National Merit Scholarship Corporation, as part of the National Hispanic Recognition Program of the College Board or as part of the National Achievement Scholarship Program of the National Merit Scholarship Corporation;
- Achieving the college readiness benchmark score on at least two of the four subject tests on the ACT-PLAN;
- Earning a combined critical reading and mathematics score of at least 1310 on the SAT; or
- Earning a composite score on the ACT exam of 28 (excluding the writing sub-score)

A student may earn a performance acknowledgement for:

- Performance on an examination or series of examinations sufficient to obtain a nationally or internationally recognized business or industry certification; or
- Performance on an examination sufficient to obtain a government-required credential to practice a profession.

Comal ISD Math Sequence (House Bill 5)

| HB 5: Students that entered 9 th in 2014 – 2015 | |

Course Descriptions

Courses in this guide may not be offered in a given year. Other than required courses, courses may vary based on the number of student requests for the course.

A list of Dual Credit courses may be obtained from your school counselor. As a prerequisite for all Dual Credit courses, students are responsible for completing the college application process and making arrangements to take the on-line entrance exam prior to enrollment. Please visit with your school counselor for more information on Dual Credit opportunities.

English Language Arts

English I – 1158

Credit: 1, Full Year

Prerequisite: None

Students will develop an understanding for reading, writing, research, listening, speaking, and the oral and written conventions of the English language. Students will engage in activities that build on their prior knowledge and skills in order to strengthen their reading, writing, and oral language skills. In addition, students will continue to address earlier standards as needed while they attend to standards for their grade level. Students will read and write extensively in multiple genres and keep a portfolio of written work.

Pre-AP English I – 1157

Credit: 1, Full Year

Prerequisite: None

The Pre-AP English class serves as the foundation for the Advanced Placement Program, specifically for AP English III Language and Composition and AP English IV Literature and Composition. Emphasis is placed on developing students' skills in critical, analytical and creative thinking, close reading, grammar, and composition. Students will read and write extensively in multiple genres and keep a portfolio of written work. A summer reading assignment may be required.

English II – 1258

Credit: 1, Full Year

Prerequisite: English I recommended

Students will develop an understanding for reading, writing, research, listening, speaking, and the oral and written conventions of English. Students will engage in activities that build on their prior knowledge and skills in order to strengthen their reading, writing, and oral language skills. In addition, students will continue to address earlier standards as needed while they attend to standards for their grade level. Students will read and write extensively in multiple genres and keep a portfolio of written work.

Pre-AP English II - 1257

Credit: 1, Full Year

Prerequisite: English I recommended

The Pre-AP English class serves as the foundation for the Advanced Placement Program, specifically for AP English III Language and Composition and AP English IV Literature and Composition. Emphasis is placed on developing students' skills in critical, analytical and creative thinking, close reading, grammar, and composition. Students will read and write extensively in multiple genres and keep a portfolio of written work. A summer reading assignment may be required.

English III – 1358

Credit: 1, Full Year

Prerequisite: English II recommended

Students will develop an understanding for reading, writing, research, listening, speaking, and the oral and written

conventions of English. Students will engage in activities that build on their prior knowledge and skills in order to strengthen their reading, writing, and oral language skills. In addition, students will continue to address earlier standards as needed while they attend to standards for their grade level. Students will read extensively from multiple genres with an emphasis on American literature. Students will write extensively and keep a portfolio of written work.

English III Dual - 1350

ENGL 1301/1302

Credit: 1, Full Year

Prerequisite: English II recommended

Must follow dual credit process; TSI required for dual credit.

Intensive study of and practice in writing processes, from invention and researching to drafting, revising, and editing, both individually and collaboratively. Emphasis on effective rhetorical choices, including audience, purpose, arrangement, and style. Focus on writing the academic essay as a vehicle for learning, communicating, and critical analysis. Second semester will emphasize effective and ethical rhetorical inquiry, including primary and secondary research methods; critical reading of verbal, visual, and multimedia texts; systematic evaluation, synthesis, and documentation of information sources; and critical thinking about evidence and conclusions.

AP English III

Language and Composition – 1356

Credit: 1, Full Year

Prerequisite: English II recommended

This college-level course prepares students to take the AP Language and Composition exam for possible college credit. Critical and creative thinking skills are developed through the reading and critical analysis of literature and language as well as required reading, discussion, essays, and exams. Students are required to use rhetorical analysis, critical evaluation, and advanced writing techniques. Students will read and write extensively and keep a portfolio of written work. A summer reading assignment may be required.

English IV – 1458

Credit: 1, Full Year

Prerequisite: English III recommended

Endorsement: Arts and Humanities

Students will develop an understanding for reading, writing, research, listening, speaking, and the oral and written conventions of English. Students will engage in activities that build on their prior knowledge and skills in order to strengthen their reading, writing, and oral language skills. In addition, students will continue to address earlier standards as needed while they attend to standards for their grade level. Students will read extensively from multiple genres with an emphasis on British literature. Students will write extensively and keep a portfolio of written work.

English IV Dual - 1450

ENGL 2322/2323

Credit: 1, Full Year

Prerequisite: English III recommended

Must follow dual credit process; TSI required for dual credit.

A survey of the development of British literature from the Anglo-Saxon period to the Eighteenth Century. Students will study works of prose, poetry, drama, and fiction in relation to their

historical, linguistic, and cultural contexts. Texts will be selected from a diverse group of authors and traditions. Second semester will survey of the development of British literature from the Romantic period to the present. Students will study works of prose, poetry, drama, and fiction in relation to their historical and cultural contexts. Texts will be selected from a diverse group of authors and traditions.

AP English IV

Literature and Composition – 1456

Credit: 1, Full Year

Prerequisite: English III recommended

This college-level course prepares students to take the AP Literature and Composition exam for possible college credit and serves as a survey of British literature. Critical and creative thinking skills are developed through the reading and in-depth analysis of various genres of literature through required readings, discussions, essays and exams. Students will examine literary works and analyze literary elements in relation to the contemporary experience and the times in which they were written. Students will write extensively and keep a portfolio of written work. A summer reading assignment may be required.

English I for Speakers of Other Languages (ESOL) – 1118

Credit: 1, Full Year

Prerequisite: Committee approval

This course covers all the TEKS for English I but uses ESL strategies to assist the student in mastering the objectives. It is designed for beginning ESOL students with an emphasis on speaking, listening, reading, and writing skills. Only students that are served through the ESL program can substitute ESOL I for English I.

English II for Speakers of Other Languages (ESOL) – 1128

Credit: 1, Full Year

Prerequisite: Committee approval

This course covers all the TEKS for English II but uses ESL strategies to assist the student in mastering the objectives. It is designed for beginning ESOL students with an emphasis on speaking, listening, reading, and writing skills. Only students that are served through the ESL program can substitute ESOL II for English II.

Reading I, II & III – 1014, 1024, 1044

Credit: ½-1, Semester - Full Year

Prerequisite: Committee Approval

This course offers students instruction in word recognition, comprehension strategies and vocabulary to ensure that they have increased opportunities to read with competence, confidence, and understanding. Students are given opportunities to locate information in varied sources, to evaluate sources, and to draw supportable conclusions. Students learn how various texts are organized and how authors choose language for effect. All of these strategies are applied in texts that cross the subject fields.

College Readiness and Study Skills – 1034

Credit: ½, Semester

Prerequisite: None

This course is designed for students that require or request additional honing of their study skills, especially as they prepare for the demands of college. In this course students acquire techniques for learning from texts, including studying word meanings, identifying and relating key ideas, drawing and supporting inferences, and reviewing study strategies. In all cases, interpretations and understandings will be presented through varying forms, including the use of available technology. Students accomplish many of the objectives through wide reading as well as use of content texts in preparation for post-secondary schooling.

SPEECH

Professional Communication – 8069

Credit: ½, Semester

Updated: 01/07/2019

Prerequisite: None

Professional Communications blends written, oral, and graphic communication in a career-based environment. Careers in the global economy require individuals to be creative and have a strong background in computer and technology applications, a strong and solid academic foundation, and a proficiency in professional oral and written communication. Students will be expected to develop and expand the ability to write, read, edit, speak, listen, apply software applications, manipulate computer graphics, and conduct Internet research.

Debate I – 1404

Credit: 1, Full Year

Prerequisite: None

Debate offers instruction and application in the principles of formal debate. Students will learn procedures and techniques of debate in modern society. Students will apply specific concepts to the preparation and delivery of formal debates. This will include researching, organizing, and presenting the affirmative and negative positions of a topic. Students will be required to participate in several interscholastic debate tournaments throughout the year.

Debate II/III – 1414/1424

Credit: 1, Full Year

Prerequisite: Debate I

Debate offers instruction and application in the principles of formal debate. Students will learn procedures and techniques of debate in modern society. Students will apply specific concepts to the preparation and delivery of formal debates. This will include researching, organizing, and presenting the affirmative and negative positions of a topic. Students will be required to participate in several interscholastic debate tournaments throughout the year.

ENGLISH ELECTIVES

Journalism – 1604

Credit: 1, Full Year

Grade: 9-11

Prerequisite: None

Endorsement: Business and Industry

Designed primarily for freshmen, this course is a study of the history and the contemporary role of mass media in the United States. Students will be exposed to advertising, layout and design, and various writing techniques. This course will prepare students to advance to one of the journalism production classes.

Advanced Journalism: Yearbook Production I, II, III – 1614, 1624, 1634

Credit: 1, Full Year

Grade: 9-12

Prerequisite: Teacher approval

Endorsement: Business and Industry

Advanced Journalism students become actively involved in the publishing of the school yearbook. Students get practical experience in advertising sales, layout design, writing, editing, desktop publishing, and basic photography as they help produce the yearbook. Leadership, dependability, and responsibility are exercised in learning to deal with people in a deadline situation. This course will require some after school time and may be taken more than one year (with teacher approval) for credit.

Advanced Journalism: Newspaper Production I, II, III -- 1644, 1654, 1664

Credit: 1, Full Year

Grade: 9-12

Prerequisite: Teacher approval

Endorsement: Business and Industry

This course is a study of techniques involved in writing news features, sports, editorials, and columns. Students will actively

be involved in the writing, editing, advertising, photography, layout and design of the school newspaper. Leadership, dependability and responsibility are exercised in learning to deal with people in a deadline situation. This course will require some after-school work time and may be taken more than one year for credit.

Adv. Broadcast Journalism I, II, III – 1714, 1724, 1734

Credit: 1, Full Year **Grade: 9-12**

Prerequisite: Teacher approval

Endorsement: Business and Industry

This course utilizes technology to communicate school and community information and features to the student body. Scriptwriting is combined with the use of video equipment and microphones, plus the use of video editing equipment. Throughout the course, students concentrate on learning to use digital and analog video systems and software applications and the computer terminology that applies. Students apply these computer skills to produce a feature show for the school or community.

Practical Writing – 1375

Credit: 1, Full Year

Prerequisite: Committee Approval

Practical Writing is an opportunity for students to develop understandings and skills that will allow them to successfully pass the STAAR test. It is a one semester course focused solely on the skills students are required to exhibit on the STAAR test. This semester course is a unique opportunity for individual instruction and assessment. The focus will be on students' areas of greatest need and will address them through re-teaching of expectations and strategies to help the student overcome their challenges. [Students will be given the opportunity to demonstrate their understanding and abilities through creative projects and activities.]

College Preparatory for Transition ELAR – 1501

Credit: 1, Full Year

Recommended: Students who have successfully completed English I, II, and met the state requirement for "Level II/Satisfactory Academic Performance "on both STARR English I and II

In this college-preparatory course students will improve integrated critical reading and writing skills through engagement with a variety of texts across content areas and genres. As a result, students will be able to develop and express ideas clearly and effectively to communicate with various audiences for various purposes and occasions.

Mathematics

Algebra I – 2158

Credit: 1, Full Year

Prerequisite: Math 8 or Pre-AP Math 7

Algebra I will expand students' understanding of number and algebraic methods; describing, graphing, writing, and solving linear functions, equations and inequalities; describing, graphing, writing, and solving quadratic functions and equations; and writing and graphing exponential functions. Special emphasis is placed on problems solving, multiple representations, and application of skills and concepts. Students will continue use of the graphing calculator.

Pre-AP Algebra I – 2200

Credit: 1, Full Year

Prerequisite: Math 8 or Pre-AP Math 7

Pre-AP Algebra I serves as the foundation for the Advanced Placement Program. In addition to the prescribed curriculum for algebra, this course is designed to address high level thinking

and problem solving skills. Students who wish to take advanced placement math exams during their senior year should consider this course.

Geometry –2238

Credit: 1, Full Year

Prerequisite: Algebra I

Geometry students use logical arguments and constructions to make conjectures about geometric relationships and solve problems. The course provides a mathematical model to the physical world and applies algebraic concepts to geometric situations. Topics include coordinate and transformational geometry, proof and congruence, similarity and trigonometry, two and three-dimensional geometry, and probability.

Pre-AP Geometry – 2237

Credit: 1, Full Year

Prerequisite: Algebra I

Pre-AP Geometry serves as the foundation for the Advanced Placement Program. In addition to the prescribed curriculum for geometry, this course is designed to address high level thinking and problem solving skills. Emphasis is placed on formal proofs using deductive and inductive reasoning. Students who wish to take advanced placement math exams during their senior year should consider this course.

Mathematical Models with Applications – 2208

Credit: 1, Full Year

Prerequisite: Algebra I

Students continue to build on Algebra I and Geometry concepts as they expand their understanding through other mathematical experiences. Students apply real world mathematical problems through experiences in personal finance, science, engineering, fine arts, and social sciences.

Algebraic Reasoning -2159

Credit: 1, Full Year

Prerequisite: Algebra I

Endorsement: STEM

Algebraic Reasoning continues the development of mathematical reasoning related to algebraic understandings and processes. Students broaden their understanding of various algebraic functions and relationships. Students will study these functions through analysis and application that include exploration of patterns and structure, and algebraic methods and modeling from data using tools that build to workforce and college readiness.

Algebra II – 2258

Credit: 1, Full Year

Prerequisite: Algebra I

Endorsement: Algebra II or Pre-AP Algebra II is required for a STEM Endorsement: STEM

Algebra II students extend algebraic skills developed in Algebra I into new situations. The major emphasis is on applied problem solving. Topics include describing and graphing functions and their inverses, writing and solving systems of equations and inequalities, writing and solving quadratic and square root functions, formulating and solving exponential functions, logarithmic functions and equations, absolute value equations and inequalities, and rational functions.

Pre-AP Algebra II – 2257

Credit: 1, Full Year

Prerequisite: Algebra I

Endorsement: Algebra II or Pre-AP Algebra II is required for a STEM endorsement

Pre-AP Algebra II serves as the foundation for the Advanced Placement Program. In addition to the prescribed curriculum for Algebra II, this course will address higher-level thinking and problem solving skills. Also included are proof and theory of algebraic statements and analyzing and solving more

challenging problems. Graphing calculators will be utilized extensively.

Advanced Quantitative Reasoning –2418

Credit: 1, Full Year

Prerequisite: Geometry & Algebra II

Endorsement: STEM

Advanced Quantitative Reasoning is a 4th year math course that builds on concepts from Algebra I, Geometry and Algebra II. Students expand their understanding through further mathematical experiences including the analysis of information using statistical methods and probability, modeling change and mathematical relationships, and spatial and geometric modeling for mathematical reasoning. Students learn to become critical consumers of real-world quantitative data, knowledgeable problem solvers who use logical reasoning, and mathematic thinkers who can use their quantitative skills to solve authentic problems.

Pre-Calculus – 2318

Credit: 1, Full Year

Prerequisite: Algebra I, Geometry, & Algebra II

Endorsement: STEM

Pre-Calculus covers topics that traditionally follow algebra and geometry including polynomials, exponential, logarithmic and circular functions, and their combinations. Major exploration topics include trigonometry, sequences and series, vectors, complex numbers, probability, and problem solving.

Pre-AP Pre-Calculus – 2317

Credit: 1, Full Year

Prerequisite: Algebra I, Geometry, & Algebra II

Endorsement: STEM

Pre-AP Pre-Calculus serves as the foundation for the Advanced Placement Program. This course is an extension of regular Pre-Calculus and includes extensive problem solving and high level thinking skills. Emphasis will be placed on skills necessary to be successful in AP Calculus AB or BC.

AP Calculus AB – 2426

Credit: 1, Full Year

Prerequisite: Suggested Pre-Calculus

Endorsement: STEM

This college level course prepares students to take the AP Calculus AB Exam for possible college credit. It is equivalent to the first semester of college Calculus, and includes practical applications of Calculus. Topics include limits and continuity of functions; derivatives and their applications; definite integrals and their applications; elementary techniques and applications of anti-differentiation, including differential equations and slope fields.

AP Calculus BC – 2436

Credit: 1, Full Year

Prerequisite: Suggested Pre-Calculus

Endorsement: STEM

This college level course prepares students to take the AP Calculus BC Exam for possible college credit. It includes all Calculus AB topics plus additional material including the calculus of parametric and polar curves, vectors, Euler's method, improper integrals, advanced techniques of integration, and sequences and series. It is equivalent to a full year of college calculus.

AP Statistics – 2506

Credit: 1, Full Year

Prerequisite: Algebra I; Suggested Geometry and Algebra II Preferred

Endorsement: STEM

This college level course prepares students to take the AP Statistics Exam for possible college credit. It is equivalent to a one-semester introductory college course in statistics.

Updated: 01/07/2019

Students should have a solid foundation in algebra prior to enrollment. This course will introduce students to four major conceptual themes: observing and exploring data; planning a statistically valid investigation; anticipating patterns and using probability and simulations for predicting outcomes; and confirming or rejecting models through statistical inference. Technology is an integral part of the course. Graphing calculators and computers are the primary tools for data analysis.

Statistics – 2507

Credit: 1, Full Year

Prerequisite: Algebra I

Endorsement: STEM

This course prepares students to take entry level Statistics in college. Students should have a solid foundation in algebra prior to enrollment. This course will introduce students to four major conceptual themes: observing and exploring data; planning a statistically valid investigation; anticipating patterns and using probability and simulations for predicting outcomes; and confirming or rejecting models through statistical inference. Technology is an integral part of the course. Graphing calculators and computers are the primary tools for data analysis. This course will count as a fourth math credit.

Statistics - University of Texas OnRamps Dual Enrollment - 2508 SDS 302

Credit: 1, Full Year

Prerequisite: Successful completion of Algebra II

Grade Level Requirement: 11th and 12th grade only

Endorsement: STEM

OnRamps Statistics is a dual-enrollment data analysis course for high school juniors and seniors seeking to develop the quantitative reasoning skill and habits of mind necessary to succeed in the higher education environment. This course will target conceptual understanding and hone highly relevant mathematical skills through scaffold introduction of statistical methodologies, informal game play, and strategic lab exercises that engage students in hands-on analysis of real data. Valuable programming and coding skills are acquired as a means to conducting these analyses, giving students a solid foundation in data science. Students can earn three hours of UT credit with feedback and assessment provided by UT course staff.

College Algebra/Pre-Calculus Dual Credit – 2271

MATH 1414/2412

Credit: 1, Full Year

Prerequisite: Geometry and Algebra II

St. Philips Prerequisite: INRW 0420 and Math 0320

Endorsement: STEM

Must follow dual credit process; TSI required for dual credit.

This college level course is for students interested in pursuing a career in science, technology, engineering, or mathematics. In-depth combined study of algebra, trigonometry, and other topics for calculus readiness.

Computer Science - University of Texas OnRamps Dual Enrollment - 5401

Credit: 1, Full Year

Grade Level Requirement: 11th and 12th grade only

Prerequisite: Successful completion of Algebra II

Endorsement: STEM

Thriving in Our Digital World is a new dual enrollment course that teaches computer science and its impact on our society. In addition to learning about the magic and beauty of computing, students will acquire essential Texas College and Career Readiness skills, applying critical thinking, problem solving, and communication within a project-based learning framework. Students will experience high-quality curriculum designed by the

faculty at The University of Texas at Austin. Students can earn three hours of UT credit with feedback and assessment provided by UT course staff.

Strategic Learning for HS Math - 2007

Credit: ½ - 1, Sem. or Full Year

Prerequisite: *Committee Approval*

This course will stimulate students to think about their approach to mathematical learning. Content will include identifying errors in the teaching and learning process, input errors, physiological concerns and key cognitive skills. These skills will foster a deeper understanding of the task of learning mathematical concepts. Use of personal data and statistical analysis will establish relevance and aid in creation of personalized learning goals.

College Preparatory for Transition Math - 2160

Credit: 1, Full Year

Recommended: *Student has credit for Algebra I and Geometry and has met the passing standard on the Algebra I EOC.*

Topics include real numbers, basic geometry, polynomials, factoring, linear equations, inequalities, quadratic equations and rational expressions. Calculator use is allowed in this course when indicated, including the departmental final examination. An overall grade for the semester of 75 or higher indicates that the student has met the Higher Ed Partnership criteria, and the student is prepared for Intermediate Algebra without further assessment or remediation.

Science

Biology – 3118

Credit: 1, Full Year

Prerequisite: *None*

In Biology, students conduct laboratory and field investigations, use scientific practices during investigations, and make informed decisions using critical thinking and scientific problem solving. Students will study topics such as: structures and functions of cells and viruses; growth and development of organisms; cells, tissues, organs, nucleic acids, and genetics; biological change; taxonomy; metabolism and energy transfers in living organisms; living systems; homeostasis; and ecosystems and the environment. Students will receive CPR and also continue Scott and White Wellness and Sexual Health Curriculum (formerly known as "Worth the Wait"), which includes learning about STD's, legal issues, and safe decision-making skills.

Pre-AP Biology – 3117

Credit: 1, Full Year

Prerequisite: *None*

The Pre-AP class serves as the foundation for Advanced Placement Program Science Courses. In preparation for AP science courses, Pre-AP students will focus on deepening their understanding of content and develop critical inquiry and reasoning skills by engaging in labs and critical writing opportunities that elicit the implementation of the seven science practices described by the College Board. Many of the concepts are the same as those in Biology, except the presentation is more accelerated and in more detail. Students will receive CPR instruction and also continue the Scott and White Wellness and Sexual Health Curriculum (formerly known as "Worth the Wait"), which includes learning about STD's, legal issues, and safe decision-making skills. This course is part of the College Board Pre-AP Curriculum Pilot.

AP Biology – 3116

Credit: 1, Full Year

Prerequisite: *Biology or Pre-AP Biology and Chemistry or Pre-AP Chemistry per College Board*

Endorsement: *STEM*

This college level course prepares students to take the AP Biology exam for possible college credit. AP Biology is an introductory college-level biology course. Students cultivate their understanding of biology through inquiry-based investigations as they explore the following topics: evolution, cellular processes – energy and communication, genetics, information transfer, ecology, and interactions. This course requires that 25 percent of the instructional time will be spent in hands-on laboratory work, with an emphasis on inquiry-based investigations that provide students with opportunities to apply the science practices.

Integrated Physics and Chemistry (IPC) –3208

Credit: 1, Full Year

Prerequisite: *None*

In Integrated Physics and Chemistry, students conduct laboratory and field investigations, use scientific practices during investigations, and make informed decisions using critical thinking and scientific problem solving. This course integrates the concepts of physics and chemistry using practical applications relating to topics such as: force, motion, energy, and matter.

Chemistry –3318

Credit: 1, Full Year

Prerequisite: *One unit of high school science & Algebra I.*

Completion of or concurrent enrollment in a second year of math is suggested.

Endorsement: *Chemistry or Pre-AP Chemistry is required for a STEM endorsement*

Students will conduct laboratory and field investigations, use scientific practices during investigations, and make informed decisions using critical thinking and scientific problem solving. Topics of study include: characteristics of matter; use of the Periodic Table, development of atomic theory and chemical bonding, chemical stoichiometry, gas laws, solution chemistry, thermochemistry, and nuclear chemistry. Students will investigate how chemistry is an integral part of our daily lives.

Pre-AP Chemistry – 3317

Credit: 1, Full Year

Prerequisite: *One unit of high school science & Algebra I.*

Completion of or concurrent enrollment in a second year of math is recommended

Endorsement: *Chemistry or Pre-AP Chemistry is required for a STEM endorsement*

The Pre-AP class serves as the foundation for Advanced Placement Program Science Courses. In preparation for AP science courses, Pre-AP students will focus on deepening their understanding of content and develop critical inquiry and reasoning skills by engaging in labs and critical writing opportunities that elicit the implementation of the seven science practices described by the College Board. Many of the concepts are the same as those in Chemistry, except the presentation is more accelerated and in more detail.

AP Chemistry – 3316

Credit: 1, Full Year

Prerequisite: *Completion of Chemistry or Pre-AP Chemistry and Algebra II recommended by College Board*

Endorsement: *STEM*

This college level course prepares students to take the AP Chemistry exam for possible college credit. The AP Chemistry course provides students with a college-level foundation to support future advanced course work in chemistry. Students cultivate their understanding of chemistry through inquiry-based investigations, as they explore topics such as: atomic structure, intermolecular forces and bonding, chemical reactions, kinetics, thermodynamics, and equilibrium. This course requires that 25 percent of the instructional time engages students in lab investigations.

Physics – 3418

Credit: 1, Full Year

Prerequisite: Completion or concurrent enrollment in Algebra 1 is suggested

Endorsement: STEM

In Physics, students will conduct laboratory and field investigations use scientific practices during investigations, and make informed decisions using critical thinking and scientific problem solving. This course provides students with a conceptual framework, practice in experimental design and interpretation, working collaboratively with colleagues, and developing critical thinking skills. Topics of study include: laws of motion; changes within physical systems and conservation of energy and momentum; forces; thermodynamics, characteristics and behavior of waves; and atomic, nuclear, and quantum physics.

AP Physics 1 – 3409

Credit: 1, Full Year

Prerequisite: Successful completion of Geometry and concurrent enrollment or completion of Algebra II is suggested by College Board

Endorsement: STEM

This college level course prepares students to take the AP Physics 1 exam for possible college credit. AP Physics 1 is an algebra-based course that is equivalent to a first-semester college course in algebra-based physics. Students cultivate their understanding of physics through inquiry-based investigations as they explore these topics: kinematics; dynamics; circular motion and gravitation; energy; momentum; simple harmonic motion; torque and rotational motion; electric charge and electric force; DC circuits; and mechanical waves and sound. This course requires that 25 percent of the instructional time will be spent in hands-on laboratory work, with an emphasis on inquiry-based investigations that provide student with opportunities to demonstrate the foundational physics principles and apply the science practices.

AP Physics 2 – 3419

Credit: 1, Full Year

Prerequisite: Successful completion of AP Physics 1 or equivalent course and concurrent enrollment or completion of Pre-Calculus is recommended by College Board

Endorsement: STEM

This college level course prepares students to take the Advanced Placement Physics 2 exam for possible college credit. AP Physics 2 is an algebra-based, introductory college-level physics course. Students cultivate their understanding of physics through inquiry-based investigations as they explore these topics: fluids; thermodynamics; electrical force, field, and potential; electric circuits; magnetism and electromagnetic induction; geometric and physical optics; and quantum, atomic, and nuclear physics. This course requires that 25 percent of the instructional time will be spent in hands-on laboratory work, with an emphasis on inquiry-based investigations that provide students with opportunities to demonstrate the foundational physics principles and apply the science practices.

AP Physics C Mechanics – 3416

Credit: 1, Fall Semester

Prerequisite: Successful completion or concurrent enrollment in Calculus per College Board

Endorsement: STEM

This college level course prepares students to take the Advanced Placement Physics C: Mechanics exam for possible college credit. AP Physics C: Mechanics is equivalent to a one-semester, calculus-based, college-level physics course, especially appropriate for students planning to specialize or major in physical science or engineering. The course explores topics such as kinematics; Newton's laws of motion; work, energy and power; systems of particles and linear momentum; circular motion and rotation; and oscillations and gravitation.

Introductory differential and integral calculus is used throughout the course.

AP Physics C –Electricity/Magnetism -3417

Credit: 1, Spring Semester

Prerequisite: Successful completion or concurrent enrollment in Calculus per by College Board

Endorsement: STEM

This college level course prepares students to take the Advanced Placement Physics C: Electricity & Magnetism exam for possible college credit. AP Physics C: Electricity and Magnetism is a one-semester, calculus-based, college-level physics course, especially appropriate for students planning to specialize or major in physical science or engineering. The course explores topics such as electrostatics; conductors, capacitors, and dielectrics; electric circuits; magnetic fields; and electromagnetism. Introductory differential and integral calculus is used throughout the course.

SCIENCE ELECTIVES

Environmental Systems – 3308

Credit: 1, Full Year

Prerequisite: Completion of Science graduation sequence is recommended.

Endorsement: STEM

In Environmental Systems, students will conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Topics of study include: biotic and abiotic factors in habitats; ecosystems and biomes; interrelationships among resources and an environmental system; sources and flow of energy through an environmental system; relationship between carrying capacity and changes in populations and ecosystems; and changes in environments.

AP Environmental Science – 3306

Credit: 1, Full Year

Prerequisites: Successful completion of Algebra I, Pre-AP Biology or Biology, and Pre-AP Chemistry or Chemistry per College Board

Endorsement: STEM

This college level course prepares students to take the Advanced Placement Environmental Science exam for possible college credit. The AP Environmental Science course is designed to be the equivalent of a one-semester, introductory college course in environmental science, through which students engage with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world. The course requires that students identify and analyze natural and human-made environmental problems, evaluate the relative risks associated with these problems, and examine alternative solutions for resolving or preventing them. Environmental Science is interdisciplinary, embracing topics from geology, biology, environmental studies, environmental science, chemistry, and geography.

Anatomy and Physiology – 8408

Credit: 1, Full Year

Prerequisite: Completion of Biology and a second science course. Completion of a course from the Health Science Career Cluster prior to this course is recommended.

Endorsement: STEM, Public Services

The Anatomy and Physiology course is designed for students to conduct laboratory and field investigations, use scientific methods during investigations, and make informed decisions using critical thinking and scientific problem solving. Students in Anatomy and Physiology will study a variety of topics, including the structure and function of the human body and the interaction of body systems for maintaining homeostasis..

Engineering Design and Problem Solving – 9009

Grade: 11-12

Credit: 1, Full Year

Prerequisite: Algebra I and Geometry. Two Science, Technology, Engineering, and Mathematics (STEM) Career Cluster credits recommended.

Endorsement: STEM

The Engineering Design and Problem Solving course is the creative process of solving problems by identifying needs and then devising solutions. The solution may be a product, technique, structure, or process depending on the problem. Science aims to understand the natural world, while engineering seeks to shape this world to meet human needs and wants. Engineering design takes into consideration limiting factors or "design under constraint." Various engineering disciplines address a broad spectrum of design problems using specific concepts from the sciences and mathematics to derive a solution. The design process and problem solving are inherent to all engineering disciplines

GeoScience - University of Texas OnRamps Dual Enrollment – 3518

GEOL 302E

Credit: 1, Full Year

Prerequisite: Three units of science one of which may be taken concurrently that includes Biology and Chemistry. Three units of Math, one of which may be taken concurrently.

Endorsement: STEM

Earth, Wind, and Fire is a course in geoscience literacy. It covers the fundamentals of how the Earth works, and how it's various systems- the lithosphere, atmosphere, hydrosphere, and biosphere- interact to form the complex world in which we live. Geoscience is the study of the Earth. It is an integrated science, drawing on the fundamental principles of physics, chemistry, biology, and geosciences to explain Earth processes. This class introduces students to the major areas in geoscience, and helps to develop critical, creative, and geologic problem solving skills. Students can earn three hours of UT credit, with feedback and assessment provided by UT course staff. The dual-enrollment high school course will be Earth and Space Science.

Aquatic Science – 3468

Credit: 1, Full Year

Prerequisite: Biology required and suggested completion or concurrent enrollment in Chemistry is recommended; Completion of science graduation sequence recommended

Endorsement: STEM

In Aquatic Science, students study the interactions of biotic and abiotic components in aquatic environments, including impacts on aquatic systems. Investigations and fieldwork in this course may emphasize fresh water or marine aspects of aquatic science depending primarily upon the natural resources available for study near the school. Students who successfully complete Aquatic Science will acquire knowledge about a variety of aquatic systems, conduct investigations and observations of aquatic environments, work collaboratively with peers, and develop critical-thinking and problem-solving skills.

Astronomy – 3508

Credit 1, Full Year

Prerequisite: Completion of the recommended CISD Science Course Sequence

Endorsement: STEM

In Astronomy, students conduct field and laboratory investigations, use scientific methods, and make informed decisions using critical thinking and scientific problem solving. Students study the following topics: astronomy in civilization, patterns and objects in the sky, our place in space, the moon, reasons for the seasons, planets, the sun, stars, galaxies, cosmology, and space exploration. Students who successfully complete Astronomy will

acquire knowledge within a conceptual framework, conduct observations of the sky, work collaboratively, and develop critical-thinking skills.

Forensic Science – 9249

Credit: 1, Full Year

Prerequisite: Biology & Chemistry. Completion or concurrent enrollment in any Law, Public Safety, Corrections, and Security Career Cluster course is recommended.

Endorsement: STEM

Forensic Science is a course that introduces students to the application of science to connect a violation of law to a specific criminal, criminal act, or behavior and victim. Students will learn terminology and procedures related to the search and examination of physical evidence in criminal cases as they are performed in a typical crime laboratory. Using scientific methods, students will collect and analyze evidence such as fingerprints, bodily fluids, hair, fibers, paint, glass, and cartridge cases. Students will also learn the history and the legal aspects as they relate to each discipline of forensic science.

Social Studies

World Geography Studies – 4238

Credit: 1, Full Year

Prerequisite: None

Endorsement: Arts and Humanities

World Geography Studies includes instruction in examining people, places, and environments at local, regional, national, and international scales from the spatial and ecological perspectives of geography. Students describe the influence of geography on events on the past and present with emphasis on contemporary issues. Students use problem solving and decision making skills to ask and answer geographic questions and to analyze primary and secondary source materials.

Pre-AP World Geography Studies – 4237

Credit: 1, Full Year

Prerequisite: None

Endorsement: Arts and Humanities

Pre-AP serves as a foundation for Advanced Placement Social Studies Course. This course includes instruction in examining people, places, and environments at local, regional, national, and international scales from the spatial and ecological perspectives of geography. Students describe the influence of geography of events on the past and present with emphasis on contemporary issues. Students will be taught the skills and strategies needed for Advanced Placement courses. This course is part of the College Board Pre-AP Curriculum Pilot.

World History Studies – 4218

Credit: 1, Full Year

Prerequisite: World Geography Studies suggested

Endorsement: Arts and Humanities

World History Studies is a survey of the history of human kind. The major emphasis is on the study of significant people, events, and issues from earliest times to present western civilization as well as civilizations in other parts of the world. Students use historical inquiry to research and interpret both primary and secondary sources.

AP World History Studies – 4216

Credit: 1, Full Year

Prerequisite: World Geography Studies recommended

Endorsement: Arts and Humanities

This college level course prepares students to take the AP World History Studies exam for possible college credit. Emphasis will be placed on significant people, events, and issues from earliest times to present in civilizations around the world to understand evolving processes, and human contact

and interactions. Recognizing and understanding cause and effect relationships, multiple causation, trends, themes and interactions, and importance of both change and continuity in shaping human events will be stressed.

U.S. History Studies Since 1877 – 4358

Credit: 1, Full Year

Prerequisite: World History Studies recommended

U.S. History since Reconstruction focuses on the time period from 1877 to present day. The course content is based on the founding documents of the U.S. government, which provides a framework for its heritage. Historical content focuses on the political, economic and social issues related to industrialization and urbanization, major wars, domestic and foreign policies, and reform movements including civil rights. Students use critical thinking skills and a variety of primary and secondary source material to explain and apply different methods that historians use to understand and interpret the past, including multiple points of view and historical context. The dual credit course surveys the period from the first European explorations to present day.

AP U.S. History – 4356

Credit: 1, Full Year

Prerequisite: World History Studies recommended

This college level course prepares students to take the AP U.S. History exam for possible college credit. The class surveys the period from the first European explorations to the present stressing political institutions, behavior and public policy, social and economic change, diplomacy and international relations, and cultural and intellectual developments. Recognizing and understanding cause and effect relationships, multiple causation, trends, themes and interactions, and importance of both change and continuity in shaping human events will be stressed.

U.S. Government – 4408

Credit: ½, Semester

Prerequisite: U.S. History recommended

United States Government focuses on the principles, beliefs, structure, functions, and powers of government at national, state, and local levels. Emphasis will be placed on the U.S. Constitution, its underlying principles and ideas, and the form of government it created. The Federalist Papers, landmark cases and other significant primary and secondary sources will also be analyzed.

AP U.S. Government and Politics – 4406

Credit: ½, Semester

Prerequisite: U.S. History recommended

This college level course prepares students to take the AP U.S. Government and Politics exam for possible college credit. The class includes both the study of general concepts used to interpret U.S. politics and the analysis of specific examples. Students will evaluate general propositions about government and politics, analyze political relationships between people and institutions and between different institutions, and utilize basic data relevant to government and politics in sustained written arguments.

Economics – 4418

Credit: ½, Semester

Prerequisite: U.S. History recommended

Economics focuses on the Free Enterprise System and its benefits including principles of production, consumption, and distribution of goods and services. The student will research the problem of scarcity in the United States and a comparison with those in other countries around the world. Students apply critical thinking skills to create economic models and evaluate economic patterns.

AP Macroeconomics – 4416

Credit: ½, Semester

Prerequisite: U.S. History recommended

This college level course prepares students to take the AP Macroeconomics exam for possible college credit. Students will gain a thorough understanding of the principles of economics that apply to an economic system as a whole. Macroeconomics places emphasis on the study of national income and price determination and also develops students' familiarity with economic performance measures, economic growth, and international economics.

SOCIAL STUDIES ELECTIVES

AP Human Geography – 4246

Grade: 10-12

Credit: ½, Semester

Prerequisite: World Geography Studies recommended

Endorsement: Arts and Humanities

This college level course prepares students to take the AP Human Geography exam for possible college credit. This is a rigorous course that requires students to devote time to outside field trips, research projects and supplementary reading. Students will be introduced to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of the Earth's surface. Students employ spatial concepts and landscape analysis to analyze human social organization and its environmental consequences.

AP European History – 4296

Grade: 10-12

Credit: 1, Full Year

Prerequisite: None

Endorsement: Arts and Humanities

This college level course prepares students to take the AP European History exam for possible college credit. Focus will be placed on major events and trends from 1450 to the present covering themes of intellectual and cultural, political and diplomatic, and social and economic history of Europe. Recognizing and understanding cause and effect relationships, multiple causations and the importance of both change and continuity in shaping human events will be stressed.

Sociology - 4554

Grade: 10-12

Credit: ½, Semester

Prerequisite: None

Endorsement: Arts and Humanities

Sociology teaches dynamics and models of individual and group relationships by focusing on history and systems of sociology, cultural and social norms, social institutions, and mass communications. Emphasis is placed on methods of group influence on individual behavior and values.

Psychology - 4544

Grade: 10-12

Credit: ½, Semester

Prerequisite: None

Endorsement: Arts and Humanities

Psychology teaches theories of human development, motivation, brain development and learning. Students study the science of human behavior and mental processes. The study of psychology is based on an historical framework and relies on effective collection and analysis of data.

AP Psychology – 4546

Grade: 10-12

Credit: ½, Semester

Endorsement: Arts and Humanities

Psychology teaches theories of human development, motivation, brain development and learning. Students study the science of human behavior and mental processes. The study of

psychology is based on an historical framework and relies on effective collection and analysis of data.

Personal Financial Literacy - 4590

Credit: ½, **Semester** **Grade:** 10-12

This interactive and research-based course requires students to apply critical-thinking and problem-solving skills to analyze decisions involving earning and spending, saving and investing, credit and borrowing, insuring and protecting and college and post-secondary education and training. This course also includes instruction in methods of paying for college and other post-secondary education.

World Languages

World Languages I, II, III, IV, V

Credit: 1, **Full Year**

Prerequisite: None

Endorsement: *Arts and Humanities*

This course provides an introduction to the five C's: *communication* (speaking, listening, reading, writing), *culture* (understanding of the people, practices, products and perspectives), *connections* (with other subject areas), *comparisons* (own culture/language with another), and *communities* (using language beyond the school setting for personal and career development).

The following languages are offered:

All Dual Credit classes must follow dual credit process; TSI required for dual credit.

Spanish I – 1818
Spanish II – 1828
Pre-AP Spanish II – 1827
Spanish III – 1838
Pre-AP Spanish III – 1837
Spanish III Dual (SPAN 1411/SPAN 1412) - 1830
AP Spanish IV – 1846
Spanish IV Dual (SPAN 2311/SPAN 2312) - 1840
AP Spanish V - 1855

German I – 1918
German II – 1928
Pre-AP German II – 1927
Pre-AP German III – 1937
German III Dual (GERM 1411/GERM1412) – 1930
AP German IV – 1946
German IV Dual (GERM 2311/GERM 2312) – 1940

French I – 1718
French II – 1728
Pre-AP French II – 1727
Pre-AP French III – 1737
AP French IV – 1746

American Sign Language I – 1951
American Sign Language II – 1952
American Sign Language III -1953

Spanish for Spanish Speakers I, II – 1808, 1888

Credit: 2, **Full Year (student will earn one credit per semester class.)**

Prerequisite: *Successful completion of district matrix*

Endorsement: *Arts and Humanities*

Spanish for Spanish Speakers is a course designed for students who are heritage Spanish speakers but have never studied Spanish in a classroom setting. Students will further explore the five C's *communication* (speaking, listening, reading, writing), *culture* (understanding of the people, practices, products and

perspectives), *connections* (with other subject areas), *comparisons* (own culture/language with another), and *communities* (using language beyond the school setting for personal and career development) at the advanced proficiency level. Students will extend learning to include literature in a variety of genres. In addition, students will develop a deeper knowledge base in advanced grammar and vocabulary to allow for more complex and fluent communication, both oral and written, in a real world setting.

Fine Arts

VISUAL ARTS

Art I - 6014

Credit: 1, **Full Year**

Prerequisite: None

Endorsement: *Arts and Humanities*

***Art fees are assessed**

Students may fulfill fine arts or elective requirements for graduation by successfully completing this course. Beginning art encompasses a wide variety of experiences, from elements and principles of art to art history. Students are exposed to a variety of media both two and three dimensional; pencil, ink, charcoal, pastel, tempera, watercolor, clay, and printmaking. Some media may vary. The goal is for students to gain an understanding and appreciation of art.

Art and Media Communications I – 6404

Credit: 1, **Full Year**

Prerequisite: None

Endorsement: *Arts and Humanities*

***Art fees are assessed**

Art and Media Communications combines rigorous and relevant experiential study of modern, post-modern, and contemporary visual art and design with student learning in media literacy and technology applications. Creation and analysis of student artworks will be balanced with explorations into contemporary practices across the visual and commercial arts fields. Students will learn how to bridge traditional hand skills with current technology applications to create new media such as animations, digital images, multimedia presentation, digital video, websites, and interactive or site-based installations and performances. Students work will culminate in a capstone project that investigate an issue relevant to the student and uses art, design, and visual communications to address a problem within the community or effect a change.

Art and Media Communications II – 6405

Credit: 1, **Full Year**

Prerequisite: None

Endorsement: *Arts and Humanities*

***Art fees are assessed**

Art and Media Communications combines rigorous and relevant experiential study of modern, post-modern, and contemporary visual art and design with student learning in media literacy and technology applications. Creation and analysis of student artworks will be balanced with explorations into contemporary practices across the visual and commercial arts fields. Students will learn how to bridge traditional hand skills with current technology applications to create new media such as animations, digital images, multimedia presentation, digital video, websites, and interactive or site-based installations and performances. Students work will culminate in a capstone project that investigate an issue relevant to the student and uses art, design, and visual communications to address a problem within the community or effect a change.

Art II Drawing I – 6024

Credit: 1, **Full Year**

Prerequisite: Art I

Endorsement: Arts and Humanities

***Art fees are assessed**

Students will express ideas through original artworks, using a variety of drawing media. They will be able to apply design skills in creating practical applications. The students will study historical periods, as well as critique artwork.

Art II Ceramics I - 6054

Credit: 1, Full Year

Prerequisite: Art I

Endorsement: Arts and Humanities

***Art fees are assessed**

Students may fulfill fine arts or elective requirements for graduation by successfully completing this course. This class is designed for students who have an interest in working with clay, and gives students experiences in making functional as well as sculptural pieces, using a variety of techniques. Well thought out forms, designs, and functional uses along with good craftsmanship are emphasized.

Art II Painting I – 6034

Credit: 1, Full Year

Prerequisite: Art I

Endorsement: Arts and Humanities

***Art fees are assessed**

Students will express ideas through original artworks, using a variety of painting media. They will be able to express their thoughts and ideas creatively, while challenging their imagination. Students will study historical periods, as well as critique artwork.

Art II Printmaking I – 6074

Credit: 1, Full Year

Prerequisite: Completion of the previous year course

Endorsement: Arts and Humanities

This course introduces students to the production of multiple images from a single design. Emphasis is on design and creative use of the materials and techniques of the relief, mono-print, and silkscreen printing processes.

Art II Sculpture I – 6064

Credit: 1, Full Year

Prerequisite: Art I

Endorsement: Arts and Humanities

***Art fees are assessed**

Sculpture class concentrates on the study of three dimensional materials and concepts. Students will explore different forms of sculpture such as modeling, carving and assembly. Projects stress skill development and creative interpretations. Students will be able to apply design skills in creating practical applications. The student will study historical periods, as well as critique artwork.

AP Art History – 6096

Credit: 1, Full Year

Prerequisite: None

Endorsement: Arts and Humanities

This reading intensive course introduces students to the understanding, appreciation, and enjoyment of works of art. Students will be exposed to a general survey of art history including architecture, sculpture, painting, and other art forms within historical and cultural contexts. Students will examine major forms of artistic expression from the past to the present, as well as from a variety of cultures beyond the European tradition. While visual analysis is a fundamental tool of the art historian, art history emphasizes understanding how and why works of art function in context, considering such issues as patronage, gender, and the functions and effects of works of art. Some content may be of mature nature.

AP Studio Art Drawing – 6426

Credit: 1, Full Year

Suggested Prerequisite: Art I & Art II and portfolio review by the teacher.

Endorsement: Arts and Humanities

***Art fees are assessed**

This college level course offers a rigorous and accelerated curriculum that **requires** students to submit portfolios for the AP Art Exam for possible college credit. Critical and creative thinking skills are developed through the production and critical analysis of 2-D Art. Students self-determine appropriate directions in which to develop artistic themes and media.

AP Studio Art Two-Dimensional Design – 6436

Credit: 1, Full Year

Suggested Prerequisite: Art I & Art II and portfolio review by the teacher.

Endorsement: Arts and Humanities

***Art fees are assessed**

AP 2-D Design addresses two-dimensional design issues. Design involves purposeful decision-making about how to use the elements and principles of art in an integrative way through various techniques and media. This college level course offers a rigorous and accelerated curriculum that requires students to submit portfolios for the AP Art Exam for possible college credit.

AP Portfolio Art Three-Dimensional Design - 6446

Credit: 1, Full Year

Pre-requisite: Art I and Art II Sculpture/Ceramics recommended

Endorsement: Arts and Humanities

***Art fees are assessed**

The AP Studio Art course is designed to allow students to create a collection of works that show an investigation of the three aspects of the AP Portfolio. Students will exhibit a mastery of concepts, techniques, and ideas used to develop their portfolio. The three sections of the portfolio are Concentration, Breadth, and Quality. This college level course offers a rigorous and accelerated curriculum that **requires** students to submit portfolios for the AP Art Exam for possible college credit.

Art III Drawing II - 6214

Credit: 1, Full Year

Prerequisite: Art II in corresponding discipline and teacher approval

Endorsement: Arts and Humanities

***Art fees are assessed**

Students will express ideas through original artworks, using a variety of drawing media. They will be able to apply design skills in creating practical applications. Students will study historical periods, as well as critique artwork.

Art III Ceramics II -6244

Credit: 1, Full Year

Prerequisite: Art II in corresponding discipline and teacher approval

Endorsement: Arts and Humanities

***Art fees are assessed**

At advanced levels of ceramic studies, students will work with materials, techniques, and concepts to generate their own personal designs. Students will be required to research and develop their ideas in and out of the ceramic lab. Students will pursue new directions with approval and guidance from the instructor. Emphasis may be on the exploration of clay as a sculptural medium, the business strategies behind the process of production pottery, independent study, and mastery of clay studio processes.

Art III Painting II - 6224

Credit: 1, Full Year

Prerequisite: Art II in corresponding discipline and teacher approval

Endorsement: Arts and Humanities

***Art fees are assessed**

Students will express ideas through original artworks, using a variety of painting media. They will be able to express

their thoughts and ideas creatively, while challenging their imagination. Students will study historical periods, as well as critique artwork.

Art III Sculpture II - 6254

Credit: 1, Full Year

Prerequisite: Art II in corresponding discipline, and teacher approval

Endorsement: Arts and Humanities

***Art fees are assessed**

Students will express ideas through original artworks, using a variety of 3-D media. Students will explore different forms of sculpture such as modeling, carving and assembly. Projects stress skill development and creative interpretations. Independent projects and advanced creativity skills are required. They will be able to apply design skills in creating practical applications. Students will study historical periods, as well as critique artwork.

Art III Printmaking II - 6234

Credit: 1, Full Year

Prerequisite: Completion of the previous year course

Endorsement: Arts and Humanities

This course introduces students to the production of multiple images from a single design. Emphasis is on design and creative use of the materials and techniques of the relief, mono-print, and silkscreen printing processes.

Art IV Drawing III - 6334

Credit: 1, Full Year

Prerequisite: Art III in corresponding discipline and teacher approval

Endorsement: Arts and Humanities

***Art fees are assessed**

Students produce artwork of their choice based on the focus of study in Art II and III. Students prepare a portfolio, present an exhibition of work, and set up exhibits of other artists' work. Students provide materials for some of the projects.

Art IV Ceramics III – 6364

Credit: 1, Full Year

Prerequisite: Art III in corresponding discipline and teacher approval

Endorsement: Arts and Humanities

***Art fees are assessed**

Students will explore the elements and principles of design in three-dimensional representational and non-representational areas in the production of ceramic works. Students will learn hand-building techniques, such as coiling and slab building. The building of ceramic vocabulary, history, and development of works will be emphasized. Students must develop an understanding of positive and negative space, emphasizing additive and subtractive processes. Students need to understand how ceramic design takes shape and the importance of the craft.

Art IV Painting III - 6344

Credit: 1, Full Year

Prerequisite: Art III in corresponding discipline and teacher approval

Endorsement: Arts and Humanities

***Art fees are assessed**

Students produce artwork of their choice based on the focus of study in Art II and III. Students prepare a portfolio, present an exhibition of work, and set up exhibits of other artists' work. Students provide materials for some of the projects.

Art IV Sculpture III - 6374

Credit: 1, Full Year

Prerequisite: Art III in corresponding discipline and teacher approval

Endorsement: Arts and Humanities

***Art fees are assessed**

Updated: 01/07/2019

Sculpture class concentrates on the advanced study of three dimensional materials and concepts. Students will explore different forms of sculpture such as modeling, carving and assembly. Projects stress skill development and creative interpretations. Independent projects and advanced creativity skills are required. Students prepare a portfolio, present an exhibition of work, and set up exhibits of other artists' work. Students provide materials for some of the projects.

Art IV Printmaking III - 6354

Credit: 1, Full Year

Prerequisite: Completion of the previous year course

Endorsement: Arts and Humanities

This course introduces students to the production of multiple images from a single design. Emphasis is on design and creative use of the materials and techniques of the relief, monoprint, and silkscreen printing processes.

Floral Design – 8674

Grade: 10-12

Credit: 1, Full Year

Prerequisite: None

This course is designed to develop skills in the design and arrangement of flowers, foliage, and related plant materials for interior locations. Students will create floral arrangements.

This course will satisfy the Fine Arts credit.

THEATRE ARTS

Theatre Arts I – 6114

Credit: 1, Full Year

Prerequisite: None

Endorsement: Arts and Humanities

This course will focus on performance. Special emphasis will be given to character development, voice, diction, and body control. This course will begin the study of theatre history and acting styles. Directing will be studied. All aspects of production from a technical standpoint (set design, lights, sounds and etc.) will be explored. This course requires extended rehearsals with some after school, nights and weekends.

Technical Theatre I – 6164

Credit: 1, Full Year

Prerequisite: None

Endorsement: Arts and Humanities

Students may fulfill an elective requirement for graduation by successfully completing this course. Technical Theatre includes a study of stage design, publicity, lighting, sound and other aspects of theatrical production in conjunction with actual stage production. Theatre history and careers in theatre will also be discussed.

Theatre and Media Communications I – 6654

Credit: 1, Full Year

Endorsement: Arts and Humanities

This course provides students with a rigorous and relevant experiential study of theater along with video and audio design. Creation and analysis of student performance will be balanced with explorations into contemporary practices in digital media. Students will learn how to bridge traditional stagecraft with current technology applications to create new media, such as animations, digital images, multimedia presentations, digital videos, websites, and interactive performances. Furthermore, student work will culminate in a capstone project that investigates an issue relevant to the student and uses a digital stage to address a problem within the community or to affect a change. This project will afford students an opportunity to learn and practice creative research skills, develop a narrative, engage an audience, and connect on online community to their project.

Theatre Production I – 6184

Credit: 1, Full Year

Prerequisite: Audition and teacher approval

Endorsement: Arts and Humanities

All aspects of production will be explored – set design, lights, and sound and theatre history. Special emphasis will be given to character development, voice, and diction and body control. This course requires after-school rehearsals and performance times, focusing on fall and spring show productions. Students must be willing to participate both as actors and crewmembers and are subject to auditions for role and crewmember assignments.

Musical Theatre I, II, III, IV – 6115, 6125, 6135, 6145**Credit: 1, Full Year****Prerequisite: None****Endorsement: Arts and Humanities**

This course will expose students to a wide range of on-stage performance discipline, including acting performance, vocal performance, and dance performance. The course will also provide an atmosphere in which students benefit from a teaching and learning experience in these performance disciplines of musical theatre. A Supply fee may be required.

COURSE NOTE: Students will need to have genuine interest in the study and performance of Broadway style musicals.

Theatre Arts II, III, IV – 6124, 6134, 6144**Credit: 1, Full Year****Prerequisite: Completion of previous year course****Endorsement: Arts and Humanities**

This course will focus on performance. Special emphasis will be given to character development, voice, diction, and body control. This course will begin the study of theatre history and acting styles. Directing will be studied. All aspects of production from a technical standpoint (set design, lights, sounds and etc.) will be explored. This course requires extended rehearsals with some after school, nights and weekends.

Technical Theatre II, III, IV – 6174, 6194, 6314**Credit: 1, Full Year****Prerequisite: Completion of previous year course****Endorsement: Arts and Humanities**

Technical Theatre includes a study of stage design, publicity, lighting, sound and other aspects of theatrical production in conjunction with actual stage production. Theatre history and careers in theatre will also be discussed.

Theatre and Media Communications II – 6664**Credit: 1, Full Year****Prerequisite: Theatre and Media Communications I/Teacher approval recommended****Endorsement: Arts and Humanities**

This course builds on the foundational theatre and technology skills taught in the Theatre and Media Communications I survey course and provides opportunities for students to apply and synthesize knowledge and skills through relevant, real-world projects. Students will explore theatre-related technical professions and components of media production. The course provides hands-on, experiential learning in theatre, including acting, directing, and design integrated with instruction focused on technology applications, media literacy, and 21st century skills. A key focus of the course is on ways to bridge traditional stagecraft with current technology applications to create new media such as animations, digital images, multimedia presentation, digital video, websites, and interactive performances. Students will also develop a deeper understanding of self along with a broader worldview by creating, performing, analyzing, and critiquing dramatic works. Students in this course will document their work during the course in a professional-level digital portfolio. Supply Fee May Be Required.

Theatre Production II, III, IV – 6154, 6284, 6294**Credit: 1, Full Year****Prerequisite: Completion of previous year course, audition and teacher approval****Endorsement: Arts and Humanities**

All aspects of production will be explored – set design, lights, and sound and theatre history. Special emphasis will be given to character development, voice, and diction and body control. This course requires after-school rehearsals and performance times, focusing on fall and spring show productions. Students must be willing to participate both as actors and crewmembers and are subject to auditions for role and crewmember assignments.

DANCE**Principles of Dance I – 6954****Dance PE – 6956 (Students needing PE credit will be scheduled during zero hour in year I.)****Credit: 1, Full Year****Endorsement: Arts and Humanities**

This course is an introduction to all basic dance techniques (tap, ballet, jazz, modern, contemporary and world dance) including vocabulary and principles of all dance forms. Supply fee may be required. Students may earn up to one P.E. and/or Fine Arts credit.

Principles of Dance II, III, IV – 6964, 6974, 6984**Credit: 1, Full Year****Prerequisite: Completion of previous level dance course****Endorsement: Arts and Humanities**

This course further extends skills and concepts introduced in Dance I. Group and individual projects through choreography and research are introduced. Supply fee may be required. Students may earn up to one P.E. and/or Fine Arts credit.

Aerobic Dance I-IV – 6929, 6939, 6949, 6959**Dance PE – 6956 (Students needing PE credit will be scheduled during zero hour in year I.)****Credit: 1, Full Year****Prerequisite: None**

Vocabulary of dance movement and knowledge of factors that influence movement will be further explored. Creative expression through choreography opportunities will be introduced. Development of sensitivity to tempo, spatial concepts and floor patterns and an increased ability to perform technical skills in dance will be pursued. Audition procedures for performance will be introduced. The student will begin the performance phase at this level.

Varsity Team I-IV – 6927, 6937, 6947, 6957**Credit: 1, Full Year****Prerequisite: None****Drill Team – 7524 (Year I only so student receives both FA and PE credit.)**

Vocabulary of dance movement and knowledge of factors that influence movement will be further explored. Creative expression through choreography opportunities will be introduced. Development of sensitivity to tempo, spatial concepts and floor patterns and an increased ability to perform technical skills in dance will be pursued. Audition procedures for performance will be introduced. The student will begin the performance phase at this level.

JV Team I-IV – 6955, 6965, 6975, 6985**Credit: 1, Full Year****Prerequisite: Completion of Principles of Dance****Drill Team – 7524 (Year I only so student receives both FA and PE credit.)**

Vocabulary of dance movement and knowledge of factors that influence movement will be further explored. Creative expression through choreography opportunities will be introduced. Development of sensitivity to tempo, spatial concepts and floor patterns and an increased ability to

perform technical skills in dance will be pursued. Audition procedures for performance will be introduced. The student will begin the performance phase at this level.

BAND

Band I - IV

Course Note: Supply fees required

Marching Band I – IV - 6614, 6624, 6811, 6812

Credit: ½, Semester

Prerequisite: Middle school band or teacher approval. Counts as a .5 P.E. equivalent

Endorsement: Arts and Humanities

The Marching Band performs at all appropriate football games and pep rallies. The group also participates in all UIL related contests and others contests during the semester that prove beneficial to the program. Students enrolled in Marching Band must also enroll in Concert Band or Symphonic Band. Fine Arts or physical education credit may be earned. A student must take 2 semesters of Marching Band to equal 1 physical education credit. Students may earn up to one full P.E. credit.

Concert Band I – IV - 6714, 6724, 6734, 6744

Credit: 1, Full Year

Prerequisite: Placement by audition. Concert Band I - Teacher approval recommended; Concert Band II-IV requires completion of previous year course

Band is offered for brass, woodwind, and percussion students in grades 9 - 12 with prior band experience at the middle school level. Band includes concert band activities such as public concerts, UIL contests, and individual TMEA audition opportunities. Marching band involvement is required of all CHS band students during the fall semester, and includes football game performances, pep rallies, and contest opportunities. Placement in concert and marching band is by audition into ability-based ensembles.

Color Guard I - IV – 6749,6759,6769,6779

Credit: 1, Full Year Dance Credit

Prerequisite: Teacher approval and Tryouts

Endorsement: Arts and Humanities

Color Guard is open to students that want to learn the technical skills involved in expressive dance, flag, rifle, and saber choreography, as they relate to the State Goals for Learning in Fine Arts. The course will prepare students for color guard performances with the marching band during the fall semester. Various styles of dance will be taught and explored, in addition to traditional color guard training techniques.

Jazz Ensemble I - IV – 6815, 6825, 6835, 6845

Credit: 1, Full Year

Prerequisite: Jazz Ensemble I-none/ Teacher approval recommended; Jazz Ensemble II-IV requires completion of previous year course

Endorsement: Arts and Humanities

Jazz Ensemble is offered as an additional musical opportunity for students that perform on an instrument within the standard jazz instrumentation (saxophone, trumpet, trombone, or rhythm section). Students must also be enrolled in the traditional Band program. Performance opportunities may include concerts, community events, and jazz festivals. Supply fee may be required.

Applied Music I - IV (Band) - 6914, 6915, 6916, 6917

Credit: 1, Full Year

Prerequisite: Applied Music I- None/Teacher approval recommended; Applied Music II-IV requires completion of previous year course

Applied Music is offered for students that would like an additional music course to receive advanced study on their instrument. Enrollment in the traditional band program is a prerequisite. Students will have the opportunity to receive

individual instruction and feedback on solo literature including UIL and TMEA contest materials, plus have the opportunity to explore literature and theory in greater depth than is available in the traditional band rehearsal. Supply fee may be required.

Instrumental Ensemble I - IV – 6754, 6764, 6774, 6784

Credit: 1, Full Year

Prerequisite: Instrumental Ensemble I-none/ Teacher approval recommended; Instrumental Ensemble II-IV requires completion of previous year course

This is an ensemble for band students needing remediation of technical skills, or for students that have started band later than other students and need basic instruction. Supply fee may be required.

Advanced Placement (AP) Music Theory - 6926

Credit: 1, Full Year

Prerequisite: None (The student's ability to read and write musical notation is fundamental to AP Music Theory. It is also strongly recommended that the student will have acquired at least basic performance skills in voice or on an instrument prior to taking this course. -The College Board)

Endorsement: Arts and Humanities

This course will study the fundamentals of music construction, composition, and ear training in preparation for the AP Music Theory examination. This course is designed for students that intend to pursue music at the University Level.

Piano I – IV - 6804, 6824, 6834, 6844

Credit: 1, Full Year

Prerequisite: None

Endorsement: Arts and Humanities

Open to students in grades 9-12, the course fulfills a fine arts or an elective requirement for graduation. The course teaches music reading, theory, and beginning piano skills to persons with no (or limited) music reading ability. Students will use electric keyboards and headphones to work individually, in pairs, and in small groups to practice keyboard fluency. Participation in one concert per semester is required.

Piano I - IV (Accelerated) – 6874, 6875, 6876 ,6877

Credit: 1, Full Year

Prerequisite: Teacher approval recommended

Endorsement: Arts and Humanities

Open, with teacher approval, to students with previous music study, band, or advanced choir. Students will use electric keyboards and headphones to work individually, in pairs, and in small groups to develop keyboard fluency. Participation in one concert per semester is required. The course will move at a faster pace and cover more material than the regular Piano I class.

Orchestra I - IV– 6884, 6894, 6895, 6896

Credit: 1, Full Year

Prerequisite: Previous instruction is required.

Orchestra I is open to all students who play an orchestral string instrument (violin viola, cello, bass). Orchestra provides an academic opportunity for participation in instrumental ensemble playing. Special attention is given to forming proper habits regarding ensemble routine, resonant tone production, intonation, rhythm, critical listening, instrumental technique and musical interpretation through skill study and participation. Orchestra offers students the opportunity to study and perform a variety of musical literature of accepted value at an appropriate level of difficulty. Student participation in orchestral events outside the school day such as concerts and rehearsals will be expected. This course is open to grades nine through twelve.

CHORAL MUSIC

Vocal Ensemble I – IV - 6414, 6424, 6434, 6444

Credit: 1, Full Year

Prerequisite: Vocal Ensemble I- none; Vocal Ensemble II-IV requires completion of previous year course

Endorsement: Arts and Humanities

Students may fulfill an elective requirement for graduation by successfully completing this course. This course consists of developing choirs that emphasize sight-reading, basic music skills, vocal development, vocal blending, and music theory. Many performance and contest opportunities are available. Previous choral experience is not necessary.

Mixed Choir I – IV - 6514, 6524, 6534, 6544

Credit: 1, Full Year

Prerequisite: Mixed Choir II-IV requires completion of previous year course

Endorsement: Arts and Humanities

The Mixed Choir is an audition only choir for all men in grades 9-12 and for women in grades 10-12. These courses are advanced levels continuing the four strands – perception, creative expression/performance, historical and cultural heritage and critical evaluation. They provide broad, unifying structures for organizing the knowledge and skills. Four major public performances are given each year, two per semester. Students also participate in TMEA Region Auditions, UIL Solo and Ensemble events, as well as UIL Concert and Sight Reading events. This has potential to advance to the state level.

JV Treble Choir I – IV - 6554, 6564, 6574, 6584

Credit: 1, Full Year

Prerequisite: Teacher approval

Endorsement: Arts and Humanities

Students may fulfill an elective requirement for graduation by successfully completing this course. These courses present four basic strands – perception, creative expression/performance, historical and cultural heritage, and critical evaluation. They provide broad, unifying structures for organizing the knowledge and skills. Students are required to perform in four concerts throughout the year, two per semester. Through creative performance, students apply the technical skills of music.

Varsity Treble Choir II –IV - 6454, 6464, 6474

Credit: 1, Full Year

Prerequisite: Teacher Approval

Endorsement: Arts and Humanities

Students may fulfill an elective requirement for graduation by successfully completing this course. These courses are advanced levels of the four strands – perception, creative expression/performance, historical and cultural heritage, and critical evaluation. They provide broad, unifying structures for organizing the knowledge and skills. Students are required to perform in four concerts throughout the year, two per semester. Through creative performance, students apply the technical skills of music. Students are expected to participate in TMEA Region Auditions, UIL Solo and Ensemble events, as well as UIL Concert and Sight Reading events.

Tenor Bass Choir I – IV - 6484, 6485, 6486, 6487

Credit: 1, Full Year

Prerequisite: Levels II – IV requires completion of the previous year.

Endorsement: Arts and Humanities

Students may fulfill an elective requirement for graduation by successfully completing this course. This course consists of developing choirs that emphasize sight-reading, basic music skills, vocal development, vocal blending, and music theory. Many performance and contest opportunities are available. Previous choral experience is not necessary. Students are required to perform in four concerts throughout the year, two per semester.

Physical Education/Athletics and Health

All HS Students are required to take ONE credit of Physical Education.

- A **Student** who is **unable** to comply with all the requirements of a PE course because of a **physical limitation** (as certified by a licensed medical practitioner) is not prohibited from earning a diploma because a modification was made to his/her PE course. All PE education classes are adapted to fit the needs of students with special needs.
- **PE Substitution Courses** may be permitted in any of the following earning up to **one credit**.
 - Drill Team
 - Marching Band
 - JROTC
 - Cheerleading
 - Fall Semester of Color Guard

***Note: State law requires any student who is taking a PE. Course or class that substitutes for P.E., participate in annual fitness testing.**

- **PE Substitution Courses** may be permitted in any of the following earning up to **four credits**.
 - Athletics/UIL Athletics
 - Approved private program (must be pre-approved by the Coordinator of PE)

Intro to Fitness & Wellness – 7104 (Foundations of Personal Fitness)

Credit: 1.0

Prerequisite: None

Intro to Fitness & Wellness will motivate students to strive for lifetime personal fitness with an emphasis on the health-related components of physical fitness. All of the TEKS for Foundations of Personal Fitness and Health will be addressed. Students will, in most instances, participate in the activity part of the class every

other week for a total of 225 minutes every two-week period. This component of the class will include cooperative and team building physical activities that impact cardiovascular health, muscular strength and endurance, and flexibility. Students will learn how to assess their own health and fitness levels, and based on that knowledge, they will be able to design and maintain their own personal nutrition and fitness program. The classroom component includes studies on Emotional & Mental Health, Nutrition & Physical Activity; Abstinence, Personal & Sexual Health; HIV, STD, & Pregnancy Prevention; Tobacco, Alcohol, & Other Drug Prevention, and Violence & Injury Prevention.

PhysEd Fit I - 7014 (Aerobic Activities)

Credit: 1.0

Prerequisite: None

PhysEd Fit is designed to teach sustainable fitness through core strength and conditioning, regardless of fitness level, body composition, or athletic ability. Using basic body-weight movements, the fun of sport and game, and accountability through journaling, students advance through levels that increase in intensity and encourage camaraderie and competition amongst peers to motivate students to unparalleled fitness. Journals help students to track their performance during the workouts, set goals, and complete written assignments, which shall include student's observations on nutrition, sleep, recovery, and values related to sports. Students in this course will compete in an end of semester ComalPhysEd games with PhysEd Fit students from other CISD high schools.

Olympic Weight-Lifting - 7024 (Team and Individual Sports)

Credit: 1.0

Prerequisite: None

Olympic Weightlifting is designed for the beginning or novice weight lifter, or for those who have experience lifting but lack proper technique. Students will gain an understanding of the biomechanics, muscles used for a given exercise, and complete technical progressions of all of the Olympic Weightlifting movements and program development. Individual fitness levels are assessed four times throughout the semester and structured workouts are organized giving students the opportunity to earn award shirts and achieve personal best on a given lift. Students will be taught by a teacher certified in weightlifting.

Adventure/Outdoor Education I - 7004

Credit: 1.0

Prerequisite: None

This course provides an introduction to a variety of lifetime outdoor activities including archery, camping, backpacking, survival techniques, firearm safety, fishing, rock climbing, canoeing/kayaking, cycling, orienteering, and ropes course. Students will receive several opportunities to achieve certifications including CPR/First Aid certification. This course will include a fall field trip to the Seguin Outdoor learning center and a spring field trip to TBarM to apply skills learned.

Olympic Caliber Off Campus Physical Education I, II, III – 7544, 7545, 7546

Credit: 1.0

Grades: 9-12

Prerequisite: None

The purpose of this program is to accommodate students who are making a serious effort to develop high level capabilities and to allow them to be involved in an off-campus program that provides training exceeding that offered in the school district. Beginning with the 2016-2017 school year, all private or commercially-sponsored physical activity programs used by CISD students to satisfy their Physical Education requirement under this option have to be registered with the Texas Education Agency. The state requirements for Olympic-level participation and/or competition includes a minimum of 15 hours per week of highly intensive, professional, supervised training. The training facility, instructors, and the activities

involved in the program must be certified by the superintendent to be of exceptional quality. Students qualifying and participating at this level may be dismissed from school one hour per day from no other class than physical education. All information/applications can be found on the CISD Physical Education webpage (www.comalisd.org→Departments→Curriculum→PE and Health)

Swimming

Year 1 - 7264, Year 2 - 7265, Year 3 - 7266, Year 4 - 7267

Credit: 1, Full Year

Prerequisite: Teacher approval

Swimming provides students the opportunity to participate in competition.

Track

Year 1 - 7494, Year 2 - 7495, Year 3 - 7496, Year 4 - 7497

Credit: 1, Full Year

Prerequisite: Teacher approval

Students receive extensive training in the development of track and field techniques.

Cross Country

Year 1 - 7484, Year 2 - 7485, Year 3 - 7486, Year 4 - 7487

Credit: 1, Full Year

Prerequisite: Teacher approval

Students receive extensive training in the development of track and field techniques. The course focuses mainly on the development of long-distance running.

Developmental Tennis - 7424

Credit: 1, Full Year

Prerequisite: Teacher approval

Developmental tennis is designed for ninth grade students who wish to participate in UIL competition and would like to learn and improve their tennis skills. This program is organized to provide students an opportunity to express themselves in competition. The course is an extension of the physical education program.

Tennis

Year 2 - 7434, Year 3 - 7435, Year 4 - 7436

Credit: 1, Full Year

Prerequisite: Teacher approval

This course is designed to improve stroke production and selection for competitive play. The UIL Athletic program is an extension of the physical education program. The program is organized to provide students an opportunity to express themselves in interschool competition.

Golf

Year 1 - 7144, Year 2 - 7145, Year 3 - 7146, Year 4 - 7147

Credit: 1, Full Year

Prerequisite: Teacher approval

Golf is an extension of the Physical Education program and is designed so that an individual can become proficient in the skills and strategy of golf. This course is organized to provide students an opportunity to express themselves in UIL competition.

Basketball - Boys

Year 1 - 7344, Year 2 - 7354, Year 3 - 7355, Year 4 - 7356

Credit: 1, Full Year

Prerequisite: Teacher approval

This course focuses on the basic fundamentals of basketball – shooting, dribbling, rebounding, and defense as well as competitive team play, team offense and defense and strategy. Another part of this course will be weight lifting and conditioning.

Football

Year 1 - 7304, Year 2 - 7394, Year 3 - 7395, Year 4 - 7404

Credit: 1, Full Year

Prerequisite: Teacher approval

The UIL Boys Athletic program is an extension of the physical education program. The program is organized to provide students an opportunity to express themselves in interschool competition. During the off-season students participate in weight lifting, running, agility, and techniques.

Baseball – Boys

Year 1 - 7324, Year 2 - 7325, Year 3 - 7326, Year 4 - 7327

Credit: 1, Full Year

Prerequisite: Teacher approval

Students in this course are involved in weight training, conditioning, and baseball fundamentals. During the off-season players participate in conditioning activities.

Soccer – Boys

Year 1 - 7464, Year 2 - 7465, Year 3 - 7466, Year 4 - 7467

Credit: 1, Full Year

Prerequisite: Teacher approval

Soccer is designed to allow those students who are physically adapted to the game to extend their skills. This course is a component of the physical education program.

Volleyball – Girls

Year 1 - 7364, Year 2 - 7444, Year 3 - 7445, Year 4 - 7446

Credit: 1, Full Year

Prerequisite: Teacher approval

The UIL Girl's Athletic program is an extension of the physical education program. The program is organized to provide students an opportunity to express themselves in interschool competition.

Basketball - Girls

Year 1 - 7374, Year 2 - 7454, Year 3 - 7455, Year 4 - 7456

Credit: 1, Full Year

Prerequisite: Teacher approval

This course prepares girls for competitive basketball. Participants work to develop fundamentals of dribbling, passing, shooting, and defense. During the off-season students participate in conditioning activities.

Softball-Girls

Year 1 - 7723, Year 2 - 7724, Year 3 - 7725, Year 4 - 7726

Credit: 1, Full Year

Prerequisite: Teacher approval

The students are involved in weight training, conditioning, and softball fundamentals.

Soccer – Girls

Year 1 - 7474, Year 2 - 7475, Year 3 - 7476, Year 4 - 7477

Credit: 1, Full Year

Prerequisite: Teacher approval

Soccer is designed to allow those students who are physically adapted to the game to extend their skills. This course is a component of the physical education program.

Wrestling

Year 1 -7044, Year 2 -7045, Year 3 -7046, Year 4 - 7047

Credit: 1, Full Year

Earn your Athletic PE Credit by joining the wrestling team. Wrestling, noted as the oldest known sport in the world, is both physically and mentally demanding. If you enjoy a great workout, wrestling may be for you. Canyon High School competes in both boys and girls wrestling District 14 of the UIL. The season usually runs from Mid-October with before and after school practice to Mid-February with the UIL State Meet. Wrestling class meets at first block. Practices may begin as early as 6:45am beginning in October.

Cheerleading – 7534, 7535, 7536, 7537

Updated: 01/07/2019

Credit: 1, Full Year

Prerequisite: Elected positions by tryouts

Cheerleading consists of instruction in basic movement and voice activities involved in promoting spirit. Other activities include preparation for half-time shows, parades, pep rallies and other spirit activities. Cheerleading is an extension of the physical education program and requires athletic ability. Students may earn up to one full P.E. credit.

ROTC

AFJROTC I – 9914

Credit: 1, Full Year

Prerequisite: None

Endorsement: Public Services

Aerospace Science I - A Journey into Aviation History is a course focusing on the development of flight throughout the centuries. It starts with ancient civilizations, and then progresses through time to modern day. The emphasis is on civilian and military contributions to aviation; the development, modernization, and transformation of the Air Force; and a brief astronomical and space exploration history. It is interspersed with concise overviews of the principles of flight to include basic aeronautics, aircraft motion and control, flight power, and rockets.

Leadership Education I - Traditions, Wellness, and Foundations of Citizenship is the first component of Junior Reserve Officers Training Corps (JROTC) leadership education. It is intended for students who are entering the JROTC program and beginning their high school studies. You will be introduced to the history, organization, mission, goals, and objectives of JROTC for the Air Force, Army, Navy, Marine Corps, and Coast Guard. You will learn how the military uniform embodies a tradition of proper grooming and uniform wear for today's male and female cadets. You'll look at key military customs and courtesies, and learn how to project the positive attitude and discipline expected of cadets and leaders by examining the principles and practice of ethics, values, and morals.

Cadet Health and Wellness Program (CHWP). The CHWP is an exercise program focused upon individual base line improvements with the goal of achieving a Presidential Physical Fitness standard calculated with age and gender. The goal of the CHWP is to motivate JROTC cadets to lead active, healthy lifestyles beyond program requirements and into their adult lives. Cadets will be given the opportunity to put into practice the wellness concepts Cadets will participate in the Physical Fitness Test in the Fall and Spring Semesters. The Physical Fitness Test recognizes students for their level of physical fitness in five activities: Curl-ups (or partial curl-ups), Shuttle run, Endurance run/walk, Push-ups, V-sit reach (or sit and reach).

AFJROTC II - 9924

Credit: 1, Full Year

Prerequisite: AFJROTC I

Endorsement: Public Services

Aerospace Science II - The Science of Flight: A Gateway to New Horizons is an introductory course and customized textbook that focuses on how airplanes fly, how weather conditions affect flight, flight and the human body, and flight navigation. The course is designed to complement materials taught in math, physics, and other science-related courses and is aligned with the National Science Education Standards, the Math Standards and Expectations, and ISTE National Educational Technology Standards for Students.

Leadership Education II - Communication, Awareness, and Leadership provides an essential component of leadership education for today's high school students. This is a customized course designed to improve communication, enhance awareness of self and others, and provide fundamentals of leadership and followership. The course also emphasizes leadership and values such as service and excellence.

Cadet Health and Wellness Program (CHWP). The CHWP is an exercise program focused upon individual base line improvements with the goal of achieving a Presidential Physical Fitness standard calculated with age and gender. The goal of the CHWP is to motivate JROTC cadets to lead active, healthy lifestyles beyond program requirements and into their adult lives. Cadets will be given the opportunity to put into practice the wellness concepts Cadets will participate in the Physical Fitness Test in the Fall and Spring Semesters. The Physical Fitness Test recognizes students for their level of physical fitness in five activities: Curl-ups (or partial curl-ups), Shuttle run, Endurance run/walk, Push-ups, V-sit reach (or sit and reach).

AFJROTC III - 9934

Credit: 1, Full Year

Prerequisite: AFJROTC II

Endorsement: Public Services

Aerospace Science III – Exploring Space: The high Frontier is a science course that includes the latest information available in space science and exploration. The course covers space from the earliest days of interest in astronomy through the Renaissance, and on into modern astronomy. It provides an in-depth study of the Earth, Sun, stars, Moon, and solar system, including the terrestrial and the outer planets. Cadets will learn about orbits and trajectories unmanned satellites, and space probes, manned and unmanned space flights, focusing on concepts surrounding spaceflight, space vehicles, launch systems, and space missions. The course covers the human experience in space. It also examines the latest advances in space technology, including robotics in space, the Mars Rover, and commercial uses of space.

Leadership Education III - Life Skills and Career Opportunities course will be helpful to students in deciding which path to take after high school. Information on how to apply for admission to college or to a vocational or technical school is included. Cadets will learn about financial planning; saving, investing, and spending money wisely, and how not to get caught in the credit trap. Students are informed about contracts, leases, wills, warranties, and legal notices. Cadets will learn how to prepare a résumé and interviewing skills. Cadets will be introduced to aerospace and military careers.

Cadet Health and Wellness Program (CHWP). The CHWP is an exercise program focused upon individual base line improvements with the goal of achieving a Presidential Physical Fitness standard calculated with age and gender. The goal of the CHWP is to motivate JROTC cadets to lead active, healthy lifestyles beyond program requirements and into their adult lives. Cadets will be given the opportunity to put into practice the wellness concepts Cadets will participate in the Physical Fitness Test in the Fall and Spring Semesters. The Physical Fitness Test recognizes students for their level of physical fitness in five activities: Curl-ups (or partial curl-ups), Shuttle run, Endurance run/walk, Push-ups, V-sit reach (or sit and reach).

AFJROTC IV - 9944

Credit: 1, Full Year

Prerequisite: AFJROTC III

Endorsement: Public Services

Aerospace Science IV - Cultural Studies: An introduction to Global Awareness course introduces students to the world's cultures through the study of world affairs, regional studies, and cultural awareness. The course delves into history, geography, religions, languages, culture, political systems, economics, social issues, environmental concerns, and

human rights. It looks at major events and significant figures that have shaped each region.

Leadership Education IV - The Principals of Management course provides exposure to the fundamentals of management. The objectives of this course are: Explore the history and the importance of management., know the techniques and skills involved in planning and decision making, know the importance of managing change, stress, and innovation and identify the key elements of individual and group behavior along with the importance of the communication process, and the characteristics of a good leader. This course, coupled with what cadets have already learned during their time in AFJROTC, will equip them with the qualities needed to serve in leadership positions within the corps.

Cadet Health and Wellness Program (CHWP). The CHWP is an exercise program focused upon individual base line improvements with the goal of achieving a Presidential Physical Fitness standard calculated with age and gender. The goal of the CHWP is to motivate JROTC cadets to lead active, healthy lifestyles beyond program requirements and into their adult lives. Cadets will be given the opportunity to put into practice the wellness concepts Cadets will participate in the Physical Fitness Test in the Fall and Spring Semesters. The Physical Fitness Test recognizes students for their level of physical fitness in five activities: Curl-ups (or partial curl-ups), Shuttle run, Endurance run/walk, Push-ups, V-sit reach (or sit and reach).

Locally Developed Courses

SAT Practice – 1026 (Local Credit)

Credit: ½, Semester

Prerequisite: Concurrent enrollment or completion of Algebra II

This course is designed for students who need the opportunity to improve SAT scores through realistic practice. Emphasis will be placed on test-taking skills and strategies, and problem solving. Students will grasp the underlying concepts of the exam as well as increase their efficiency and speed with which they answer questions. **Local credit only.**

Life I, II, III, IV - 9018, 9028, 9038, 9048

Credit: 1, Full Year (Local Credit)

Prerequisite: Ages 18-21, completion of a minimum of 22 credits

This program is designed to provide services in the areas of post- secondary education, integrated employment, vocational training, continuing and adult education, adult services, independent living, community participation, social/recreation/leisure, and other important life considerations that address the interests, preferences and needs of individual students ages 18-21 in an environment that replicates the environment of their peer group, individualized to each student. The program design focuses on transitioning the young adult from public school to the adult world in a manner that allows each participant to achieve his/her desired quality of life within an inclusive community.

Academic Skills I - 6178

Credit: 1, Full Year (Local Credit)

Prerequisite: Committee approval

Students receive direct instruction in skills for academic preparation, organization, note taking, and test-taking skills, structured social skills, informed decision making, and interpersonal skills coping with daily stressors and handling conflict in a socially acceptable manner, as well as having time for completion of academic assignments.

Innovative Courses

programs. **This class does not count toward the Physical Education credits required for graduation**

AP Capstone: Year 1 – AP Seminar - 9100

Grades 10-12

Credit: 1

The Capstone program is built on the foundation of the two new AP Courses – AP Seminar and AP Research – and is designed to complement and enhance in-depth, discipline specific study provided through other AP courses. In **AP Seminar**, students investigate real-world issues from multiple perspectives, gathering and analyzing information from various sources in order to develop valid evidence-based arguments. In AP Capstone, Year 2, these students will enroll in AP Research. In AP Research, students cultivate the skills and discipline necessary to conduct independent research in order to produce and defend a scholarly academic paper. Students who earn scores of 3 or higher in AP Seminar and AP Research and on four additional AP Exams of their choosing. Students earn the AP Capstone diploma by both completing coursework (AP Seminar and AP Research) and AP Exams (scoring a three or higher on these two AP exams, as well as on four additional AP exams of their choosing).

AP Capstone: Year 2 – AP Research - 9101

Grades 11-12

Credit: 1

Prerequisite: AP Capstone: Year I –AP Seminar

The Capstone program is built on the foundation of the two new AP Courses – AP Seminar and AP Research – and is designed to complement and enhance in-depth, discipline specific study provided through other AP courses. In , students investigate real-world issues from multiple perspectives, gathering and analyzing information from various sources in order to develop valid evidence-based arguments. In **AP Capstone**, Year 2, these students will enroll in AP Research. In AP Research, students cultivate the skills and discipline necessary to conduct independent research in order to produce and defend a scholarly academic paper. Students who earn scores of 3 or higher in AP Seminar and AP Research and on four additional AP Exams of their choosing. Students earn the AP Capstone diploma by both completing coursework (AP Seminar and AP Research) and AP Exams (scoring a three or higher on these two AP exams, as well as on four additional AP exams of their choosing).

AVID I, II, III, IV – 9051, 9052, 9053, 9054

Credit: 1, Full Year

Prerequisite: Prior year of AVID or committee approval

AVID (Advancement Via Individual Determination) students learn and apply strategies and methodologies that help them succeed in middle school and prepare for college. Writing, inquiry, collaboration, organization and reading strategies are used as part of the basis for instruction in the AVID classroom. In addition, Cornell notes, tutorials, Philosophical Chairs, and Socratic Seminars are introduced and used regularly with the AVID students All AVID students begin the process of college readiness by focusing on high academic achievement in all subjects.

Sports Medicine I – 8445

Credit: 1, Full Year

Prerequisite: Principles of Health Science

Sports Medicine I is designed to prepare the student in the science of injury prevention, treatment, and rehabilitation primarily as it relates to sports. Students will be provided with in- depth knowledge based on the concepts, skills and techniques commonly used in Athletic Training. This course includes classroom and practical sessions. This class is highly recommended for anyone considering a career in the medical fields, particularly Sports Medicine and Physical Therapy. Most colleges/universities request this class as a prerequisite for entering their Athletic Training and Sports Medicine

Sports Medicine II – 8446

Credit: 1, Full Year

Prerequisite: Sports Medicine I

Sports Medicine II is designed as an independent study class with research and practical application components. Students will be enrolled during an athletic period and will work with different athletic teams before and after school. The research will primarily consist of concepts, skills and techniques commonly used in Athletic Training and Physical Therapy. This class is highly recommended for anyone considering a career in the medical fields, particularly Sports Medicine and Physical Therapy. This class is considered to be an honors class by college/university Athletic Training and Sports Medicine programs. **This class does not count toward the Physical Education credits required for graduation.**

Sports Medicine III – 8447

Credit: 1, Full Year

Prerequisite: Sports Medicine II

Sports Medicine III is a course that provides a global exploration of fundamental injury rehabilitation topics facing students today. This course can only be taught by a nationally certified athletic trainer. The course deeply explores the injury rehabilitation process including full understanding of tissue healing and modalities. In addition, the student will demonstrate how both these and the required components of a complete rehabilitation plan is taken into account while addressing specific injuries and conditions. Small student learning groups will learn economic management skills in creating an athletic training room supply list that will require adherence to a budget and being creative in money-saving strategies. **This class does not count toward the Physical Education credits required for graduation.**

Career and Technical Education

*Any prerequisites listed for CTE courses are recommended prerequisites.

* For endorsement purposes, a sequence of courses for four or more credits in career and technical education (CTE) that consist of at least two courses in the same career cluster, including at least one advanced CTE course. The final course in the sequence must be selected from **one** of the following CTE career clusters:

AGRICULTURE, FOOD, & NATURAL RESOURCES CLUSTER

FFA is the club/organization for students enrolled in agricultural sciences. In order for all students to be members of the FFA and eligible to show livestock, they must take a minimum of one semester of agricultural science each school year.

Principles of Agriculture Food and Natural Resources - 8004

Credit: 1, Full Year

Grade: 9-11

Prerequisite: None

Endorsement: Business and Industry

This course allows students to develop knowledge and skills regarding career opportunities, personal development, globalization, industry standards, details, practices, and expectations. Students will learn the history of FFA, Parliamentary Procedure, History of Agriculture, breeds of livestock, Plant and Soil Science and basic mechanics. Opportunities will be made available to introduce students to FFA. The FFA is the largest and premiere youth group in the United States. Membership and raising a project are not required, but recommended.

Food Technology and Safety - 8044**Credit: 1, Full Year****Grade: 10-12****Prerequisite: None****Endorsement: Business and Industry**

This course prepares students for careers in value-added and food processing systems. Students will acquire technical knowledge and skills related to value-added and food processing, develop skills regarding career opportunities, and agricultural industry expectations. This course examines the food technology industry as it relates to food production, handling, and safety.

Wildlife, Fisheries and Ecology Management - 8074**Credit: 1, Full Year****Grade: 10-12****Prerequisite: Recommended Principles of Agriculture, Food, and Natural Resources****Endorsement: Business and Industry**

A technical course designed to examine the importance of wildlife and outdoor recreation with emphasis on using wildlife and natural resources. Hunter safety certification is also taught in this class as well as wildlife identification for judging.

Livestock Production - 8084**Credit: 1, Full Year****Grade: 10-12****Prerequisite: Recommended Principles of Agriculture, Food, and Natural Resources****Endorsement: Business and Industry**

Students will learn about careers in the field of animal science. The primary animal species that will be studied in this course is beef cattle, dairy cattle, swine, goats, and poultry.

Small Animal Management - 8014**Credit: 1/2, Semester****Grade: 10-12****Prerequisite: Recommended Principles of Agriculture, Food, and Natural Resources****Endorsement: Business and Industry**

This course will prepare students for careers in the field of animal science. Students need to acquire knowledge and skills related to animal systems and the workplace, and develop knowledge and skills regarding career opportunities, and industry expectations. Small animals that may be included in the course of study include, but are not limited to, small mammals, amphibians, reptiles, avian, dogs, and cats.

Equine Science - 8094**Credit: 1/2, Semester****Grade: 10-12****Prerequisite: Recommended Principles of Agriculture, Food, and Natural Resources****Endorsement: Business and Industry**

The care and management of horses has developed into Equine Science, a multi-million dollar industry. The course will help the novice and the student who is already active in the horse industry to learn selection, nutrition, reproduction health, judging, and management of horses, donkeys or mules. Judging trips and tours are an integral and common part of the course.

Agribusiness Management and Marketing - 8164**Credit: 1, Full Year****Grade: 10-12**

Updated: 01/07/2019

Prerequisite: None**Endorsement: Business and Industry**

This course will prepare students for careers in agribusiness systems. Students will attain technical knowledge and skills related to agribusiness marketing and management and the workplace, and develop knowledge and skills regarding career opportunities, and agricultural industry expectations. This course is designed to provide a foundation to agribusiness management and the free enterprise system. Instruction includes the use of economic principles such as supply and demand, budgeting, record keeping, finance, risk management, business law, marketing, and careers in agribusiness.

Energy and Natural Resources Technology - 8098**Credit: 1, Full Year****Grade: 10-12****Prerequisite: a minimum of one credit from the courses in the Agriculture, Food and Natural Resources Career Cluster.****Endorsement: Business and Industry**

Energy and Natural Resource Technology examines the interrelatedness of environmental impacts resulting from production agriculture. Students will evaluate the environmental benefits provided by sustainable resources and green technologies. Instruction is designed to allow for the application of science and technology to measure environmental impacts resulting from production agriculture through field and laboratory experiences. To prepare for careers in environmental service systems, student must attain academic skills and knowledge, acquire advance technical knowledge and skills related to environmental systems and workplace, and develop knowledge and skills regarding career opportunities, entry requirements, and industry expectations. To prepare for success, students need opportunities to learn, reinforce, apply and transfer their knowledge and skills and technologies in a variety of setting.

Agriculture Mechanics and Metal Technology -8404**Credit: 1, Full Year****Grade: 10-12****Prerequisite: Recommended Principles of Agriculture, Food, and Natural Resources****Endorsement: Business and Industry****Material fees may be assessed according to project*

This is a hands-on learning course that allows students to develop skills in metalworking, welding, tool use, and carpentry. Students will also be exposed to electricity, plumbing, and masonry.

Once student skills are sharpened they will have the opportunity to plan and construct metal and wood projects. Students may gain certifications in carpentry, painting and welding.

Agricultural Structures Design and Fabrication - 8234**Credit: 1, Full Year****Grade: 11-12****Prerequisite: Agriculture Mechanics and Metal Technologies or Welding****Endorsement: Business and Industry****Material fees may be assessed according to project*

A more advanced hands on learning course that allows students to further welding and construction skills learned in previous shop courses. Students will learn skills related to facility design and fabrication. More specific skills in site location, material installation, and construction methods are learned. Students will have the opportunity to develop plans and construct projects using metalworking, welding and woodworking. Students may gain certifications in electrical, pipefitting, plumbing, masonry and sheet metal.

Veterinary Medical Applications - 8043**Credit: 1, Full Year****Grade: 11-12****Prerequisite: Principles of Agriculture Food and Natural Resources and/or Livestock Production****Endorsement: Business and Industry**

This course will cover topics that are relative to veterinary practices as they relate to both large and small animal species. Students will learn aspects related to veterinary hospital management, medical terminology, animal identification, mathematical calculations, animal health and diseases, animal care procedures, and surgical-assisting procedures.

Floral Design - 8674

Credit: 1, Full Year **Grade: 10-12**

Prerequisite: None

Endorsement: Business and Industry

**Material fees may be assessed according to project*

This course is designed to develop skills in the design and arrangement of flowers, foliage, and related plant materials for interior locations. Students will create floral arrangements.

This course will satisfy the Fine Arts credit.

Agricultural Power Systems (Two Credits) – 8249

Credit: 2, Full Year **Grade: 10-12**

Recommended prerequisite: Principles of Agriculture, Food, and Natural Resources.

Endorsement: Business and Industry

Students shall be awarded two credits for successful completion of this course. Agricultural Power Systems is designed to develop an understanding of power and control systems as related to energy sources, small and large power systems, and agricultural machinery. To prepare for careers in agricultural power, structural, and technical systems, students must attain academic skills and knowledge; acquire technical knowledge and skills related to power, structural, and technical agricultural systems and the workplace; and develop knowledge and skills regarding career opportunities, entry requirements, industry certifications, and industry expectations. To prepare for success, students need opportunities to learn, reinforce, apply, and transfer their knowledge and technical skills in a variety of settings.

Welding – 8865

Credits: 2, Full Year **Grade: 12**

Prerequisite: See teacher for more information.

Endorsement: Business and Industry

Welding provides the knowledge, skills, and technologies required for employment opportunities in metal technology systems. The areas of oxy-fuel processes, plasma arc cutting, arc welding, mig welding, and tig welding will be covered. Knowledge about career opportunities, requirements, and expectations and the development of workplace skills prepare students for success.

Practicum in Agriculture, Food and Natural Resources - 8264

Credit: 2, Full Year **Grade: 11-12**

Prerequisite: Junior standing with at least 10 credits, 16 years old, and student should see teacher prior to registration for materials and supplies.

Endorsement: Business and Industry

This course is designed to provide technical instruction, on-the-job training, and work experience for high school students preparing to enter employment in various occupations. Students in the Practicum course spend one hour in class each scheduled day of block schedule to receive instruction in the occupations for which they are training and two or more consecutive hours each school day at training stations in order to learn the occupations. Training stations include the areas of: leadership development, mechanized agriculture, food and fiber production, value added and food processing, horticulture, agribusiness marketing and management, environmental and natural resources, agriculture/agribusiness/etc. Local businesses in the community are cooperating with the local school district in training students by providing work experience necessary to become valuable employees. Students must work a minimum of fifteen (15) hours per week at their training station. Students must provide their own transportation to and from their workstations.

Project Based Research (Leadership Team) – 8985, 8987, 8988

Credit: 1, Full Year **Grade: 10-12**

Prerequisite: Teacher Approval

Project-Based Research is a course for students to research a real-world problem. Students are matched with a mentor from the business or professional community to develop an original project on a topic related to career interests. Students use scientific methods of investigation to conduct in-depth research, compile findings, and present their findings to an audience that includes experts in the field. To attain academic success, students must have opportunities to learn, reinforce, apply, and transfer their knowledge and skills in a variety of settings.

ARCHITECTURE AND CONSTRUCTION CLUSTER

Principles of Architecture – 8694

Credit: 1, Full Year **Grade: 9-12**

Prerequisites: None

Endorsement: Business and Industry

Principles of Architecture and Construction will give the student an understanding of what's really happening from start to finish. The course will cover how to create, read and interpret technical information in reports and documents such as estimates, permits and work orders by using a variety of hardware and software. Problem solving skills will be used to evaluate and adjust plans and schedules to respond to unexpected events. The student will investigate available opportunities and careers in these fields as well as public relation skill to cover a variety of situations. How to manage materials safely will also be covered.

Architectural Design I - 8369

Credit: 1, Full Year **Grade: 10-12**

Prerequisite: Principles of Architecture and Construction

AND teacher recommendation required

Endorsement: Business and Industry

Students gain knowledge and skills specific to those needed to enter a career in architecture and construction or prepare a foundation toward a postsecondary degree in architecture, construction science, drafting, interior design, and landscape architecture. Architectural design includes the knowledge of the design, design history, techniques, and tools related to the production of drawings, renderings, and scaled models for commercial or residential architectural purposes. In this advanced technical course students will use a Computer Aided Drafting and Design (CADD) system with AutoCAD software to design and produce the drawings associated with residential home building. Students will study the architectural styles, and construction practices related to modern architecture and will become familiar with the graphic standards accepted by the American Institute of Architects (AIA).

Interior Design - 8364

Credit: 1 Full Year **Grade: 10-12**

Prerequisite: Principles of Architecture

Endorsement: Business and Industry

Do you find yourself watching HGTV? Do you love driving through neighborhoods looking at architecture or landscaping? Are you interested in a career as an Interior Designer, Architect or Real Estate Agent? This course will appeal to those desiring an overview of architectural styles, community planning, future housing trends, as well as basic construction. The content also addresses design principles, furniture styles, lighting, accessories, and appliances. The student will acquire basic knowledge of computer-aided design methods to create interior drawings for presentations

Interior Design II – 8366

Credit: 2, Full Year **Grade: 11-12**

Prerequisites: English II, Geometry, and Interior Design I.

Endorsement: Business and Industry

Interior Design II is a technical laboratory course that includes the application of the employability characteristics, principles, processes, technologies, communication, tools, equipment, and materials related to interior design to meet industry standards.

Principles of Construction – 8380

Credit: 1, Full Year

Grade: 9-12

Prerequisites: None

Endorsement: Business and Industry

Principles of Construction is intended to provide an introduction and lay a solid foundation for those students entering the construction or craft skilled areas. The course provides a strong knowledge of construction safety, construction mathematics, and common hand and power tools. This course also provides communication and occupation skills to assist the student in obtaining and maintaining employment.

General Employability Skills in Construction – 8980

Credit: 1, Full Year

Grade: 9-12

Prerequisites: Principles of Construction

Endorsement: Business and Industry

This course provides students with knowledge of the prerequisite skills for general employment as well as the means of obtaining those skills in the field of construction. The course also includes the knowledge, skills, and attitudes that allow employees to get along with their co-workers, make important work-related decisions, and become strong members of the work team. Discovering job possibilities that link skills, abilities, interests, values, needs, and work environment preferences is a part of the process of obtaining employability skills and abilities and is experiential learning that takes place over time. This course is designed to guide students in obtaining the knowledge and the needed employability skills that are transferable among a variety of jobs and careers and are considered essential in any employment situation. This course is designed to be the second course in the pathway for the Construction Trades pathway.

Practicum in Construction Management/Extended

Practicum in Construction - 8875

Credit: 3, Full Year

Grade: 9-12

Prerequisites: Principles of Construction or Principles of Architecture

Endorsement: Business and Industry

Career Preparation-Construction Trades is for juniors and seniors who want to pursue a career path in construction, leave campus early, and make money. Career Preparation is an occupationally specific, 3 credit course designed to provide an integrated academic training in the classroom and on the job in a paid position. Classroom instruction will cover a more in-depth study of the occupational training; assist in instruction and mentoring first year students. Employment opportunities include general construction, design/drafting, plumbing, electrical, HVAC, roofing, and concrete. Students must provide their own transportation.

ARTS, AV TECHNOLOGY AND COMMUNICATIONS CLUSTER

Principles of Arts, AV, and Technology - 8274

Credit: 1, Full Year

Grade: 9-12

Prerequisite: None

Endorsement: Arts and Humanities

This course is recommended for students in grade 9.

This is the intro level course leading into Graphic Design, Audio/Video Production, Digital & Interactive Media, Animation, or Video Game Design.

Careers in the Arts, Audio/Video Technology, and

Updated: 01/07/2019

Communications career cluster require, in addition to creative aptitude, a strong background in computer and technology applications, a strong academic foundation, and a proficiency in oral and written communication. Within this context, students will be expected to develop an understanding of the various and multifaceted career opportunities in this cluster and the knowledge, skills, and educational requirements for those opportunities.

Fashion Design I - 8454

Credit: 1, Full Year

Grade: 10-12

Prerequisite: None

Endorsement: Arts and Humanities

If you have a love for fashion and the textile and apparel industries this is the course for you. In this hands-on laboratory course you will learn the current fashion trends, maintenance and care for apparel, use design elements and principles in garment construction, recycle and redesign apparel, explore career opportunities, develop a professional portfolio and much more. You also will comprise a career portfolio and create a mock window display.

Fashion Design II - 8194

Credit: 1, Full Year

Grade: 11-12

Prerequisite: Fashion Design I

Endorsement: Arts and Humanities

This hand-on laboratory course emphasizes design and production. The student will research the fashion industry, determine textile characteristics on apparel and fashion, design and construct advanced garments, and continue to develop your career portfolios. If you want to learn what it takes to be a fashion designer and learn marketing and promotion skills this is the class for you.

Commercial Photography I - 8754

Credit: 1, Full Year

Grade: 10-12

Prerequisite: Principles of Arts, AV, and Technology

Endorsement: Business and Industry

This technical course is designed to provide advanced knowledge and skills acquisition of the contemporary resources, processes and impacts of graphic communications technology. Activities in this course may include graphic design, computer image composition, preparing production, image transfer and finishing experience. Examples of student learning activities are taking and editing photographs, publishing a newsletter, using computers to transmit information, and developing quality control methods. Examples of equipment used are digital cameras, video camcorder, recorders, copiers, computers hardware/software and optical systems.

Commercial Photography II – 8756

Credit: 1, Full Year

Grade: 10-12

Prerequisite: Students must have completed Commercial Photography. Student should see teacher prior to registration for materials and supplies.

Endorsement: Business and Industry

This is an advanced technical course designed for students to apply skills and knowledge learned in Photograph I. Examples of student learning activities are create photographs for a defined purpose using approved composition and layout techniques, and create an advertising campaign for specific products. Examples of equipment used are digital cameras, video camcorder, recorders, copiers, computers hardware/software and optical systems.

Commercial Photography II with Lab - 8757

Credit: 2, Full Year

Grade: 10-12

Prerequisite: Students must have completed Commercial Photography. Student should see teacher prior to registration for materials and supplies.

Endorsement: Business and Industry

This is an advanced technical course designed for students to apply skills and knowledge learned in Photograph I. Examples of student learning activities are create photographs for a defined purpose using approved composition and layout techniques, and create an advertising campaign for specific products. . Examples of equipment used are digital cameras, video camcorder, recorders, copiers, computers hardware/software and optical systems.

Audio Video Production I - 8684

Credit: 1, Full Year **Grade: 10-12**

Prerequisite: Principles of Arts, AV, and Technology

Endorsement: Business and Industry

Have you ever dreamed of making your own movies? In Audio Video Production that's exactly what we do. We use Mac computers and the latest and greatest film making software, Adobe Premiere Pro and After Effects, to make our own live action, animated, multi-camera, and sound-dubbed films. You'll learn pre-production, editing, and post-production techniques that will allow you to export your films in a variety of formats for DVD, Web, and Podcast use. AND you will have the opportunity to earn your Adobe Certified in Premiere Pro and After Effects should you wish to do so. This class is for serious filmmakers only because there is a lot to learn!

Audio/Video Production I with Lab – 8681

Credit: 2, Full Year **Grade: 10-12**

Prerequisite: Principles of Art, Audio/Video Technology, and Communications or Digital and Interactive Media in the Information Technology Career Cluster.

Co-requisite: Audio/Video Production I

Careers in audio and video technology and film production span all aspects of the audio/video communications industry. Within this context, in addition to developing technical knowledge and skills needed for success in the Arts, Audio/Video Technology, and Communications Career Cluster, students will be expected to develop an understanding of the industry with a focus on preproduction, production, and post production audio and video products. Requiring a lab co-requisite for the course affords necessary time devoted specifically to the production and post-production process.

Audio/Video Production II - 8691

Credit: 1, Full Year **Grade: 10-12**

Prerequisite: Audio Video Production and teacher recommendation

Endorsement: Business and Industry

Careers in audio and video technology and film production span all aspects of the audio/video communications industry. Building upon the concepts taught in Audio/Video Production, in addition to developing advance knowledge and skills needed for success in the Arts, Audio/Video Technology, and Communication Career Cluster, students will be expected to develop an advanced understanding of the industry with a focus on pre-production, production, and post production products. This course may be implemented in an audio format or a format with both audio and video.

Audio Video Production II with Lab - 8692

Credit: 2, Full Year **Grade: 11-12**

Prerequisite: Audio Video Production & student should see teacher prior to registration for materials and supplies.

Endorsement: Business and Industry

Did you enjoy Audio Video Production last year, but don't have a two-hour slot available in your schedule this year? Not to worry. You can take Problems and Solutions a second year. This course is designed for you to further advance all your filmmaking knowledge and skills. Your previous skills will be put to the test creating films for competition and possibility for profit? Hone your filmmaking skills and create projects you can

be truly proud of. Learn advanced Final Cut Pro techniques, scriptwriting, and more. What other class gives you that? Students may also have the opportunity to host a student-produced film festival here at CHS.

Graphic Design and Illustration I - 8204

Credit: 1, Full Year

Grade: 10-12

Prerequisite: Principles of Arts, AV, and Technology

Endorsement: Business and Industry

Learn Adobe Illustrator and Photoshop – two programs used widely throughout the art, business, scientific, design and multimedia industries. Build two-dimensional cartoons and artwork in Illustrator and Photoshop and learn to animate them in Photoshop and Flash. Find out what your digital camera is capable of and how to improve and artistically alter your pictures using Photoshop. Don't pay big bucks for this knowledge years from now! Learn it now while you're still young, and while it's free!

Graphic Design and Illustration I with Lab – 8210

Credit: 2, Full Year

Grade: 10-12

Recommended prerequisite: Principles of Arts, Audio/Video Technology, and Communications.

Co-requisite: Graphic Design and Illustration I

Endorsement: Business and Industry

This class must be taken concurrently with Graphic Design and Illustration I and may not be taken as a stand-alone course. Districts are encouraged to offer this lab in a consecutive block with Graphic Design and Illustration I to allow students sufficient time to master the content of both courses. Careers in graphic design and illustration span all aspects of the advertising and visual communications industries. Within this context, in addition to developing knowledge and skills needed for success in the Arts, Audio/Video Technology, and Communications Career Cluster, students will be expected to develop an understanding of the industry with a focus on fundamental elements and principles of visual art and design.

Graphic Design and Illustration II - 8205

Credit: 1, Full Year

Grade: 10-12

Prerequisite: Graphic Design and Illustration and teacher recommendation

Endorsement: Business and Industry

Take what you learned last year in Graphic Design and Illustration to the next level. Work on advanced projects that combine Illustrator, Photoshop and other software in new and exciting ways. Want to dive more into animation – go for it! Interested in finding out how to sell photos for profit – you can! Want to build websites for your use or to sell to companies? Why not? Individual interests and custom tailored projects are the name of the game in this class. Head to college with a whole lot of knowledge!

Graphic Design and Illustration II with Lab – 8688

Credit: 2, Full Year

Grade: 10-12

Prerequisite: Graphic Design and Illustration I

Corequisite: Graphic Design and Illustration II

Endorsement: Business and Industry

This course must be taken concurrently with Graphic Design and Illustration II and may not be taken as a stand-alone course. Districts are encouraged to offer this lab in a consecutive block with Graphic Design and Illustration II to allow students sufficient time to master the content of both courses. Careers in graphic design and illustration span all aspects of the advertising and visual communications industries. Within this context, in addition to developing advanced technical knowledge and skills needed for success in the Arts, Audio/Video Technology, and Communications Career Cluster, students will be expected to develop an advanced understanding of the industry with a focus on mastery of content knowledge and skills.

Practicum in Graphic Design and Illustration – 8211

Credit: 2, Full Year **Grade: 10-12**

Prerequisites: *Graphic Design and Illustration*

Endorsements: *Business and Industry*

A student may repeat this course once for credit provided that the student is experiencing different aspects of the industry and demonstrating proficiency in additional and more advanced knowledge and skills. Careers in graphic design and illustration span all aspects of the advertising and visual communications industry. Within this context, in addition to developing technical knowledge and skills needed for success in the Arts, Audio/Video Technology, and Communications Career Cluster, students will be expected to develop a technical understanding of the industry with a focus on skill proficiency. Instruction may be delivered through lab-based classroom experiences or career preparation opportunities.

Extended Practicum in Graphic Design and Illustration – 8212

Credit: 1, Full Year **Grade: 11-12**

Prerequisites: *Graphic Design and Illustration II and Graphic Design and Illustration II Lab*

Corequisite: *Practicum in Graphic Design and Illustration*

This course must be taken concurrently with Practicum in Graphic Design and Illustration and may not be taken as a stand-alone course. The practicum course is a paid of unpaid capstone experience for students participating in a coherent sequence of career and technical education courses in the Arts, Audio/Video Technology, and Communication Career Cluster. A student may repeat this course once for credit provided that the student is experiencing different aspects of the industry and demonstrating proficiency in additional and more advanced knowledge and skills. Careers in graphic design and illustration span all aspects of the advertising and visual communications industry. Within this context, in addition to developing technical knowledge and skill needed for success in the Arts, Audio/Video Technology, and Communications Career Cluster, students will be expected to develop a technical understanding of the industry with a focus on skill proficiency. Instruction may be delivered through lab-based classroom experiences or career preparation opportunities.

Video Game Design – 8686

Credit: 1, Full Year **Grade: 10-12**

Prerequisite: *None*

Endorsement: *Business and Industry*

Careers in Video Game Design span all aspects of the video gaming industry. Within this context, in addition to developing knowledge and skills needed for success in the career cluster, students will be expected to develop, design, problem solve, program and create functional video games. Students will be introduced to programming language and skills that are essential to developing an advanced understanding of the industry with a focus on design and implementation activities.

Video Game Programming - 8209

Credit: 1, Full Year **Grade 11-12**

Prerequisite: *Video Game Design & student should see teacher prior to registration for materials and supplies.*

Endorsement: *Business and Industry*

Careers in Video Game Design span all aspects of the video gaming industry. Within this context, in addition to developing knowledge and skills needed for success in the career cluster, students will be expected to develop, design, problem solve, program and create functional video games. Students will advance in the programming language and skills that are essential to developing an advanced understanding of the industry with a focus on design and implementation activities.

Advanced Video Game Programming – 8687

Credit: 1, Full Year **Grade: 12**

Prerequisite: *Video Game Design II & student should see teacher prior to registration for materials and supplies.*

Endorsement: *Business and Industry*

This course is designed for the 3rd year Video Game Design student. The Problems and Solutions course is designed to give students the opportunity to take skills learned in previous years' classes to the next level in a one-hour course. Students will work on self-guided projects that combine skills in Unity and Maya to prepare for life after high school.

BUSINESS MANGEMENT AND ADMINISTRATION CLUSTER

Principles of Business Marketing and Finance - 8668

Credit: 1, Full Year **Grade: 9-12**

Prerequisite: *None*

Endorsement: *Business and Industry*

In Principles of Business, Marketing, and Finance, students gain knowledge and skills in economies and private enterprise systems, the impact of global business, the marketing of goods and services, advertising, and product pricing. Students analyze the sales process and financial management principles. This course allows students to reinforce, apply, and transfer academic knowledge and skills to a variety of interesting and relevant activities, problems, and settings in business, marketing, and finance.

Touch Systems Data Entry - 8488

Credit: .5, Semester **Grade: 10-12**

Prerequisite: *None*

Endorsement: *Business and Industry*

In Touch System Data Entry, students apply technical skills to address business applications of emerging technologies. Students enhance reading, writing, computing, communication, and reasoning skills and apply them to the business environment. Students will need to apply touch system data entry for production of business documents.

Business Information Management I - 8643

Credit: 1, Full Year **Grade: 10-12**

Prerequisite: *None*

Endorsement: *Business and Industry*

In Business Information Management I, students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and make a successful transition to the workforce and postsecondary education. Students apply technical skills to address business applications of emerging technologies, create word-processing documents, develop a spreadsheet, formulate a database, and make an electronic presentation using appropriate software.

Business Information Management II - 8653

Credit: 1, Full Year **Grade: 10-12**

Prerequisite: *Business Information Management*

Endorsement: *Business and Industry*

In Business Information Management II, students implement personal and interpersonal skills to strengthen individual performance in the workplace and in society and make a successful transition to the workforce or postsecondary education. Students apply technical skills to address business applications of emerging technologies, create complex word-processing documents, develop sophisticated spreadsheets using charts and graphs, design a database to solve business problems, and make an electronic presentation using appropriate multimedia software.

Virtual Business - 8174

Credit: .5, Semester **Grade: 10-12**

Perquisite: *None*

Endorsement: *Business and Industry*

Virtual Business is designed for students to start a virtual business by creating a web presence, conducting online and off-line marketing, examining contracts appropriate for an online business, and demonstrating project-management skills. Students will also demonstrate bookkeeping skills for a virtual business, maintain business records, and understand legal issues associated with a virtual business.

Incubator/Business Management - 8704

Credit: 1, Full Year

Grade: 11-12

Prerequisite: Business Information Management

Endorsement: Business and Industry

Career and technical education instruction provides content aligned with challenging academic standards and relevant technical knowledge and skills for students to further their education and succeed in current or emerging professions. The Business Management and Administration Career Cluster focuses on careers in planning, organizing, directing and evaluating business functions essential to efficient and productive business management as well as the functions of management, including planning, organizing, and staffing.

EDUCATION AND TRAINING CLUSTER

Principles of Education and Training – 8971

Credit: 1, Full Year

Grade: 9-11

Prerequisite: None

Endorsement: Public Services

This course is designed to introduce students to the Education and Training Cluster. Students will explore careers in education, teaching and training, administration, and administrative support. They will explore the political and historical trends, as well as the cultural and societal changes that have affected the educational system across America. Students will explore graduation plans at will compare technical, community college, and university programs and how they align with interest areas. This course is an excellent introductory course for those interested in the field of education.

Instructional Practices (Ready, Set, Teach!)- 8964

Credit: 2, Full Year

Grade: 11-12

Prerequisite: Student should see teacher prior to registration for materials and supplies.

Endorsement: Public Services

Have you considered a career in education? Would you like hands on experience working in the classroom with elementary, middle, or high school students before you go to college? Practicum in Education and Training is a 2 credit field-based internship that provides students background knowledge of child and adolescent development as well as principles of effective teaching and training practices. Students will mentor with an experienced elementary, middle or high school teacher along with education and training from an experienced Family and Consumer Sciences teacher. Students learn to plan and direct individualized instruction and group activities, prepare lesson plans, assist with record keeping, and complete other responsibilities of classroom teachers, trainers, paraprofessionals, or other educational personnel. The students must provide their own transportation.

Practicum in Education and Training (Ready, Set, Teach!) - 8974

Credit: 2, Full Year

Grade: 12

Prerequisite: Instructional Practices in Education and student should see teacher prior to registration for materials and supplies.

Endorsement: Public Services

Did you love Instructional Practices in Education and Training and working in the school setting with a mentor teacher? Practicum in Education and Training is a 2 credit field-based internship that provides students extended background knowledge of child and adolescent development as well as principles of effective teaching and training practices. Students will apply their experience by planning instructional materials

Updated: 01/07/2019

and teaching in a classroom setting of their interest with a mentor teacher along with mentoring to first year Education and Training students. The students must provide their own transportation.

Extended Practicum in Education and Training – 8979

Credit: 3, Full Year

Grade: 12

Prerequisite: Instructional Practices. 14 Recommended

prerequisites: Principles of Education and Training and Human Growth and Development.

Corequisite: Practicum in Education and Training. This course must be taken concurrently with Practicum in Education and Training and may not be taken as a stand-alone course.

The practicum course is a paid or unpaid capstone experience for students participating in a coherent sequence of career and technical education courses in the Education and Training Career Cluster. Students shall be awarded one credit for successful completion of this course. A student may repeat this course once for credit provided that the student is experiencing different aspects of the industry and demonstrating proficiency in additional and more advanced knowledge and skills. Extended Practicum in Education and Training is a field-based internship that provides students background knowledge of child and adolescent development principles as well as principles of effective teaching and training practices. Students in the course work under the joint direction and supervision of both a teacher with knowledge of early childhood, middle childhood, and adolescence education and exemplary educators in direct instructional roles with elementary-, middle school-, and high school-aged students. Students learn to plan and direct individualized instruction and group activities, prepare instructional materials, assist with record keeping, make physical arrangements, and complete other responsibilities of classroom teachers, trainers, paraprofessionals, or other educational personnel.

Career Preparation I – 8374

Credit: 2, Full Year

Grade: 11-12

Prerequisite: Must be 16 years of age, Student Must see the teacher BEFORE registering for this course.

Endorsement: Public Service

Are you ready to make money, leave school early, and get credit while on the job? Career Preparation is an occupationally specific, 2 credit course designed to provide an integrated academic training in the classroom and on the job in a paid position. Classroom instruction will cover occupational skills, critical thinking, creating a professional portfolio, teamwork, communication, ethical and legal responsibilities, time and money management, and entrepreneurship. Employment opportunities include education and childcare training, culinary arts, hospitality, interior design, and fashion. Students must provide their own transportation.

Career Preparation II – 8384

Credit: 2, Full Year

Grade:12

Prerequisite: Career Preparation I

Endorsement: Public Service

Career Preparation II is for seniors who have taken Career Preparation I and who want to continue a career path, leave campus early, and make money. Career Preparation is an occupationally specific 2 credit course designed to provide an integrated academic training in the classroom and on the job in a paid position. Classroom instruction will cover a more in-depth student of the occupational training; assist in instruction and mentoring for first year students. Employment opportunities include education and childcare training, culinary arts, hospitality, interior design, and fashion. Student must provide their own transportation.

Career Prep I/Extended Career Preparation – 8389

Credit: 3, Full Year

Grade: 11-12

Prerequisite: Successful completion of one or more advanced career and technical education courses that are part of a coherent sequence of courses in a career cluster related to the field in which the student will be employed.

Corequisite: Career Preparation I or Career Preparation II.

Endorsement: Public Service

Students shall be awarded three credits for successful completion of this course. A student may repeat this course once for credit provided that the student is experiencing different aspects of the industry and demonstrating proficiency in additional and more advanced knowledge and skills. Extended Career Preparation provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with business and industry employment experiences. The goal is to prepare students with a variety of skills for a changing workplace. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success.

Career Prep II/Extended Career Preparation – 8387

Credit: 3, Full Year **Grade:** 11-12

Prerequisite: Successful completion of one or more advanced career and technical education courses that are part of a coherent sequence of courses in a career cluster related to the field in which the student will be employed.

Corequisite: Career Preparation I or Career Preparation II.

Endorsement: Public Service

Students shall be awarded three credits for successful completion of this course. A student may repeat this course once for credit provided that the student is experiencing different aspects of the industry and demonstrating proficiency in additional and more advanced knowledge and skills. Extended Career Preparation provides opportunities for students to participate in a work-based learning experience that combines classroom instruction with business and industry employment experiences. The goal is to prepare students with a variety of skills for a changing workplace. Career preparation is relevant and rigorous, supports student attainment of academic standards, and effectively prepares students for college and career success.

FINANCE CLUSTER

Principles of Business, Marketing, and Finance - 8668

Credit: 1, Full Year **Grade:** 9-12

Prerequisite: None

Endorsement: Business and Industry

Do you like to shop? Sharpen your shopping skills while learning about advertising, marketing and finance. In this class you will learn how to improve your talents, abilities and business skills. Are you a trendsetter? Would you like to own your own business? Put your imagination to work when planning investment and advertising strategies.

Accounting I - 8614

Credit: 1, Full Year **Grade:** 10-12

Prerequisite: None

Endorsement: Business and Industry

In Accounting I, students will investigate the field of accounting, including how it is impacted by industry standards as well as economic, financial, technological, international, social, legal, and ethical factors. Students will reflect on this knowledge as they engage in the process of recording, classifying, summarizing, analyzing, and communicating accounting information. Students will formulate and interpret financial information for use in management decision making.

Accounting II - 8624

Credit: 1, Full Year **Grade:** 11-12

Prerequisite: Accounting I

Endorsement: Business and Industry

In Accounting II, students will continue the investigation of the field of accounting, including how it is impacted by industry standards as well as economic, financial, technological, international, social, legal, and ethical factors. Students will reflect on this knowledge as they engage in various managerial, financial, and operational accounting activities. Students will formulate, interpret, and communicate financial information for use in management decision making. Students will use equations, graphical representations, accounting tools, spreadsheet software, and accounting systems in real-world situations to maintain, monitor, control, and plan the use of financial resources. Students will have an opportunity to earn their QuickBooks Certificate.

HEALTH SCIENCE CLUSTER

Principles of Health Science Technology - 8414

Credit: 1, Full Year **Grade:** 9-12

Prerequisite: None

Endorsement: Public Services

This course is designed to provide an opportunity for understanding the concepts and skills necessary for entering the health care field. Essential elements included in this course are current events in health care, medical terminology, anatomy and physiology, human growth and development, CPR, First Aid, basic concepts of illness and wellness, medical communications skills and interpersonal skills. The course is designed for mature students and taught in alignment with industry standards. Student will earn certification in CPR-AED-First Aid.

Medical Terminology - 9174

Credit: 1, Full Year **Grade:** 9-12

Prerequisite: None

Endorsement: Public Services

This course is designed to help students develop a working knowledge of the language of medicine. Students are introduced to the structure of medical terms including prefixes and suffixes, combining forms and word roots, plus medical abbreviations and acronyms. Knowledge of medical terminology enhances the student's ability to successfully secure employment or pursue advanced education in health care.

Health Science Theory - 8424

Credit: 1, Full Year **Grade:** 10-12

Prerequisite: Principles of Health Science

Endorsement: Public Services

This course is designed to help students develop the essential knowledge and skills for entering the health care profession elements included in this course are legal and ethical responsibilities, promotion of safety, infection control, vital signs, medical terminology, and current events in health care.

Health Informatics – 8399

Credit: 1, Full Year **Grades:** 11-12

Prerequisites: Business Management I and Medical Terminology.

Endorsement: Public Service

The Health Informatics course is designed to provide knowledge of one of the fastest growing areas in both academic and professional fields. The large gap between state of the art computer technologies and the state of affairs in health care information technology has generated demand for information and health professionals who can effectively design, develop, and use technologies such as electronic medical records, patient monitoring systems, and digital libraries, while managing the vast amount of data generated by these systems. Learning proficiency in Medical Coding and Billing.

Pharmacology – 8423**Credit: 1, Full Year****Grades: 11-12****Prerequisites: Biology and Chemistry****Recommended Prerequisite: one course from the Health Science cluster**

Students shall be awarded one credit for successful completion of this course. The Pharmacology course is designed to study how natural and synthetic chemical agents such as drugs affect biological systems. Knowledge of the properties of therapeutic agents is vital in providing quality health care. It is an ever-changing, growing body of information that continually demands greater amounts of time and education from health care workers.

Health Science Theory/Health Science Clinical (Clinical Rotations)– 8434**Credit: 2, Full Year****Grades: 11 - 12****Prerequisite: Biology, Chemistry, and Medical Terminology recommended. Principles of Health Science Technology required.****Student should see teacher prior to registration for an application. Students will have to submit an application for this course.****Endorsement: Public Services**

This course is designed to develop the knowledge and skills related to a wide variety of health careers. Students will have hands-on experiences for continued knowledge and skill development. Students will be introduced to a variety of aspects of health care by rotation among various departments in a hospital setting as well as the community setting. Students will be required to purchase scrubs and shoes for our clinical uniform. Students are required to provide own transportation. Grooming conditions apply. This course is designed for a mature student as real life medical conditions apply and students must behave professionally at all times. Students may earn certifications in medical assisting and EKG with this course.

Practicum in Health Science (CNA)– 8444**Credit: 2, Full Year****Grade: 11-12****Prerequisite: Principles of Health Science, and Health Science Theory**

This course is designed to develop knowledge and skills related to patient care in the health care field. Students will complete the C.N.A course and will be able to sit for the state exam. Students will be required to purchase scrubs and shoes for the clinical uniform. Students must have a social security card. Grooming conditions apply. This course is designed for mature students as real life medical conditions apply and students must behave professionally at all times. Students must be at least 16 years of age to be in the C.N.A. course and students must provide their own transportation to clinical sites.

Extended Practicum in Health Science – 8451**Credit: 3, Full Year****Grade: 11-12****Prerequisites: Principles of Health Science, Health Science Theory, and Biology.****Corequisite: Practicum in Health Science. This course must be taken concurrently with Practicum in Health Science and may not be taken as a stand-alone course.**

The practicum course is a paid or unpaid capstone experience for students participating in a coherent sequence of career and technical education courses in the Health Science Career Cluster. Students shall be awarded one credit for successful completion of this course. A student may repeat this course once for credit provided that the student is experiencing different aspects of the industry and demonstrating proficiency in additional and more advanced knowledge and skills. The Extended Practicum in Health Science course is designed to give students

practical application of previously studied knowledge and skills. Practicum experiences can occur in a variety of locations appropriate to the nature and level of experience.

Anatomy and Physiology – 8408**Credit: 1, Full Year****Grade: 11-12****Endorsement: STEM, Public Services**

Anatomy and Physiology is an advanced course recommended for students with a strong interest in science and good study skills. In this course, students conduct laboratory investigations and fieldwork. Students will study the structures and functions of the human body and body systems and will investigate the body's responses to forces; maintenance of homeostasis; electrical interactions; transport systems; and energy systems.

HOSPITALITY AND TOURISM CLUSTER**Principles of Hospitality and Tourism – 9224****Credit: 1, Full Year****Grade: 9-12****Prerequisite: None****Endorsement: Business and Industry**

This course provides an introduction to the many facets of the Hospitality & Tourism industry, including lodging; travel and tourism; recreation, amusements, attractions, and resorts; and restaurants and food and beverage service. Students will develop knowledge and skills to function effectively in various positions within this multi-faceted industry. Knowledge-based learning will extend beyond the classroom through hospitality related businesses in the community.

Travel and Tourism Management - 9124**Credit: 1, Full Year****Grade: 10-12****Prerequisite: Principles of Hospitality and Tourism****Endorsement: Business and Industry**

Come fly with us as we discover the world of travel and tourism! In this class you will investigate the airlines, international travel, cruising, and travel by rail, lodging, recreation, amusements, attractions, and resorts. Develop your communication skills, learn technology related to the travel industry, and create your own travel brochure. Learn what qualifications are required for employment and explore the many opportunities available in the travel and tourism industry.

Career Preparation I - 8374**Credit: 2, Full Year****Grade: 11-12****Prerequisite: 16 years of age; Student should see teacher prior to registration for materials and supplies.**

Are you ready to make money, leave school early, and get credit while on the job? Career Preparation is an occupationally specific, 2 credit course designed to provide an integrated academic training in the classroom and on the job in a paid position. Classroom instruction will cover occupational skills, critical thinking, creating a professional portfolio, teamwork, communication, ethical and legal responsibilities, time and money management, and entrepreneurship. Employment opportunities include education and childcare training, culinary arts, hospitality, interior design, and fashion. Students must provide their own transportation.

Career Preparation II - 8384**Credit: 2, Full Year****Grade: 12****Prerequisite: Career Preparation I and student should see teacher prior to registration for materials and supplies**

Career Preparation II is for seniors who have taken Career Preparation I and who want to continue a career path, leave campus early, and make money. Career Preparation is an occupationally specific, 2 credit course

designed to provide an integrated academic training in the classroom and on the job in a paid position. Classroom instruction will cover a more in-depth study of the occupational training; assist in instruction and mentoring first year students. Employment opportunities include education and childcare training, culinary arts, hospitality, interior design, and fashion. Students must provide their own transportation.

HUMAN SERVICES CLUSTER

Principles of Human Services - 8120

Credit: 1, Full Year

Grade: 9-12

Prerequisite: None

Endorsement: Public Services

Learn about life. Map out your future and start deciding what you want to do when you grow up. This comprehensive laboratory course enables students to investigate careers in the human services career cluster, including counseling and mental health, early childhood development, family and community, and personal care services. This introductory course provides practical information in the areas of self-discovery, relationships, consumer resource management, housing/interior design, child care and development, nutrition and food preparation, clothing selection and maintenance, and career preparation essential for becoming successful personally and in the work place.

Lifetime Nutrition and Wellness - 8224

Credit: ½, Semester

Grade: 10-12

Prerequisite: None

Endorsement: Public Services

Plan and prepare healthy meals. Learn to live a healthy lifestyle. This technical laboratory course concentrates on nutrition and food management skills promoting health and wellness. Instruction addresses menu planning for nutritionally balanced diets; strategies for managing diet related diseases; weight management and fitness; safety and sanitation in preparing and storing food; consumer management and fitness; consumer food buying strategies and budgeting and utilizing food labels. Students will investigate careers relating to nutrition and foods. The fully equipped lab facility allows students to demonstrate knowledge of food preparation management principles through laboratory experiences.

Child Development - 8344

Credit: 1, Full Year

Grade: 10-12

Prerequisite: None

Endorsement: Public Services

Do you like children? Are you interested in a career working with children? If you answered "yes", then this course is for you! This course focuses on the many areas of development of children from conception through childhood, including those children with special needs. Other topics include proper prenatal care, providing appropriate activities for children, as well as information on child care related careers.

Interpersonal Studies – 8324

Credit: ½, Semester

Grade: 9-12

Recommended prerequisite: Principles of Human Services, Principles of Hospitality and Tourism, Principles of Health Science, or Principles of Education and Training.

Endorsement: Public Service

Interpersonal Studies examines how the relationships between individuals and among family members significantly affect the quality of life. Students use knowledge and skills in family studies and human development to enhance personal development, foster quality relationships, promote wellness of family members, manage multiple adult roles, and pursue careers related to counseling and mental health services.

Parenting Education for School-Aged Parents I/II - 9234/9264

Credit: 1, Sem. - Full Year

Grade: 9-12

Prerequisite: None

This laboratory course is designed to address the special needs and interests of male and female students who are parents or who are pregnant. Special emphasis is placed on prenatal care and development, postnatal care, child development, infant care, and parenting skills. Students are provided opportunities to develop the knowledge and skills to become successful parents and to prepare for managing the multiple roles of student, parent, family member, and wage earner.

Family and Community Services (FACS I) - 9046

Credit: 1, Full Year

Grade: 11-12

Prerequisite: Student should see teacher prior to registration for materials and supplies.

Endorsement: Public Services

If you are interested in community service experiences, then this course is designed for you. Students will plan and implement community service activities through community service projects each semester. Through these service opportunities students will develop and enhance their organizational and leadership skills and characteristics. Opportunities will also be provided for students to mentor elementary and middle school students on their respective campuses. Students will explore careers, agencies, and organizations focusing on family services.

Project-Based Research (FACS II)- 8990

Credit: 1, Full Year

Grade: 11-12

Prerequisite: Student should see teacher prior to registration for materials and supplies.

Endorsement: Public Services

If you are interested in community service experiences, then this course is designed for you. Students will plan and implement community service activities through community service projects each semester. Through these service opportunities students will develop and enhance their organizational and leadership skills and characteristics. Opportunities will also be provided for students to mentor elementary and middle school students on their respective campuses. Students will explore careers, agencies, and organizations focusing on family services.

INFORMATION TECHNOLOGY CLUSTER

Principles of Cyber Security – 8880

Credit: 1, Full Year

Grade: 9-12

Prerequisite: None

This course develops the knowledge and skills needed to master fundamental concepts of cybersecurity. Students in the course will develop a basic foundation for continuing their cybersecurity education and choosing a career in the cybersecurity field.

Principles of Information Technology – 8833

Credit: 1, Full Year

Grade: 9-12

Prerequisite: None

This course develops the knowledge and skills needed to master fundamental concepts of Information Technology. Students in the course will develop a basic foundation for continuing their information technology education and choosing a career in the information technology field.

Digital Media - 8683

Credit: 1, Full Year

Grade: 10-12

Prerequisite: Principles of Arts & AV Technology or Graphic Design

Endorsement: Business and Industry

Through the study of digital and interactive media and its application in information technology, students will analyze

and assess current and emerging technologies, while designing and creating multimedia projects that address customer needs and resolve a problem. Students implement personal and interpersonal skills to prepare for a rapidly evolving workplace environment. The knowledge and skills acquired and practiced will enable students to successfully perform and interact in a technology-driven society. Students enhance reading, writing, computing, communication, and critical thinking and apply them to the information technology environment. Strong focus is on Broadcast Journalism Production.

Information Technology and Security Academy - 9065

Credit: 3, Full Year

Prerequisite: TSI/ Application/Dual Credit. This course is offered at Central Texas Technology Center. See Counselor for enrollment packet

Endorsement: Business and Industry, Public Services

(ITSA) is a dual credit program for high school juniors and seniors sponsored by the Alamo Community College District. The goal of the program is to provide students with an introductory experimental and didactic curriculum in Information Security and Assurance. Students receive specialized instruction and training from college professors in Information Technology, Operating Systems, Networking, Information Security, and Computer Programming. In addition, the students are eligible to participate in the Summer Internship Program, which provides them with the opportunity to utilize their knowledge, skills, and abilities in a "real-world" work environment. The students acquire high school and 27 hours of technical college level credit, and at the conclusion of the program, they earn a Certificate of Completion in Information Security and Assurance from the Alamo Community College District. ITSA will be offered at the Central Texas Technology Center.

LAW, PUBLIC SAFETY, CORRECTIONS, AND SECURITIES CLUSTER

Principles of Law, Public Safety, Corrections and Security - 8570

Credit: 1, Full Year

Grade: 9-12

Prerequisites: None

Endorsement: Public Services

Have you ever considered a career as a police officer, firefighter or judge? Come explore the possibilities of the criminal justice system. This course is an overview of the various professions in the field of public safety. The students will explore the various opportunities and requirements of professions in the law enforcement industry. Students will participate in some hands on activities that will allow them to experience various aspects of the public safety professions.

Law Enforcement I - 8904

Credit: 1, Full Year

Grade: 10-12

Prerequisites: Principles of Law, Public Safety, Corrections and Security

Endorsement: Public Services

This course will provide a general overview of current law enforcement procedures, communication skills, criminal law, law enforcement terminology, traffic stops, basic field notes and police incident report writing; and basic crime scene procedures. The course will also include an overview of the history, organization and functions of local, state, and federal law enforcement. This class will involve hands-on training with equipment commonly used in the field of law enforcement.

Law Enforcement II - 8924

Credit: 1, Full Year

Grade: 11-12

Prerequisites: Law Enforcement I

Endorsement: Public Services

This course will provide knowledge and skills necessary to prepare for a career in law enforcement. The study of common police procedures telecommunications, advanced field note taking and report writing; use of force; arrest procedures; search and pat down procedures; crowd control; accident investigations felony traffic stops; courtroom testimony. The course will also include the ethical and legal responsibilities of law enforcement officers. This course will include role-playing and hands on learning with commonly used law enforcement equipment.

Criminal Investigation - 8926

Credit: 1, Full Year

Grade: 10-12

Recommended prerequisite: Principles of Law, Public Safety, Corrections, and Security.

Endorsement: Public Services

Criminal Investigation is a course that introduces students to the profession of criminal investigations. Students will understand basic functions of criminal investigations and procedures and will learn how to investigate or follow up during investigations. Students will learn terminology and investigative procedures related to criminal investigation, crime scene processing, evidence collection, fingerprinting, and courtroom presentation. Through case studies and simulated crime scenes, students will collect and analyze evidence such as fingerprint analysis, bodily fluids, hairs, fibers, shoe and tire impressions, bite marks, drugs, tool marks, firearms and ammunition, blood spatter, digital evidence, and other types of evidence.

Federal Law Enforcement and Protective Services - 8920

Credit: 1, Full Year

Grade: 10-12

Recommended prerequisite: Principles of Law, Public Safety, Corrections, and Security.

Endorsement: Public Services

Students shall be awarded one credit for successful completion of this course. Federal Law Enforcement and Protective Services provides the knowledge and skills necessary to prepare for certification in security services for federal law enforcement and protective services. The course provides an overview of security elements and types of organizations with a focus on security measures used to protect lives, property, and proprietary information, to ensure computer security, to provide information assurance, and to prevent cybercrime.

Correctional Services - 8914

Credit: 1, Full Year

Grade: 10-12

Recommended prerequisite: Principles of Law, Public Safety, Corrections, and Security.

Endorsement: Public Services

In Correctional Services, students prepare for certification required for employment as a municipal, county, state, or federal correctional officer. Students will learn the role and responsibilities of a county or municipal correctional officer; discuss relevant rules, regulations, and laws of municipal, county, state, or federal facilities; and discuss defensive tactics, restraint techniques, and first aid procedures as used in the municipal, county, state, or federal correctional setting. Students will analyze rehabilitation and alternatives to institutionalization for inmates.

Forensic Science - 9249

Credit: 1, Full Year

Prerequisite: Biology & Chemistry. Completion or concurrent enrollment in any Law, Public Safety, Corrections, and Security Career Cluster course is recommended.

Endorsement: STEM

Forensic Science is a course that introduces students to the application of science to connect a violation of law to a specific criminal, criminal act, or behavior and victim. Students will learn terminology and procedures related to the search and examination of physical evidence in criminal cases as they are performed in a typical crime laboratory. Using scientific

methods, students will collect and analyze evidence such as fingerprints, bodily fluids, hair, fibers, paint, glass, and cartridge cases. Students will also learn the history and the legal aspects as they relate to each discipline of forensic science.

Practicum in Law, Public Safety, Corrections and Security – 8908
Credit: 2, Full Year **Grade: 11-12**

Recommended Prerequisite: Successful completion of one Criminal Justice course.

Endorsement: Public Service

The practicum course is designed to give students supervised practical application of previously studied knowledge and skills. Practicum experience. Possible practicum locations may include the following: New Braunfels Police Department, Comal County Sheriff's Office, jail, Communication Center, Court House and Probation Department. Students may be required to submit a background check.

MANUFACTURING CLUSTER

Advanced Manufacturing and Technology Academy - 9035/9135

Credit: 3, Full Year **Grade: 11-12**

Prerequisite: TSI/Application. This course is offered at Central Texas Technology Center. Apply Texas Application required. See Counselor for enrollment packet.

MARKETING CLUSTER

Principles of Business Marketing and Finance - 8668

Credit: 1, Full Year **Grade: 9-12**

Prerequisite: None

Endorsement: Business and Industry

Do you like to shop? Sharpen your shopping skills while learning about advertising, marketing and finance. In this class you will learn how to improve your talents, abilities and business skills. Are you a trendsetter? Would you like to own your own business? Put your imagination to work when planning investment and advertising strategies.

Entrepreneurship – 8666

Credit: 1, Full year **Grade: 10-12**

Prerequisite: None

Endorsement: Business and Industry

In Entrepreneurship, students will gain the knowledge and skills needed to become an entrepreneur. Students will learn the principles necessary to begin and operate a business. The primary focus of the course is to help students understand the process of analyzing a business opportunity, preparing a business plan, determining feasibility of an idea using research, and developing a plan to organize and promote the business and its products and services. In addition, students will understand the capital required, the return on investment desired, and the potential for profit.

STEM CLUSTER

Principles of Applied Engineering - 8774

Credit: 1, Full Year **Grade: 9-12**

Prerequisite: None

Endorsement: STEM

Principles of Engineering and Technology will offer the student the opportunity to gain knowledge and skills in the fields of science, engineering, mathematics and technology by completing assignments and projects using a variety of hardware and software. The student will investigate available opportunities and careers in these fields. Furthermore, the student will be a part of a variety of problem solving activities including a design team that will participate in a cumulative

project that involves the development, testing, and presentation of a model while following appropriate safety guidelines.

Robotics I – 8929

Credit: 1, Full Year

Grade: 10-12

Prerequisite: None

Endorsement: STEM

In Robotics I, students will transfer academic skills to component designs in a project-based environment through implementation of the design process. Students will build prototypes or use simulation software to test their designs. Additionally, students will explore career opportunities, employer expectations, and educational needs in the robotic and automation industry.

Robotics II – 8930

Credit: 1, Full Year

Grade: 10-12

Prerequisite: Robotics I

Endorsement: STEM

In Robotics II, students will explore artificial intelligence and programming in the robotic and automation industry. Through implementation of the design process, students will transfer academic skills to component designs in a project-based environment. Students will build prototypes and use software to test.

Engineering Design and Problem Solving – 9009

Grade: 11-12

Credit: 1, Full Year

Prerequisite: Algebra I and Geometry. Two Science, Technology, Engineering, and Mathematics (STEM) Career Cluster credits recommended.

Endorsement: STEM

The Engineering Design and Problem Solving course is the creative process of solving problems by identifying needs and then devising solutions. The solution may be a product, technique, structure, or process depending on the problem. Science aims to understand the natural world, while engineering seeks to shape this world to meet human needs and wants. Engineering design takes into consideration limiting factors or "design under constraint." Various engineering disciplines address a broad spectrum of design problems using specific concepts from the sciences and mathematics to derive a solution. The design process and problem solving are inherent to all engineering disciplines.

Engineering Design and Presentation I – 8934

Credit: 1, Full Year

Grade: 10-12

Prerequisite: Principles of Applied Engineering AND teacher recommendation required

Endorsement: STEM

Students enrolled in this course will demonstrate knowledge and skills of the process of design as it applies to engineering fields using multiple software applications and tools necessary to produce and present working drawings, solid model renderings, and prototypes. Students will use a variety of computer hardware and software applications to complete assignments and projects. Through implementation of the design process, students will transfer advanced academic skills to component designs. Additionally, students explore career opportunities in engineering, technology, and drafting and what is required to gain and maintain employment in these areas.

TRANSPORTATION, DISTRIBUTION, AND LOGISTICS CLUSTER

Principles of Transportation Systems - 8554

Credit: 1, Full Year

Grade: 9-12

Prerequisites: None

Endorsement: Business and Industry

In Principles of Transportation Systems, students will gain knowledge and skills in the safe application, design, production, and assessment of products, services, and systems. This knowledge includes the history, laws and regulations, and common practices used in the transportation industry. Students should apply knowledge and skills in the application, design, and production of technology as it relates to the transportation industries. This course allows students to reinforce, apply, and transfer their academic knowledge and skills to a variety of interesting and relevant activities, problems, and settings.

Automotive Basics - 8503**Credit: 1, Full Year****Grade: 9-12****Prerequisites: None****Endorsement: Business and Industry**

The businesses and industries of the Transportation, Distribution, and Logistics cluster are rapidly expanding to provide new career opportunities. Students will need to understand the interaction between various vehicle systems, the logistics used to move goods and services to consumers, and the components of transportation infrastructure. Performance requirements will include academic and technical skills. Students prepared to meet the expectations of employers in this industry must be able to interact and relate to others and understand the technologies used in order to provide products and services in a timely manner. The increasing demand for employees will provide growth potential. This course allows students to reinforce, apply, and transfer their academic knowledge and skills to a variety of interesting and relevant activities, problems, and settings.

Automotive Technology - 8504**Credit: 2, Full Year****Grade: 10-12****Prerequisites: Automotive Basics****Endorsement: Business and Industry**

Automotive services include knowledge of the function of the major automotive systems and the principles of diagnosing and servicing these systems. In Automotive Technology, students gain knowledge and skills in the repair, maintenance, and diagnosis of vehicle systems. This study allows students to reinforce, apply, and transfer academic knowledge and skills to a variety of interesting and relevant activities, problems, and settings. The focus of this course is to teach the theory of operation of automotive vehicle systems and associated repair practices.

Automotive Technology II - 8534**Credit: 2, Full Year****Grade: 11-12****Prerequisites: Automotive Technology**

It is the policy of Comal Independent School District not to discriminate on the basis of race, color, national origin, sex or disability in its career and technical education programs, services or activities as required by Title VI of the Civil Rights Act of 1964, as amended; Title IX of the Education Amendments of 1972; and Section 504 of the Rehabilitation Act of 1973, as amended.

Es norma de Comal Independent Distrito Escolar no discriminar por base de raza, color, origen nacional, sexo o impedimento, en sus programas de Educación y Carreras Técnicas servicios o actividades vocacionales, tal como lo requiere el Título VI de la enmienda de la Ley de Derechos Civiles de 1964, el Título IX de las enmiendas de Educación, de 1972, y las enmiendas de la Sección 504 del Acta de Rehabilitación de 1973.

Endorsement: Business and Industry

Automotive services include advanced knowledge of the function of the major automotive systems and the principles of diagnosing and servicing these systems. In Advanced Automotive Technology, students gain knowledge and skills in the repair, maintenance, and diagnosis of vehicle systems. This study allows students to reinforce, apply, and transfer academic knowledge and skills to a variety of interesting and relevant activities, problems, and settings. The focus of this course is to teach the theory of operation of automotive vehicle systems and associated repair practices.

Practicum in Transportation Systems - 8514**Credit: 2, Full Year****Grade: 12****Prerequisites: Fee Skills USA/ personal transportation required to work site/Student MUST see teacher BEFORE registering for this course.****Endorsement: Business and Industry**

Students will be assigned to a Dealership or Approved Independent Repair. This is an on the job training program for high school students who are interested in a career related to the Automotive field. Students will work in a paid or unpaid position during the duration of the program. Students must provide their own transportation. The classroom instruction reinforces self-awareness, occupational skills, technology skills, effective time management and an emphasis on skills necessary to be successful in the automotive field. Students will complete AYES work journals and a portfolio. Students are required to work a minimum of 15 hours a week Monday through Friday, be 16 years of age and work in an approved training sitting.

Introduction to Aircraft Technology - 8810**Credit: 1, Full Year****Grade: 9-12****Prerequisites: None****Endorsement: Business and Industry**

Students will provide the foundation for advanced exploration in the areas of flying, aerospace engineering, and unmanned aircraft systems. Student will learn about engineering practices, problem solving, and the innovations and technological developments that have made today's aviation and aerospace industries possible. Student will also learn about the wide variety of exciting and rewarding careers available to them. This course will inspire students to consider aviation and aerospace careers while laying the foundation for continued study in future grade levels.
