**Subject:** Digital Learning Technology

As Cypress School District transitions to distance learning during the COVID-19 pandemic, we need to identify students who do not have access to a technology device and/or internet so we may provide other options.

Any internet-connected computer, laptop, or tablet can be used for at-home learning. If your household does not have a device or internet access that your child(ren) may use, please take our [Distance Learning Technology](#) questionnaire.

To help us meet these needs in a timely manner, please complete the questionnaire by Thursday, March 26, 2020.

For those who need it, printed student work packets will be made available.

Please remember that distance learning will look different throughout the district, and we appreciate your patience and flexibility as your teachers shift to a new model for all students.
