

What Goes On Your Board?

Note: All sections can be taken from your science fair booklet.

- All text should be printed from a computer or typewriter, not written.
- All fonts should be the same throughout (unless changed for artistic impression).
- Fonts should be 18 or larger (or large enough to see from a distance away).
- Writing directly on your board is a bad idea (unless you are adding an artistic touch).
- **YOUR NAME MUST NOT APPEAR** on the front of your board.
- You may use a subtitle to more fully explain your project title.
- Printed headings for each section are encouraged.
- Choose a 2- or 3-color combination for your board and use it throughout.
- If possible, attach parts of your experiment onto your board.
- Remember, NEATNESS counts!

It is a good idea to include at least one picture of some part of your project on your board, large enough to be easily seen (you may be in the picture).
