

Students

Concepts and Roles in Student Personnel

Because the focus of the school system is on the student, it is incumbent upon the Governing Board and district staff to provide for the physical and intellectual welfare of the students in their charge. The school district shall work closely with parents/guardians and the community in order to achieve a harmony of interests in providing for students' needs.

Students are expected to accept personal responsibility for making maximum use of those educational opportunities afforded. It is also expected that as a result of the total school experience, students will come to appreciate the values of self-discipline, responsibility, respect for others, their country and its governmental processes.

The Board will attempt to erase any limitations of facilities and means that stand in the way of all who wish to learn in this school system.

Discrimination among students applying for admission to or attending district schools with respect to color, creed, race, sex, religion, ancestry, handicap, or national origin is prohibited.

(cf. 5145.3 - Nondiscrimination)
