Weekly Construction Status Update

Center Line Public Schools
Bid Package 18-3
Peck Elementary
&
Early Childhood Center

September 27, 2019
Structure 31 in the ball field. The tap into the existing storm line was made inside the structure.
8’ diameter pipe sections for the storm water detention system are being delivered. We will start building the system next week.
The sand base has been compacted, underground plumbing is installed and state inspected, underground electrical conduits are installed and the vapor barrier is in place for the concrete floor placement in the upper elementary.
Masonry bearing walls continue to be built. Looking north in corridor C124.
Progress Overview

Looking north in corridor A121. Masonry bearing walls are completed.
Two Week Look Ahead

- Site storm water pipe is scheduled to begin 9/30 in the detention system.
- Masons will complete bearing walls in area C Friday 10/4 and continue working in the media area.
- Steel erection will resume 10/7 in areas A & C.
- Concrete placement for floor slabs in area F will be placed next week.
- Underground conduit installation will begin in area A.
