# Safe Schools and Healthy Students

**SPECIAL GUEST SPEAKER**

## **Lt. Col. Dave Grossman (Ret.)**

No child has died in a school fire in fifty years. How many have died from school violence? Far too many. Lt. Col. Grossman turns his research on the psychology of violence inside out, applying the lesson he's learned into a presentation whose core thesis everyone can agree on: We must protect the children who have been entrusted to our care.

And that means facing some uncomfortable facts, including violent children, terrorists, and the lagging security systems when something does happen. Taking into context the tragedies of school massacres from Jonesboro to Columbine and further, Col. Grossman outlines a series of foolproof strategies to help keep our kids safe, including immediate and long-term solutions.

Join us for a fact-filled presentation based on the most recent school safety research and offering vital response technologies for our community.
