

Parents and Guardians,

Does your child have a chronic medical condition, a food allergy or intolerance, or another type of allergy?

If so, it is important that we set up a time to talk. I am happy to chat by phone, in person, or through emails. I can do whatever is more convenient for you.

Knowing your child's conditions will allow me to treat them more effectively when they come to the clinic. It will help me to write care plans and work with the teachers to promote a healthy environment for your child.

Examples - *asthma, seasonal allergies, FOOD allergies, extreme allergies (anaphylaxis), acid reflux, migraines, chronic ear or sinus infections, lactose intolerance, ADHD/ADD, autism, eczema or other skin issues, hearing or vision problems.*

We really need to know about any food allergies to help with the school lunch program. We don't want your child to get something in their lunch that they are allergic to or have an intolerance to.

The catering company is looking at substitutions needed for children with allergies. They are also checking into the possibility of getting soy milk for lunches to help with those that are intolerant to cow's milk.

Please contact me with any confirmed food allergies or intolerances so I can share the information with them,

We want your child to have a safe, healthy, and happy school experience.

Thank you,
Monique Griffis, RN
School Nurse
