

Kelsi's High School Science Lab Workshop Syllabus

This workshop is designed to support high school students in understanding and growing both their scientific knowledge and their laboratory skills. We will be covering a variety of disciplines including Biology, Chemistry, Environmental Sciences, Zoology, Botany and Geology throughout the year. If you are a high school student enrolled in ANY science course through your mentor then this is the class for you. Our time will be spent focusing on hands on laboratory activities that will encourage us to be curious, creative problem solvers.

*High School Science has a 20% laboratory time requirement and this course is designed to fulfill that requirement.

Laboratory Expectations:

- 1) Be on time and be prepared to participate
- 2) Absolutely no cell phone use during workshop hours
- 3) Respect others
- 4) Complete Safety test and contract and abide by those rules at all times while in the lab

There is no book requirement, but students will be required to keep a laboratory notebook as a record of their participation and efforts for their mentor teacher.

Please contact me at any time if you have any questions.

Thank you,

Kelsi Williams
