

**Nampa School District No. 131
Custodial & Light Maintenance Services Request for Proposal May 2018**

Addendum #5

Appendix C—Equipment Currently Deployed

This listing of equipment currently deployed at District sites is provided for convenience and reference only. It should not be construed as a complete list of equipment necessary to adequately perform any or all services required under this Request for Proposals.

Certain pieces of equipment listed on an inventory survey of equipment have been omitted from this list; such omission may be due to any or all of:

- Item deemed not relevant to the duties described in this request
- Type of equipment not discernable from inventory survey description provided
- Function of equipment not discernable from inventory survey description provided
- Quantity of equipment deemed not relevant to performance of duties under this request (i.e. one or two small items incidental to the building)

This list is based on equipment inventory as reported by building leads employed by the current contractor; those reports omit one school altogether (Columbia High School). Bidders are strongly cautioned against reliance on this list for formulating their proposals.

District will make available to the contractor any and all equipment under its ownership, not otherwise committed to other uses, deemed to be of use in executing the duties under the agreement. District does not and will not warrant or otherwise guarantee the fitness for use of any equipment or item under its ownership for use in executing duties under the agreement.

This table is available as a stand-alone Excel file in the Custodial & Light Maintenance RFP folder on the District's website, titled Equipment Currently Deployed—Table Only.
