

Dear Parents/Guardians,

It is important for communication between the school and the parents\guardians to occur whenever possible. Current contact information, such as address, phone and email are vital tools to keep parents informed of your student(s) academic performance, alert you of any emergencies and weather closures.

In an effort to improve home-school communication Port Arthur ISD is requesting parents/guardians update contact information. Port Arthur ISD can also communicate with you though email. Communicating with parents directly via email is far more reliable and faster than depending on students to deliver letters and notices home. Please update or provide your email address. We ask that you verify or provide a mobile number if we do not already have one on file. In addition to email notifications, we can send text messages to inform you of your student attendance and emergence alerts. We will maintain our present system for those parents who express a preference for paper-based communication but the benefits as outlined above are undeniable reliable.

PAISD hope that you will join us in our efforts to communicate electronically.

Thank you,

PAISD Technology Department
