

CHSD 218 CTE DUAL CREDIT PROGRAM

CHSD 218 Career & Technical Education Programs (CTE), in partnership with the Moraine Area Career System (MACS), Moraine Valley Community College (MVCC) and South Suburban College (SSC), offer CTE high school students an improved way to earn college credit while still in high school.

Approved CTE courses are offered to CHSD 218 high school students as dual credit courses. Dual credit enables students to enroll for college equivalent courses while concurrently enrolled in their high school CTE courses. An online application is required for enrollment. Students will receive both high school credit and college credit at MVCC if they successfully complete these courses with a grade of C or better.

By participating in the CTE Dual Credit Program, high school students can take advantage of these fantastic benefits:

- Reducing college costs by saving money on tuition and textbooks
- Getting a head start on a career program by earning college credit in high school
- Applying course credits and grades to both high school and college transcripts at the same time
- Accelerating academic progress with challenging college-level coursework
- Eliminating the need to travel to a college campus to receive college credits
- Explore exciting career pathways
- Acquiring cutting-edge technical expertise and workplace skills

For more information, please visit Moraine Valley Community College website:
