

The Fourth Grade Teachers are looking forward to meeting you in August. We are sending home this list of supplies so that you may start your year off as prepared as possible.

Due to the lack of funding from the state, our classroom supply budgets have been greatly decreased. It is more important than ever that your student comes prepared with the supplies on this list.

On the back side of this paper is a sample of a multiplication time test. It is imperative that your child knows their multiplication facts fluently before entering fourth grade. All the fourth grade math is based on the knowledge of multiplication facts. Please use this sample to practice over the summer.

Thank you in advance for your support,

The Fourth Grade Team

Each Student Needs
