

**Canaan Christian Academy
Asbestos**

School Year 2018-2019

To: Parents, Teachers and Employees of
Canaan Christian Academy

From: Michael T. Boole, Principal & LEA AHERA Designee

.....
The United States government has mandated by law that all elementary and secondary schools be inspected for asbestos.

As a result, Canaan Christian Academy retained ATEC Environmental Services to perform the asbestos inspection of our facility. The finding, in capsule, is stated below in a quote from their report.

“Careful inspection of each area found no friable suspected ACM. Material conditions were found to be very good with little potential for damage. Samples tested support these findings. It is hereby documented that Canaan Bible Chapel and Academy contain no friable suspected materials.”

The full report is available for inspection in the office.

Sincerely,

Michael T. Boole
Principal
