**Question #1:** At Sherman we are keeping one of the existing playground pits. It says "area to be maintained but equipment replaced". Do you also want us to replace the borders with concrete? If so, is keeping the fence on the west side acceptable as a border?

**Revised Answer #1:** Yes, we want to replace it with concrete borders on all four sides. Nampa School District staff will remove the fence and replace the fencing. The concrete border should have sleeves for receiving the fence posts in the design to allow Nampa School District staff to replace the fence or install the post (Nampa will provide the post).

**Question #2:** At Sherman, Do you want us to add an ADA ramp to this pit as well?

**Answer #2:** Yes, we need to include ADA ramp on all new playground construction.

**Question #3:** In the case that our new playground footprint does not expand past the existing pit, are we responsible for backfill and seed/laying sod or will the district take care of that?

**Answer #3:** The district landscaping team will be responsible for any backfill and seed/laying sod if the footprint does not match the previous area.
