Job Title: Pattern Designer

Career Pathway: Fashion Design and Merchandising

Industry Sector: Fashion and Interior Design

O*NET-SOC CODE: 27-1022.0

CBEDS Title: Fashion Textiles and Apparel

CBEDS No.: 4331

Course Outline

74-55-80

Fashion/4

Credits: 15

Hours: 180

Course Description:
This competency-based course is the last in a sequence of four designed for fashion. It provides students with project-based experiences in apparel history, design, and manufacturing. Technical instruction includes an introduction and reviews of workplace safety policies and procedures, resource management, employability skills, and entrepreneurship. Emphasis is placed on the historical inspiration of fashion and costumes, textile technology, manual and computerized grading, design techniques and manufacturing techniques. The competencies in this course outline are aligned with the California High School Academic Content Standards and the California Career Technical Education Model Curriculum Standards.

Prerequisites:
Enrollment requires successful completion of the Fashion/3 (74-55-70) course.

NOTE: For Perkins purposes this course has been designated as a capstone course.

This course cannot be repeated once a student receives a Certificate of Completion.
COURSE OUTLINE COMPETENCY-BASED COMPONENTS

A course outline reflects the essential intent and content of the course described. Acceptable course outlines have six components. (Education Code Section 52506). Course outlines for all apportionment classes, including those in jails, state hospitals, and convalescent hospitals, contain the six required elements:

(EC 52504; SCCR 10508 [b]; Adult Education Handbook for California [1977], Section 100)

COURSE OUTLINE COMPONENTS

GOALS AND PURPOSES

The educational goals or purposes of every course are clearly stated and the class periods are devoted to instruction. The course should be broad enough in scope and should have sufficient educational worth to justify the expenditure of public funds.

The goals and purpose of a course are stated in the COURSE DESCRIPTION. Course descriptions state the major emphasis and content of a course, and are written to be understandable by a prospective student.

PERFORMANCE OBJECTIVES OR COMPETENCIES

Objectives should be delineated and described in terms of measurable results for the student and include the possible ways in which the objectives contribute to the student’s acquisition of skills and competencies.

Performance Objectives are sequentially listed in the COMPETENCY-BASED COMPONENTS section of the course outline. Competency Areas are units of instruction based on related competencies. Competency Statements are competency area goals that together define the framework and purpose of a course. Competencies fall on a continuum between goals and performance objectives and denote the outcome of instruction.

Competency-based instruction tells a student before instruction what skills or knowledge they will demonstrate after instruction. Competency-based education provides instruction which enables each student to attain individual goals as measured against pre-stated standards.

Competency-based instruction provides immediate and continual repetition and in competency-based education the curriculum, instruction, and assessment share common characteristics based on clearly stated competencies. Curriculum, instruction and assessment in competency-based education are: explicit, known, agreed upon, integrated, performance oriented, and adaptive.
COURSE OUTLINE COMPETENCY-BASED COMPONENTS
(continued)

COURSE OUTLINE COMPONENTS

INSTRUCTIONAL STRATEGIES

Instructional techniques or methods could include laboratory techniques, lecture method, small-group discussion, grouping plans, and other strategies used in the classroom.

Instructional strategies for this course are listed in the TEACHING STRATEGIES AND EVALUATION section of the course outline. Instructional strategies and activities for a course should be selected so that the overall teaching approach takes into account the instructional standards of a particular program, i.e., English as a Second Language, Programs for Adults with Disabilities.

UNITS OF STUDY, WITH APPROXIMATE HOURS ALLOTTED FOR EACH UNIT

The approximate time devoted to each instructional unit within the course, as well as the total hours for the course, is indicated. The time in class is consistent with the needs of the student, and the length of the class should be that it ensures the student will learn at an optimum level.

Units of study, with approximate hours allotted for each unit are listed in the COMPETENCY AREA STATEMENT(S) of the course outline. The total hours of the course, including work-based learning hours (community classroom and cooperative vocational education) is listed on the cover of every CBE course outline. Each Competency Area listed within a CBE outline is assigned hours of instruction per unit.

EVALUATION PROCEDURES

The evaluation describes measurable evaluation criteria clearly within the reach of the student. The evaluation indicates anticipated improvement in performances as well as anticipated skills and competencies to be achieved.

Evaluation procedures are detailed in the TEACHING STRATEGIES AND EVALUATION section of the course outline. Instructors monitor students’ progress on a continuing basis, assessing students on attainment of objectives identified in the course outline through a variety of formal and informal tests (applied performance procedures, observations, and simulations), paper and pencil exams, and standardized tests.

REPETITION POLICY THAT PREVENTS PERPETUATION OF STUDENT ENROLLMENT

After a student has completed all the objectives of the course, he or she should not be allowed to reenroll in the course. There is, therefore, a need for a statement about the conditions for possible repetition of a course to prevent perpetuation of students in a particular program for an indefinite period of time.
ACKNOWLEDGMENTS

Thanks to NAZELI ZELYAN for developing and editing this course outline, and to ERICA ROSARIO for designing the original artwork for the course covers.

CALIFORNIA CAREER TECHNICAL EDUCATION MODEL CURRICULUM STANDARDS
Fashion and Interior Design Industry Sector
Knowledge and Performance Anchor Standards

1.0 Academics
Analyze and apply appropriate academic standards required for successful industry sector pathway completion leading to postsecondary education and employment. Refer to the Fashion and Interior Design academic alignment matrix for identification of standards.

2.0 Communications
Acquire and accurately use Fashion and Interior Design sector terminology and protocols at the career and college readiness level for communicating effectively in oral, written, and multimedia formats.

3.0 Career Planning and Management
Integrate multiple sources of career information from diverse formats to make informed career decisions, solve problems, and manage personal career plans.

4.0 Technology
Use existing and emerging technology to investigate, research, and produce products and services, including new information, as required in the Fashion and Interior Design sector workplace environment.

5.0 Problem Solving and Critical Thinking
Conduct short, as well as more sustained, research to create alternative solutions to answer a question or solve a problem unique to the Fashion and Interior Design sector using critical and creative thinking, logical reasoning, analysis, inquiry, and problem-solving techniques.

6.0 Health and Safety
Demonstrate health and safety procedures, regulations, and personal health practices and determine the meaning of symbols, key terms, and domain-specific words and phrases as related to the Fashion and Interior Design sector workplace environment.

7.0 Responsibility and Flexibility
Initiate, and participate in, a range of collaborations demonstrating behaviors that reflect personal and professional responsibility, flexibility, and respect in the Fashion and Interior Design sector workplace environment and community settings.

8.0 Ethics and Legal Responsibilities
Practice professional, ethical, and legal behavior, responding thoughtfully to diverse perspectives and resolving contradictions when possible, consistent with applicable laws, regulations, and organizational norms.

9.0 Leadership and Teamwork
Work with peers to promote divergent and creative perspectives, effective leadership, group dynamics, team and individual decision making, benefits of workforce diversity, and conflict resolution as practiced in the career technical student organization (such as FHA-HERO, the California Affiliate of FCCLA).

10.0 Technical Knowledge and Skills
Apply essential technical knowledge and skills common to all pathways in the Fashion and Interior Design sector, following procedures when carrying out experiments or performing technical tasks.

11.0 Demonstration and Application
Demonstrate and apply the knowledge and skills contained in the Fashion and Interior Design anchor standards, pathway standards, and performance indicators in classroom, laboratory and workplace settings and through the career technical student organization (such as FHA-HERO, the California Affiliate of FCCLA).
Fashion and Interior Design
Pathway Standards

A. Fashion Design and Merchandising Pathway
The Fashion Design and Merchandising pathway focuses on the major aspects of the fashion industry and prepares students for careers and/or postsecondary education in this rapidly growing field. Students pursuing this career pathway have in-depth, hands-on experiences that focus on industry awareness, sustainable practices, elements and principles of design, history of fashion, fashion forecasting, textiles and textile products, product knowledge, apparel merchandising, and garment production.

Sample occupations associated with this pathway:
- Display or Sales Associate
- Merchandising Manager
- Fashion Designer

A1.0 Understand various aspects of the fashion design, manufacturing, merchandising, and retail industry and the industry’s role in local, state, national, and global economies.

A2.0 Understand basic hiring practices, operational policies, procedures, and regulatory requirements in the fashion design, manufacturing, merchandising, and retail industry.

A3.0 Understand the principles of organizational management, including the roles and responsibilities of management and employees.

A4.0 Apply the elements and principles of design in various aspects of the fashion industry.

A5.0 Understand how the history of social, cultural, political, economic, and technological changes influence fashion.

A6.0 Understand the characteristics, production, and maintenance of textiles and the use of sustainable practices.

A7.0 Understand how trends, color, and societal forecasting are used in the fashion industry.

A8.0 Understand the principles and techniques used in fashion design and product development and manufacturing.

A.9.0 Understand the skills and procedures necessary for sales, marketing, and branding in the fashion industry.

A10.0 Understand visual merchandising and product styling.

A11.0 Understand the current laws, work site policies, and systems for inventory control and loss prevention.

A12.0 Understand important aspects of the beauty industry.

### B. RESOURCE MANAGEMENT REVIEW

Review, apply, and evaluate the basic principles of resource management used in fashion design and manufacturing.

1. Review the following:
   a. resources
   b. management
   c. sustainability

2. Review the importance of proper management of the following resources in the fashion design and manufacturing business:
   a. time
   b. materials
   c. personnel

3. Review specific examples of effective management of the following resources in the fashion design and manufacturing business:
   a. time
   b. materials
   c. personnel

4. Review the benefits of effective resource management in the fashion design and manufacturing business:
   a. profitability
   b. sustainability
   c. company growth

5. Review the economic benefits and liabilities of managing resources in an environmentally responsible way.

</thead>
</table>

3. Compare and contrast the following natural fibers:
   a. cotton
   b. linen
   c. silk
   d. wool

4. Identify the following:
   a. fabric pattern repeat and/or border
   b. fabric finishes and washes
   c. fabrics that require special handling during production
   d. process for developing a new print and approving a strike-off
   e. process for developing custom colors and approving lab dips
   f. grey goods

5. Discuss and demonstrate the following:
   a. locating selvage, straight grain, cross grain, and bias
   b. testing interfacings to determine which is appropriate for various fabric types and garment construction
   c. creating a sample fabric book that features appropriate fabrics with various styles

(25 hours)

### E. GRADING

Understand, apply, and evaluate techniques used to identify and chart different grades.

1. Describe the principles used in manual grading.
2. Request a United States Bureau of Standards publication for sizing.
3. Describe industry grading for various styles.
4. Describe grading for various brand affiliation of body types.
5. Describe growth to areas of the body.
6. Chart breakdown of growth in each area.
7. Describe different growth for body types.
8. Describe growth for different size ranges.
9. Make a grading chart (grade rule).

#### Manual Grading

10. Describe and demonstrate the following manual grading techniques:
   a. setting up the Dario Grad-O-Meter®
   b. attaching pattern pieces
   c. moving the pattern for grading
   d. reading the grade on the machine
   e. applying grade to pattern piece
   f. setting up grade chart of style
   g. grading basic bodice pattern
   h. grading basic skirt pattern
   i. applying grade to princess style
   j. applying grade to “A” line skirts
   k. grading sleeve types
   l. grading collars

| Problem Solving and Critical Thinking: 5.3, 5.4 |
| Technical Knowledge and Skills: 10.1, 10.2, 10.3, 10.6, 10.8, 10.9, 10.10, 10.16 |

**CTE Pathway:** A1.1, A1.2, A5.2, A6.1
