Students at Chowchilla Union High School Earn Industry Certifications

Students take important step in pursuing career goals by completing industry-recognized certifications

Chowchilla, California June 8th, 2018 - Chowchilla Union High School is pleased to recognize 16 students who earned industry certifications this academic year. Through the intensive certification program, these students have gained essential career skills in various Career and Technical Education (CTE) subject areas that will promote a successful transition to postsecondary education and the workforce.

Students with these certifications have received the necessary background and knowledge in their respective fields of interest that will lead them to a valuable and meaningful career. To earn the certification, each student completed the required coursework and passed a rigorous final exam.

Endorsed by industry experts such as Bayer CropScience, Express Employment Professionals and Southwest Airlines, and powered by iCEV, the certifications enhance student résumés and help them stand out to prospective colleges and employers. The certifications reflect current industry standards in order to ensure students are career-ready.

“Our goal in collaborating with industry partners to build certifications was to provide students with a meaningful, valuable validation of the skills they have developed through their course work,” said Dusty Moore, President, iCEV. “The certifications are meant to have an immediate positive impact on students as they plan for their future after high school, whether that is attending college or joining the workforce. On behalf of CEV Multimedia and our industry partners, we congratulate all students at Chowchilla Union High School for this tremendous accomplishment.”

The certification recipients include:

Alan Martinez - Southwest Airlines Professional Communications Certification
Ali Misleh - Southwest Airlines Professional Communications Certification

Andrea Jimenez - Southwest Airlines Professional Communications Certification
Beverly Goncalves - Southwest Airlines Professional Communications Certification
Christina Fuller - Southwest Airlines Professional Communications Certification
Cole Barron - EETC Principles of Small Engine Technology Certification
