*Re: Wash tank operating temperature*

*8/1/2018*

**Q:** What temperature does the machine operate at in the wash tank?

**A:** 160 degrees.

---

*Re: Rinse cycle temperature*

*8/1/2018*

**Q:** What temperature does the machine reach during the rinse cycle?

**A:** 180 to 185 degrees.

---

*Re: Rinse cycle time*

*8/1/2018*

**Q:** How long is the rinse cycle? (i.e. how many seconds is the rinse water running)

**A:** 20 seconds.

---

*Re: Machine type*

*8/1/2018*

**Q:** Are you using single tank machines, “door machines”, or conveyor machines?

**A:** Single tank.

**Re: Quaternary sanitizer use**

**8/1/2018**

**Q:** Is the quaternary sanitizer being used in the machine dishwashing process? Is it also being used in manual ware washing operations?

**A:** No, it is being used in a standard-depth three-compartment sink and in Santi buckets (approximately one gallon in volume). We want this set up to be dispensed with the water to ensure proper dilution (water/quat ratio).

Yes, we also use the quaternary sanitizer in manual ware washing.

---

**Re: Sanitizer use in dish machine**

**8/1/2018**

**Q:** What method are you using to ensure that adequate sanitizer is being used in the dish machine cycle?

**A:** The sanitizer is not used in the dish machine.
