**THE HEALTHY SCHOOLS ACT
2019-2020 ANNUAL NOTIFICATION OF PLANNED PESTICIDE USE**

The Healthy School Act requires that all public schools in California must at the beginning of each school year provide an annual notification to parents of their planned pesticide use. It also requires school districts to set up a registry so that concerned parents can sign up for advanced written notification prior to the application of any pesticide. Lastly, this new law requires school districts to post signs where pesticides are applied 24 hours before the application and to leave those signs in place for a 72-hour period after the application.

So that we maintain full compliance with the Healthy Schools Act, West Side Union Elementary School District has set up a registry procedure to allow those parents who would like prior notification of our intent to use pesticides in or around our school. Those who would like to register with the school district can contact the district office at lpalmieri@westsideusd.org.

The West Side Union Elementary School District will be applying the following at West Side School.

NAME OF PESTICIDE	ACTIVE INGREDIENTS
Advion Ant Gel	Indoxacarb
Advion Cockroach Gel Bait	Indoxacarb
Essentria IC3	Rosemary Oil, Geraniol, Peppermint Oil
Terad3 Ag Blox	Cholecalciferol
