

# ADULT SCHOOL

## Through Adult Education, Your Goals are within reach

### High School Diploma Classes

Classes are available that allow students to complete their high school diploma. This year our adult school has lowered their high school diploma requirements to 150 credits. This helps students to finish sooner. We want to congratulate those students who have earned a high school diploma this year and look forward to the graduation ceremony at the end of the school year. It is an exciting time to see students and their families celebrate this great accomplishment.

CLASS OF 2019

Rosa Salazar is one of this year's graduates from our high school diploma class. With the encouragement from her son, she has worked extremely hard to complete and successfully pass her test to graduate. She says, "I did it for my family to prove to them that anything is possible if you work hard, and if I can do it so can you!"

### Civics/ U.S. Citizenship Classes

This program is designed to accomplish two outcomes: To support students in their desire to increase their civic participation and to provide them with the knowledge and skills needed to pass the U.S. Citizenship Test.

Francisco Cruz is our first student to pass his citizenship test this year. He says, "This is an excellent class, and has an excellent teacher. He teaches all situations to pass the citizen interview class. I felt very comfortable going to my interviewing because of Mr. Jeff Fleury. He gave me the tools I needed to pass the test. I am excited to be a part of contributing feedback to my community."

We are so proud of Francisco and all of our students!

Snowline Adult School offers four free programs. We endeavor to offer courses tailored to the needs of our community. Our school exists to provide an opportunity for students who need to complete secondary education, refresh or acquire new skills, or simply speak with someone for guidance on what steps are needed to realize a career goal. Snowline Adult School is a community of learners where people come to learn, build relationships and get on the path needed towards those goals.

### Did You Know?

- Anyone 18 or over can enroll. You do not need to live within the Snowline Boundaries to attend.
- Day & night classes are offered to meet your educational needs.
- Classes are FREE!
- Our school is partnered with San Bernardino Workforce Development and can connect students with job openings, workshops, and vocational certification fee waivers, to name just a few of the program's benefits.

### English as a Second Language Classes

ESL students strive to obtain mastery of the English Language through a challenging and exciting curriculum. Our students are extremely motivated and supportive to one another when it comes to achieving their learning goals.

Marlene Strickland teaches one of our ESL classes and she says "It is my belief that the Adult Education classes are so successful for these students for several reasons. First, it is their choice to attend the classes. No one is coercing them to attend class. They do it because they have chosen to try to improve their lives. Secondly, the students realize an immediate positive effect in the "Real World." It could be improved ability to communicate at work, ability to help their family, or simply to improve the experience of a shopping trip. Finally, adult students cooperate and help each other to improve. Since they chose to be in class they work to make it the best experience possible. It is my honor and privileged to service our respectable Adult Ed communities."

### HISET®

### High School Equivalency Test

The HISET, an alternative to the GED, requires students to take tests in five subjects to demonstrate high school proficiency. The preparation class utilizes Aztec software to help determine whether students are ready to take an exam.
