

The Floresville ISD Education Foundation is pleased to announce the recipients of the 2017 Innovative Teaching Grants. In September, the Foundation announced that it would fund grants submitted by FISD teachers and administrators for a variety of innovative programs and projects to support higher levels of student learning. This year's funded grants will enhance student academic performance and support the objectives, goals, and initiatives of the Campus Action Plan.

The Foundation received 84 applications from teachers at all school levels - elementary, middle, high school, and alternative involving more than 125 teachers. A grant committee had the privilege to review all the applications and selected 56 grants to fund at this time.

On December 8, the Foundation awarded \$45,340.00 in grants to the following teachers and projects at each campus.
