

PROJECT EDUCATE *invites you to a complimentary workshop on*

# ASSISTIVE TECH & SOFT SKILLS

- Assistive technology: The latest devices, software and equipment that can help you overcome your challenges at school and work
- How the PA Office of Vocational Rehabilitation can possibly be able to assist you with obtaining assistive technology for school or work
- Soft skills: Attitudes, behaviors, perspectives, speech, and values that make one pleasant to work with and a valuable teammate
- Soft skill deficits typical of common disabilities and evidence-based methods of improving them for employment readiness
- Top soft skills employers look for when hiring younger persons
