

Kindergarten Art Enrichment

1. Trace your hand and use 5 different styles of lines to create a pattern to fill in the hand.

Examples of styles of lines - zigzag, curve, straight, broken,
loop de loop

2. Create a robot using geometric shapes. Can you name the geometric shapes you used and how many?
3. Create a primary color alien and his/her pet using only red, yellow and blue. Add primary color stars and planet to the background.
4. Draw a birdhouse using geometric shapes, add lines for detail, and use primary and secondary colors to color in.

First Grade Art Enrichment

1. Draw a still-life of your favorite stuffed animal. Add a horizon line to stop objects from floating and add color.
2. Sketch a giraffe with a long neck and add free form shapes for spots. Don't forget the horizon line! Add color.
3. Draw a silly monster and color using only secondary colors. How many legs, eyes, and arms does your monster have? What would you name your monster?
4. Kitchen Still-life : Search your kitchen for 3 still-life items. Sketch the items from observation and add your horizon line to ground the objects. Use your color knowledge to add color for a finishing touch!

Second Grade Art Enrichment

1. Peek out a window in your house and sketch a landscape you see. Remember to add background, middle ground and foreground in your picture. Add color.
2. Fold your paper in $\frac{1}{2}$. Draw $\frac{1}{2}$ of the body of a butterfly and add wings. Cut out your drawing while the paper is folded. Open your paper cut out to see your whole butterfly. Add shapes to create a mirror image on both wings. Decorate your butterfly.
3. Cool Cats and Hot Dogs: Fold a paper in half. Draw a cat on one side and a dog on the other. Color the cat using only cool colors, and the dog using only warm colors.
4. Sketch a sunset over water. Color the sky using warm colors and the water using cool colors. Find a way to add symmetry to your scene.

Third Grade Art Enrichment

1. Sketch a figure doing your favorite sport. Add motion lines to show movement. For fun, ask a family member to pose! Feel free to add props.
2. Positive and Negative Space:
Fold a paper in $\frac{1}{2}$. Trace your hand on both sides. Color the positive space, and on the other side, color only in the negative space (background).
3. Complementary Color:
Sketch an ice cream cone with 3 scoops of ice cream. Make a color pattern using a different set of complementary colors in each scoop. Yum!!

Complementary color sets: Red/Green
Blue/Orange
Yellow/Violet

4. Use your imagination, create a design using 2 of the above techniques.

Will you show movement?

Will you utilize positive and negative space?

Will you use complementary colors?

Fourth Grade Art Enrichment

1. Sketch a family member in proportion! Do you remember where the eyes should be placed? Color is optional.
2. Draw a horizon line and place a dot in the center of the line. This will be your vanishing point. Add a road coming from your vanishing point to the bottom of the paper. Add a city skyline above the horizon line. Add details and color.

What is the name of your city?

What time of day is it?

3. Sketch or trace a circle. Add a horizon line on each side. Decide on where your light source is coming from (left or right). Using only pencil, add shading showing a value scale, changing the circle to a sphere.

Where would the shadow cast?

4. Search your home for recycled materials. Build a one of a kind robot.

What real-world problem would your robot be able to solve?
