

HEALTH CARE AND EMERGENCIES

The Governing Board recognizes the importance of taking appropriate action whenever an emergency threatens the safety, health, or welfare of a student at school or during school-sponsored activities.

(cf. 0450 - Comprehensive Safety Plan)
(cf. 3516 - Emergencies and Disaster Preparedness Plan)
(cf. 5141.21 - Administering Medication and Monitoring Health Conditions)
(cf. 5141.22 - Infectious Diseases)
(cf. 5142 - Safety)

The Superintendent or designee shall develop procedures to ensure that first aid and/or medical attention is provided as quickly as possible when accidents and injuries to students occur and that parents/guardians are notified as appropriate.

(cf. 3530 - Risk Management/Insurance)
(cf. 5143 - Insurance)
(cf. 6145.2 - Athletic Competition)

The Superintendent or designee shall ask parents/guardians to provide emergency contact information in order to facilitate communication in the event of an accident or illness.

District staff shall appropriately report and document student accidents.

“Do Not Resuscitate” Orders

The Board of Education believes that staff members should not be placed in the position of determining whether or not to follow any parental or medical “do not resuscitate” orders. Staff shall not accept or follow any such orders except under the specific written direction of the Superintendent or designee. The Superintendent or designee may only direct a staff member to follow a “do not resuscitate” order if he/she has received a written parent/guardian authorization, with an authorized health care provider statement, and an order of an appropriate court.

The Superintendent or designee shall ensure that parents/guardians who have submitted a “do not resuscitate” order are informed of this policy.

Automated External Defibrillators

The Board authorizes the Superintendent or designee to place automated external defibrillators (AEDs) at designated school sites for use by school employees in an emergency.

HEALTH CARE AND EMERGENCIES

The Superintendent or designee shall develop guidelines for employees regarding these devices and shall ensure that employees receive information that describes sudden cardiac arrest, the school's emergency response plan, and the proper use of an AED. The guidelines shall also specify the placement, security, and maintenance of the AED.

The authorization of AEDs in District schools shall not be deemed to create a guarantee that an AED will be present or will be used in the case of an emergency, or that a trained employee will be present and/or able to use an AED in an emergency, or that the AED will operate properly.
