

# 4th Grade News

Week of October 1<sup>st</sup>, 2018

## **Reading:**

I can't believe that we have nearly finished the 1<sup>st</sup> nine weeks of school! I can really tell that students are growing as both readers and writers!

We will be taking our 1<sup>st</sup> nine weeks common assessment on Wednesday, October 3<sup>rd</sup>. This assessment will be over all of the skills that we have covered so far and contains similar questions to those that students will see on the TNReady test.

Thank you for encouraging your child to read! Our AR points are increasing!

## **Math:**

The first nine weeks have flown by! We have learned so much in math since August!

**We will be taking our first nine weeks common assessment on Thursday October 4<sup>th</sup>. Please make every effort for your child to be at school on this day.**

You can help your student prepare for this test by helping him/her practice multiplication facts and going over math notes and graded work with him/her.

## **Science/Social Studies:**

This week in Science we will be talking about engineering processes and what the job of an engineer entails. We will also talk about how technology is used in science.

On Tuesday, the students will have an opportunity to complete an inquiry lesson where they will have to create a device that will successfully absorb the force of an egg falling without cracking the egg itself.

Let's have a great week!

## **Announcements:**

~ This Friday we will have our 1<sup>st</sup> 9 weeks Incentive Field Trip. Please look for information coming home with students who have NOT received a citation and/or office referral for the entire 9 weeks.

~Fall Break October 8<sup>th</sup>-12<sup>th</sup>
