

Exploration Academy

Exploration Academy serves underrepresented fifth-grade students in the greater Houston area, as well as internationally.

Through project-based STEM (Science, Technology, Engineering and Mathematics) learning experiences, Exploration Academy seeks to develop those students who show great potential in the field of science but would benefit from additional instruction in order to meet that potential.

Students engage in hands-on, experience-based, and project-based learning to improve their skills in scientific inquiry while they explore practical applications of science. Activities are aligned with Texas Essential Knowledge and Skills (TEKS).
