

Greetings HPISD families,

In a very short time, the coronavirus pandemic has caused all of us to make significant changes to our lives. Those changes will, unfortunately, be with us for an unknown duration. The pandemic has also caused schools and school districts to quickly develop plans to keep students engaged in learning. During the last week, HPISD staff have been working on a plan for instructional continuity that provides learning opportunities for students that are guided by their individual teachers during the emergency school closure.

To implement this plan, our administrative team will be working with our staff beginning on Monday, March 23 to outline the details of the plan with the intention of launching learning activities for students and parents on Thursday, March 26. While it is our goal to provide meaningful learning opportunities for students, we recognize it will not be a direct replacement for the classroom experience.

Early next week, families will receive details, including access information, about the virtual approach for providing instructional continuity during school closure. Families should be prepared to log in beginning Thursday, March 26.

We need to gather information from families who have medications in the nurse's office, have emergency items to retrieve from a campus, and/or need to check out a device for their child to be able to participate in virtual learning activities. If the situations listed above apply to your family, please **complete the [brief form](#) no later than Saturday, March 21.**

We recognize that there is a great deal of uncertainty right now. There is no blueprint on how to work through a situation like this. Please know that district and campus administrators have spent significant time considering the best next steps for providing instructional continuity for our students. At all times, students, families and staff have been at the center of our discussion. We will continue to provide guidance as we work through this unprecedented situation and make adjustments as necessary.

Thank you for your patience and assistance.

Sincerely,

Dr. Tom Trigg
