Student Screening performed at home by parent

- Student must stay home
  - Parent to contact healthcare provider OR school RN
- Student may ride the bus and attend school
  - Student becomes symptomatic at school
    - Fever, cough, shortness of breath, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea, vomiting, diarrhea

Is student identified as a PUI* by RN/Provider?

- NO
  - Alternative diagnosis was established
    - Appropriate treatment and recovery time determined
  - YES
    - Inform parent/guardian of PUI* status and that medical care must be sought out

COVID-19 Testing

- Positve
  - Local Health Department contacts student, parent, or staff to perform case investigation and contact tracing.
    - Contact tracing begins 48hrs prior to the start of symptoms or 48hrs prior to the positive test date.
  - Student has a note from a medical provider AND a negative COVID-19 test, AND resolution of symptoms.
  - Positive student will be isolated for a minimum of 10 days from start of symptoms or test date
  - All contacts will be quarantined for 14 days, monitored for symptoms, and tested.
  - Student is fever free for 3 days and has progressive improvement of all other symptoms
- Negative
  - Allow student to return to school

*PUI – person under investigation

Local Health Department will notify school for collaboration with contact tracing
