

June 2019

Dear Parents and Guardians,

Your child will have access to Achieve3000® throughout the summer months. The program builds reading comprehension by delivering reading materials at a student's precise Lexile® level.

Students using Achieve3000® participate in a 5-Step Literacy Routine which is designed to help:

- develop reading strategies for informational text
- build academic vocabulary
- write both formally and informally
- critically evaluate information read
- build the skills necessary for staying on track for college and career.

Making reading gains with Achieve3000® is as easy as 1-2-3!

1. Improve Your Child's Comprehension

- Spark discussions with your child about each lesson's reading topics.
- Ask your child to read articles to you and stop periodically to summarize or ask questions.
- Have your child write one question for each article and research answers together.
- Track your child's activity scores and look for first-try scores of 75% or higher.

2. Motivate Your Child to Read More

- Encourage your child to use the Search feature to find interesting articles.
- Use your child's Lexile level (found in the Career Center) to help find appropriately leveled books.

3. Complete 40 lessons to make reading gains this summer.

The Achieve 3000 website can be accessed using the following URL address <http://G.achieve3000.com> . If you experience technical difficulties, Achieve 3000 has a technical support hotline (Toll Free: 888-968-6822).

I wish your family a safe and relaxing summer break!

Sincerely,

Your Child's Teacher
