

Fun at Fullerton's Family Tech Night

Fullerton School held a Family Tech Night event on Thursday, Jan. 24. Parents had the opportunity to attend a session that shared informa-

tion on Internet safety as well as the Sangha® and Seesaw® apps that are being used for increased communication between home and school. The sessions were offered in both English and Spanish.

While their parents were learning, the students enjoyed visiting stations such as QR Codes Games, Ozobot Races, Coding Dance Party, and Trivia with Plickers, where they had a chance to create and experiment with technology.

In spite of the frigid weather, the Family Tech Night drew a good crowd. Each family that attended received a set of earbuds and 12 lucky students--two from each grade level--won Ozobot robots to take home.

Addison School District 4 Superintendent John Langton takes a picture with Fullerton students at the Selfie Station on Family Tech Night held at the school on Thursday, Jan. 24.

LDR teacher Kristen Kelly looks on as a Fullerton student works with a color and shape game that he accessed by scanning in a QR code. It was one of many activities at Family Tech Night, which included Ozobots, Selfies, Dance Party and more.

One of the stations allowed students and their mothers take part in a Coding Dance Party. From the looks of their faces, moms and kids alike enjoyed themselves.

Fullerton first grade teacher Dena Seidenfus gives direction to students who were eager to start experimenting with Ozobots at Family Tech Night held recently. There were numerous stations families could visit to perform their own experiments.

A Fullerton student and his father watching the Ozobot follow the path that the student had designed using color codes to control the tiny robot's movement. It was all part of Family Tech Night held at Fullerton School on Jan. 24.

Fun at Family Tech Night

These Fullerton students took a moment for a snapshot at the 'Selfie Station' at Family Tech Night held at the school on Thursday, Jan. 24. Kids and parents were able to visit other stations that featured QR Codes Games, Ozobot Races, Coding Dance Party games and more. Story and full story inside this issue.
