

Realize & Google Classroom™ Integration

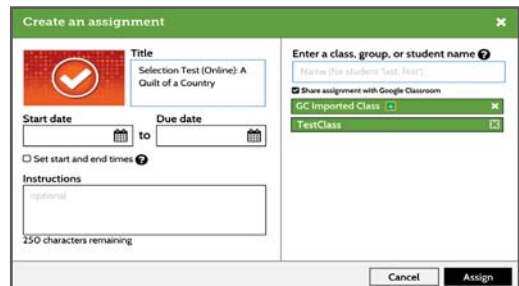

Getting Started

1. Log in to Realize™. You will see a new banner on the Realize™ homepage. Click “Get Started” and follow the prompts to log in to and connect your Google Classroom account.

2. Once your accounts are connected, you will select which classes to import into Realize from a list of your current classes in Google Classroom. You will also select the program you will use with the imported class.

3. Create an assignment as you normally would and assign it directly to your imported class (identified by the Google Classroom logo).

4. Assignments created in Realize will automatically appear within the teacher and student Google Classroom streams.
