

STUDENT SAFETY

JLI

The Seaford School District regards student safety as a matter of continual concern. Reasonable precautions will be taken to guard against accidents and provide safety for all students. The district will maintain a safe environment.

It shall be the responsibility of the schools to assure reasonable safety for students while they are attending school or while under school supervision. In order to help meet that responsibility, there will be periodic inspections of school buildings, grounds, athletic or playground facilities, and school equipment, including buses, for health, fire, emergency, and safety hazards.

Safety practices and procedures will reflect the District Safety Handbook, among other precautions. Principals will develop and implement safety plans accordingly.
