Superintendent and District Administrator Rubric

Rubrics—defined in the regulations as "scoring tool[s] that describe characteristics of practice or artifacts at different levels of performance" (603 CMR 35.02) —are a critical component of the Massachusetts educator evaluation framework and are required for every educator. Rubrics are designed to help educators and evaluators (1) develop a consistent, shared understanding of what proficient performance looks like in practice, (2) develop a common terminology and structure to organize evidence, and (3) make informed professional judgments about formative and summative performance ratings on each Standard and overall.

Structure of the Model Rubric

- **Standards:** Standards are the broad categories of knowledge, skills, and performance of effective practice detailed in the regulations. There are four Standards for administrators: *Instructional Leadership; Management and Operations; Family and Community Engagement;* and *Professional Culture.*

- **Indicators:** Indicators, also detailed in the regulations, describe specific knowledge, skills, and performance for each Standard. For example, there are six Indicators in Standard I of the Superintendent rubric, including *Curriculum, Instruction,* and *Evaluation*.

- **Elements:** The elements are more specific descriptions of actions and behaviors related to each Indicator. The elements further break down the Indicators into more specific aspects of educator practice and provide an opportunity for evaluators to offer detailed feedback that serves as a roadmap for improvement.

- **Descriptors:** Performance descriptors are observable and measurable statements of educator actions and behaviors aligned to each element and serve as the basis for identifying the level of teaching or administrative performance in one of four categories: *Unsatisfactory, Needs Improvement, Proficient, o*r *Exemplary*.

Use of the Superintendent and District Level Administrator Rubric

This rubric describes administrative leadership practice at the district level. It is intended to be used throughout the 5 step evaluation cycle for the evaluation of the superintendent. This rubric can also be used by the superintendent for the evaluation of other district level administrators, such as assistant superintendents, directors of curriculum and instruction, school business administrators, and directors of special education.

The responsibilities of administrators to whom this rubric will be applied may vary. DESE encourages administrators and evaluators to use the rubric strategically by discussing and agreeing upon certain Indicators that are aligned to his/her professional practice, student learning, and district and/or school improvement goals. There are many ways to emphasize these components throughout the evaluation cycle. For example, focus Indicators can be analyzed in greater depth during self-assessment, targeted during goal setting, a focus for more comprehensive evidence collection, or all of the above. The expectation is that by the end of the evaluation cycle, administrators and school committees/evaluators have gathered and shared a reasonable amount of evidence related to Indicators in all four Standards, sufficient to support a rating for each Standard. Evaluators may request additional evidence as needed.

Priorities of a District Leader for Improving Learning for all Students

- **ENSURING SYSTEMS ALIGNMENT AND COHERENCE**. An effective district leader establishes high-functioning systems that work together in support of the district's vision. These systems include data and measurement systems, hiring and recruitment processes, talent development and professional learning systems, curriculum and instruction supports, etc. When these systems are coherent and aligned with the district's vision and goals, school leaders are better positioned to execute their responsibilities in support of student learning. The model rubrics represent this coherence through the vertical alignment from classroom teacher rubric to school level administrator rubric to superintendent/district administrator rubric.

- **EMPOWERING PRINCIPALS and OTHER DISTRICT ADMINISTRATORS**. An effective district leader builds the capacity of school leaders and district administrators to enact the district's vision and its commitment to students. In order to do this well, the superintendent must first have the knowledge, skills, commitment, beliefs, and authority to make critical decisions on behalf of students and staff. They then model these skills through the provision of consistent, high quality feedback to school and district leaders on their leadership practice, and empower them to be successful administrative leaders. Empowering others is the highest form of leadership; as such, the term "empowers" is often noted in the 'Exemplary' descriptors in this rubric.

- **LEADING WITH A COMMITMENT TO EQUITY**. An effective superintendent creates inclusive, multicultural school environments for adults and children and demands equally high outcomes for all participants in the educational system. Leading with a commitment to equity means challenging the predictability of success or failure that currently correlates with any social or cultural factor through the disruption of inequitable practices; the examination of biases; and the discovery and cultivation of the unique gifts, talents and interests that every human possesses.[1] The model rubric denotes a superintendent's responsibility to equity in references to "all students," a commitment to data-informed decisionmaking, and the emphasis on culturally responsive teaching and leading.

Definitions of terms used frequently in this document

"All students": Given that some student groups have been historically underserved, and that any student can be particularly "vulnerable" at any moment in time, it is important to consider practices and outcomes beyond the aggregate to ensure that all students are challenged and supported to learn and grow. The phrase "all" in this document refers to equity for and attention to students from all backgrounds and identities and experiences. These include but are not limited to all races and ethnicities, all genders and gender identities, all sexual orientations, all disabilities, all nationalities, all types of citizenship or immigration status, all religions, all family structures, all family housing situations, all medical/health needs, and all traumatic experiences.

"Disaggregated student data": Disaggregated student data refers to aggregate student data that is broken down into smaller parts in order to learn about the performance, opportunities, and outcomes of specific student populations; for example, schools, grade levels, and student groups.

"Equity": Educational equity means that all students have access to the educational resources, opportunities, and rigor they need at the right moment in their education across race, gender, ethnicity, language, disability, sexual orientation, family background and/or family income to meet high expectations for cognitive, behavioral, and social-emotional growth and development.[2]

"Student group": Any group of students who share similar characteristics, such as racial or ethnic identification, gender identification, socioeconomic status, physical or learning disabilities, or language skills.[3] This includes, but is not limited to, the groups of students for which DESE issues annual performance determinations.

[4]Exemplary practice in many elements includes the expectation that an educator model the practice for other educators. Modeling can occur in formal and informal ways, including but not limited to training, teaching, coaching, assisting, sharing, and/or demonstrating good practice. Where and when this expectation is appropriate, this level of expertise is denoted by "Models this practice for others."

Superintendent and District Administrator Rubric

Indicator I-F. Student Learning

Demonstrates expected impact on student learning based on multiple measures of student learning, growth, and achievement, including student progress on common assessments and statewide student growth measures where available.

The model rubrics describe *educator practice* and provide clear criteria across four performance levels that focus on the educator's actions and behaviors.

The Student Learning Indicator is about the *impact of those actions relative to student learning*. Did students learn as much as educators set out to teach?

For administrators, evidence of impact on student learning based on multiple measures of student learning, growth, and achievement must be taken into account by the evaluator(s) when determining a performance rating for Standard I. Because evaluators are not required to make a rating determination for any individual Indicator, this allows them to consider evidence of impact alongside evidence of practice when determining a rating for Standard I. **There are no associated elements or performance descriptors for the Student Learning Indicator**.

Evaluators and educators should identify the most appropriate assessments of student learning and anticipated student learning gains associated with those measures when developing the Educator Plan. For superintendents and other district leaders, multiple measures of student learning might include (but should not be limited to) statewide assessments, assessments from curricular materials used in multiple schools, district-created common assessments, or others measures that provide information about student learning across the district.
