

Relaxation Techniques

Paint a picture of the calming place in your mind. Don't just think of the place briefly—imagine every little detail. Go through each of your senses and imagine what you would experience in your relaxing place. Here's an example using a beach:

- a. **Sight:** The sun is high in the sky and you're surrounded by white sand. There's no one else around. The water is a greenish-blue and waves are calmly rolling in from the ocean.
- b. **Sound:** You can hear the deep pounding and splashing of the waves. There are seagulls somewhere in the background.
- c. **Touch:** The sun is warm on your back, but a breeze cools you down just enough. You can feel sand moving between your toes.
- d. **Taste:** You have a glass of lemonade that's sweet, tart, and refreshing.
- e. **Smell:** You can smell the fresh ocean air, full of salt and calming aromas.

Progressive Muscle Relaxation

During the fight-or-flight response, the tension in our muscles increases. This can lead to a feeling of stiffness, or even back and neck pain. Progressive muscle relaxation teaches us to become more aware of this tension so we can better identify and address stress.

Find a private and quiet location. You should sit or lie down somewhere comfortable.

The idea of this technique is to intentionally tense each muscle, and then to release the tension. Let's practice with your feet.

- a. **Tense the muscles in your toes by curling them into your foot. Notice how it feels when your foot is tense. Hold the tension for 5 seconds.**
- b. **Release the tension from your toes. Let them relax. Notice how your toes feel differently after you release the tension.**
- c. **Tense the muscles all throughout your calf. Hold it for 5 seconds. Notice how the feeling of tension in your leg feels.**
- d. **Release the tension from your calf, and notice how the feeling of relaxation differs.**

Follow this pattern of tensing and releasing tension all throughout your body. After you finish with your feet and legs, move up through your torso, arms, hands, neck, and head.

Relaxation Techniques

When a person is confronted with anxiety, their body undergoes several changes and enters a special state called the *fight-or-flight response*. The body prepares to either fight or flee the perceived danger.

During the fight-or-flight response it's common to experience a "blank" mind, increased heart rate, sweating, tense muscles, and more. Unfortunately, these bodily responses do little good when it comes to protecting us from modern sources of anxiety.

Using a variety of skills, you can end the fight-or-flight response before the symptoms become too extreme. These skills *will* require practice to work effectively, so don't wait until the last minute to try them out!

Deep Breathing

It's natural to take long, deep breaths, when relaxed. However, during the fight-or-flight response, breathing becomes rapid and shallow. Deep breathing reverses that, and sends messages to the brain to begin calming the body. Practice will make your body respond more efficiently to deep breathing in the future.

Breathe in slowly. Count in your head and make sure the inward breath lasts at least 5 seconds. Pay attention to the feeling of the air filling your lungs.

Hold your breath for 5 to 10 seconds (again, keep count). You don't want to feel uncomfortable, but it should last quite a bit longer than an ordinary breath.

Breathe out very slowly for 5 to 10 seconds (count!). Pretend like you're breathing through a straw to slow yourself down. Try using a real straw to practice.

Repeat the breathing process until you feel calm.

Imagery

Think about some of your favorite and least favorite places. If you think about the place hard enough—if you really try to think about what it's like—you may begin to have feelings you associate with that location. Our brain has the ability to create emotional reactions based entirely off of our thoughts. The imagery technique uses this to its advantage.

Make sure you're somewhere quiet without too much noise or distraction. You'll need a few minutes to just spend quietly, in your mind.

Think of a place that's calming for you. Some examples are the beach, hiking on a mountain, relaxing at home with a friend, or playing with a pet.

Coping Skills

Anxiety

Deep Breathing

Deep breathing is a simple technique that's excellent for managing emotions. Not only is deep breathing effective, it's also discreet and easy to use at any time or place.

Sit comfortably and place one hand on your abdomen. Breathe in through your nose, deeply enough that the hand on your abdomen rises. Hold the air in your lungs, and then exhale slowly through your mouth, with your lips puckered as if you are blowing through a straw. The secret is to go slow: Time the inhalation (4s), pause (4s), and exhalation (6s). Practice for 3 to 5 minutes.

Progressive Muscle Relaxation

By tensing and relaxing the muscles throughout your body, you can achieve a powerful feeling of relaxation. Additionally, progressive muscle relaxation will help you spot anxiety by teaching you to recognize feelings of muscle tension.

Sit back or lie down in a comfortable position. For each area of the body listed below, you will tense your muscles tightly, but not to the point of strain. Hold the tension for 10 seconds, and pay close attention to how it feels. Then, release the tension, and notice how the feeling of relaxation differs from the feeling of tension.

- Feet** Curl your toes tightly into your feet, then release them.
- Calves** Point or flex your feet, then let them relax.
- Thighs** Squeeze your thighs together tightly, then let them relax.
- Torso** Suck in your abdomen, then release the tension and let it fall.
- Back** Squeeze your shoulder blades together, then release them.
- Shoulders** Lift and squeeze your shoulders toward your ears, then let them drop.
- Arms** Make fists and squeeze them toward your shoulders, then let them drop.
- Hands** Make a fist by curling your fingers into your palm, then relax your fingers.
- Face** Scrunch your facial features to the center of your face, then relax.
- Full Body** Squeeze all muscles together, then release all tension.

Coping Skills

Anxiety

Challenging Irrational Thoughts

Anxiety can be magnified by irrational thoughts. For example, the thoughts that "something bad will happen" or "I will make a mistake" might lack evidence, but still have an impact on how you feel. By examining the evidence and challenging these thoughts, you can reduce anxiety.

Put thoughts on trial. Choose a thought that has contributed to your anxiety. Gather evidence in support of your thought (*verifiable facts only*), and against your thought. Compare the evidence and determine whether your thought is accurate or not.

Use Socratic questioning. Question the thoughts that contribute to your anxiety. Ask yourself:

"Is my thought based on facts or feelings?"

"How would my best friend see this situation?"

"How likely is it that my fear will come true?"

"What's most likely to happen?"

"If my fear comes true, will it still matter in a week? A month? A year?"

Imagery

Your thoughts have the power to change how you feel. If you think of something sad, it's likely you'll start to feel sad. The opposite is also true: When you think of something positive and calming, you feel relaxed. The imagery technique harnesses this power to reduce anxiety.

Think of a place that you find comforting. It could be a secluded beach, your bedroom, a quiet mountaintop, or even a loud concert. For 5 to 10 minutes, use all your senses to imagine this setting in great detail. Don't just think fleetingly about this place—really imagine it.

What do you see around you? What do you notice in the distance? Look all around to take in all your surroundings. Look for small details you would usually miss.

What sounds can you hear? Are they soft or loud? Listen closely to everything around you. Keep listening to see if you notice any distant sounds.

Are you eating or drinking something enjoyable? What is the flavor like? How does it taste? Savor all the tastes of the food or drink.

What can you feel? What is the temperature like? Think of how the air feels on your skin, and how your clothes feel on your body. Soak in all these sensations.

What scents are present? Are they strong or faint? What does the air smell like? Take some time to appreciate the scents.

Grounding Techniques

Body Awareness

The body awareness technique will bring you into the here-and-now by directing your focus to sensations in the body. Pay special attention to the physical sensations created by each step.

1. Take 5 long, deep breaths through your nose, and exhale through puckered lips.
2. Place both feet flat on the floor. Wiggle your toes. Curl and uncurl your toes several times. Spend a moment noticing the sensations in your feet.
3. Stomp your feet on the ground several times. Pay attention to the sensations in your feet and legs as you make contact with the ground.
4. Clench your hands into fists, then release the tension. Repeat this 10 times.
5. Press your palms together. Press them harder and hold this pose for 15 seconds. Pay attention to the feeling of tension in your hands and arms.
6. Rub your palms together briskly. Notice and sound and the feeling of warmth.
7. Reach your hands over your head like you're trying to reach the sky. Stretch like this for 5 seconds. Bring your arms down and let them relax at your sides.
8. Take 5 more deep breaths and notice the feeling of calm in your body.

Mental Exercises

Use mental exercises to take your mind off uncomfortable thoughts and feelings. They are discreet and easy to use at nearly any time or place. Experiment to see which work best for you.

- Name all the objects you see.
- Describe the steps in performing an activity you know how to do well. For example, how to shoot a basketball, prepare your favorite meal, or tie a knot.
- Count backwards from 100 by 7.
- Pick up an object and describe it in detail. Describe its color, texture, size, weight, scent, and any other qualities you notice.
- Spell your full name, and the names of three other people, backwards.
- Name all your family members, their ages, and one of their favorite activities.
- Read something backwards, letter-by-letter. Practice for at least a few minutes.
- Think of an object and "draw" it in your mind, or in the air with your finger. Try drawing your home, a vehicle, or an animal.

Grounding Techniques

After a trauma, it's normal to experience flashbacks, anxiety, and other uncomfortable symptoms. **Grounding techniques** help control these symptoms by turning attention away from thoughts, memories, or worries, and refocusing on the present moment.

5-4-3-2-1 Technique

Using the 5-4-3-2-1 technique, you will purposefully take in the details of your surroundings using each of your senses. Strive to notice small details that your mind would usually tune out, such as distant sounds, or the texture of an ordinary object.

What are 5 things you can see? Look for small details such as a pattern on the ceiling, the way light reflects off a surface, or an object you never noticed.

What are 4 things you can feel? Notice the sensation of clothing on your body, the sun on your skin, or the feeling of the chair you are sitting in. Pick up an object and examine its weight, texture, and other physical qualities.

What are 3 things you can hear? Pay special attention to the sounds your mind has tuned out, such as a ticking clock, distant traffic, or trees blowing in the wind.

What are 2 things you can smell? Try to notice smells in the air around you, like an air freshener or freshly mowed grass. You may also look around for something that has a scent, such as a flower or an unlit candle.

What is 1 thing you can taste? Carry gum, candy, or small snacks for this step. Pop one in your mouth and focus your attention closely on the flavors.

Categories

Choose at least three of the categories below and name as many items as you can in each one. Spend a few minutes on each category to come up with as many items as possible.

Movies	Countries	Books	Cereals
Sports Teams	Colors	Cars	Fruits & Vegetables
Animals	Cities	TV Shows	Famous People

For a variation on this activity, try naming items in a category alphabetically. For example, for the fruits & vegetables category, say "apple, banana, carrot," and so on.
