

Dear Navigator families and staff:

We are writing today with an update regarding COVID-19 exposure in our communities. We do not have any positive cases in any of our sites but in an abundance of caution, Navigator has taken these additional steps to continue to limit the possible exposure to students, staff, and families:

- Lunch tables are currently sanitized daily with additional wipe downs after each meal service
- All athletics have been postponed until after Spring Break
- All external tours have been postponed or cancelled

At this time, no Navigator staff member or student has been identified as having the COVID-19 virus. If employees or students are confirmed to have tested positive with COVID-19, we will immediately alert staff and parents and will take all necessary and appropriate actions to protect the health and safety of our community. As of today, schools will remain open and students who are well should continue to attend school. Students who have been advised by medical professionals to stay home will have access to educational materials to utilize at home.

Local public health departments are not advising school closures at this time in our county. If that direction changes, we will inform you as soon as possible. If schools are closed, vulnerable families are at a higher risk of being negatively impacted. Many students in our district rely on schools and staff for basic needs, including regular meals, health care, and childcare.

We also ask you not to discuss any person by name or in any way that might identify them in conjunction with COVID-19. These types of conversations are not only unlawful they can also add to the community fear by spreading uncertainty and inaccurate information. In addition, please remember all Navigator staff

members must keep the medical condition of staff and/or students strictly confidential, including those who may test positive for COVID-19.

We will keep you updated on any new information we receive. Thank you for working with us to keep all students, staff, and families safe and healthy.

Sincerely,

Kevin Sved
CEO
