# Career Academies of Decatur

1625-C Danville Road SW
Decatur, AL 35601
256.560.6821

Shelton.Cobb@dcs.edu
Core Curriculum classes are designed for students working at grade level. Study of language skills in writing, speaking, and listening is sequenced to provide preparation for the student in either vocational or college preparatory programs. The sequence of literature studied and the language reading and writing skills corresponds to the requirements and recommendations of The Alabama Course of Study and, College and Career Readiness Standards.

Advanced English is offered in grades 9-10 for highly motivated students. The courses are designed for the student who has performed well above average in previous English courses, is motivated, has mastered basic skills, and is willing to handle a more challenging workload. The advanced courses prepare students to take AP English at the Junior and Senior levels.

Summer Reading Assignments: There will be required summer reading assignments in all elevated English classes. This is not an option. The titles and assignments will be shared and discussed by individual teachers during the last six weeks of this school year. Students will be given the titles and assignments by their perspective teacher. These titles and assignments will also be located in the Guidance Office during the summer months, as well as the school’s webpage.

ENGLISH, GRADE 9 (200005)

Grade: 9  Credit: 1.0

NOTE: FULFILLS ENGLISH CREDIT REQUIRED FOR GRADUATION. Reading literature, reading informational text, writing, speaking and listening, and language. Concentrates on language skills including standard usage, function of the parts of speech, sentence structure, punctuation, capitalization, vocabulary, spelling, and dictionary skills. The course provides an intensive study of the sentence as a unit of thought in effective communication. Students study verbals, usage, coordination and subordination, parallel structure, and sentence variety and originality. Students participate in a variety of speaking activities and make oral presentations. Writing assignments emphasize sentence sophistication and paragraphing. Students will read major works of literature as well as selections from the textbook. Outside reading assignments may be required. Students are evaluated on the basis of class participation, homework, daily quizzes, essays, unit tests, projects, and semester exams. Grammar review and vocabulary building will focus on test preparation for ACT. All writing submitted as a fulfillment of a requirement for an English course must be free of plagiarism.

ADVANCED ENGLISH, GRADE 9 (200007)

Grade: 9  Credit: 1.0

NOTE: FULFILLS ENGLISH CREDIT REQUIRED FOR GRADUATION. Advanced work in reading literature, reading informational text, writing, speaking and listening, and language. This course is designed for students who are planning to pursue an advanced diploma and take Advanced Placement courses. Advanced English 9 will include an accelerated study of language, literature, and composition. In addition, students are expected to complete individual and group assignments. Outside reading will be required. Students will be evaluated on the basis of class participation, homework, quizzes, oral and written reports, projects, unit tests, and semester exams. Grammar review and vocabulary building will focus on test preparation for ACT. All writing submitted as a fulfillment of a requirement for an English course must be free of plagiarism.

ENGLISH, GRADE 10 (200009)

Grade: 10  Credit: 1.0

NOTE: FULFILLS ENGLISH CREDIT REQUIRED FOR GRADUATION. Reading literature, reading informational text, writing, speaking and listening, and language. This course builds on the grammar skills reviewed in the ninth grade. Coordinates the study of literature, oral communication, and grammar. Literature selections are from primarily colonial American literature to 1900 and World literature that impacted the advancement of American literature. All students will read several outside novels. Students will participate in discussion, writing assignments, language and vocabulary study and oral communication. Students are evaluated on the basis of class participation, homework, daily quizzes, unit tests, oral presentations, writing assignments, research projects, and semester exams. Grammar review and vocabulary building will focus on test preparation for ACT. All writing submitted as a fulfillment of a requirement for an English course must be free of plagiarism.

ADVANCED ENGLISH, GRADE 10 (200011)

Grade: 10  Credit: 1.0

NOTE: FULFILLS ENGLISH CREDIT REQUIRED FOR GRADUATION. Advanced work in reading literature, reading informational text, writing, speaking and listening, and language. Provides an intensive study of American literature from colonial times to 19th century as well as selections of world literature that influenced the development of our American literary genres of short story, novel, drama, and poetry. Composition is emphasized and includes the elements of formal and informal essays, and literary analysis. Communication skills are developed through oral presentations and group and class discussions. This course is designed for students who are planning to pursue an advanced diploma and take Advanced Placement courses. Students are evaluated on the basis of class participation, homework, presentations, quizzes, tests, literary analyses, research projects, and semester exams. Grammar review and vocabulary building will focus on test preparation for the PSAT and ACT. All writing submitted as a fulfillment of a requirement for an English course must be free of plagiarism.
ENGLISH, GRADE 11 (200013)
Grade: 11  Credit: 1.0
NOTE: FULFILLS ENGLISH CREDIT REQUIRED FOR GRADUATION. Reading literature, reading informational text, writing, speaking and listening, and language. Emphasizes a survey of major American writers and literature from 1900 to contemporary pieces. Students will be asked to analyze literature and to recognize an author’s work in its appropriate historical context. Major emphasis is also given to the development of composition skills. Work will include a grammar review stressing standard written usage, much practice in expository writing, and the multi-paragraph theme (or essay), as well as a research paper. Students will write frequently and will practice preparation for essay-type test questions. Students will participate in a variety of speaking activities, including oral presentations. Students are evaluated on the basis of homework, class participation, daily quizzes, composition, memorization assignments, unit tests, research paper, outside reading assignments, and semester exams. A research paper is required. Grammar review and vocabulary building will focus on test preparation for the ACT. All writing submitted as a fulfillment of a requirement for an English course must be free of plagiarism.

*AP ENGLISH, LANGUAGE AND COMPOSITION (200016)
Grade: 11  Credit: 1.0  Prerequisite: Advanced English 10 and/or Instructor approval
NOTE: FULFILLS ENGLISH CREDIT REQUIRED FOR GRADUATION College-level advanced course following the curriculum established by the College Board Advanced Placement (AP) Program for English; engages students in becoming skilled writers who compose for a variety of purposes; guides students in becoming skilled readers of prose written in a variety of rhetorical contexts; extensive writing of compositions. The AP Language and Composition course is designed for advanced readers and writers who are eager to examine the use of language in depth. Course content differs from junior English both in the selection of readings and in the demands placed on the students. In addition to covering 20th century American literature, the course trains students to become skilled readers and writers in diverse genres and modes of composition. Students enrolled in AP Language must be willing to work at the college level; thus, students must be mature scholars, prepared to think critically. Students follow a comprehensive writing program that stresses literary analysis, argumentation, and timed writing. A research paper is also required. Students are evaluated on outside reading assignments, tests, essays, and oral presentations. This course leads to Advanced Placement Senior English. Grammar review and vocabulary building will focus on test preparation for the ACT. All writing submitted as a fulfillment of a requirement for an English course must be free of plagiarism. *See AP Descriptor

ENGLISH, GRADE 12 (200017)
Grade: 12  Credit: 1.0
NOTE: FULFILLS ENGLISH CREDIT REQUIRED FOR GRADUATION. Reading literature, reading informational text, writing, speaking and listening, and language. Coordinates the study of English literature, composition, and grammar. The course includes a survey of English literature from Beowulf to contemporary British authors. Students will have the opportunity to review and refine composition techniques through grammar review coordinated with writing skills. A research paper is required. Students are evaluated on the basis of homework, daily quizzes, unit tests, research paper, reports, oral communication, outside reading assignments, composition assignments, and semester exams. All writing submitted as a fulfillment of a requirement for an English course must be free of plagiarism.

*AP ENGLISH, LITERATURE AND COMPOSITION (200020)
Grade: 12  Credit: 1.0  Prerequisite: AP English Language and Composition and/or Instructor approval
NOTE: FULFILLS ENGLISH CREDIT REQUIRED FOR GRADUATION. College-level advanced course following the curriculum established by the College Board Advanced Placement (AP) Program for English; engages students in the careful reading and critical analysis of imaginative literature from several genres and periods from the sixteenth to the twenty-first century; extensive writing of compositions. Designed for highly motivated seniors who have a keen interest in the subject area, enjoy literature, and who wish to attempt college-level work while in high school. In addition to English literature, the course includes world masterpieces of literary merit from various genres and time periods. Students must demonstrate the appropriate writing skills to function on an AP level. A research paper is required. Student evaluation is based upon outside reading assignments, tests, composition, and oral presentations. Grammar review and vocabulary building will focus on test preparation for the ACT. All writing submitted as a fulfillment of a requirement for an English course must be free of plagiarism. *See AP Descriptor

CALHOUN DUAL ENROLLMENT ENGLISH COMPOSITION, ENG 101/102 (903201 & 903202)
Grade: 11, 12 Credit: 1.0
Tuition Cost: +/- $450 p/course. Both 101 and 102 are required to 1 high school credit.
English Composition 101 provides instruction and practice in the writing of at least six (6) extended compositions and the development of analytical and critical reading skills and basic reference and documentation skills in the composition process. English Composition I may include instruction and practice in library usage.
English Composition 102 provides instruction and practice in the writing of six (6) formal, analytical essays, at least one of which is a research project using outside sources and/or references effectively and legally. Additionally, English Composition II provides instruction in the development of analytical and critical reading skills in the composition process. English Composition II may include instruction and practice in library usage. Note: Students will be required to complete a Literature Component in addition to this course in order to receive high school credit.
TABLE OF CONTENTS

CALHOUN DUAL ENROLLMENT ENGLISH LITERATURE I & II, ENG 261/262 (903205 & 903206)
Grade: 11, 12 Credit: 1.0
Tuition Cost: +/- $450 p/course. Both 261 and 262 are required to receive credit.
English Literature I & II are a survey of English literature form the Anglo-Saxon period thru the Romantic Age to the present. Emphasis is placed on representative works and writers of this period and on the literary, cultural, historical, and philosophical forces that shaped these works and that are reflected in them. Upon completion and in written compositions, students will be able to interpret the aesthetic and thematic aspects of these works, relate the works to their historical and literary contexts, and understand relevant criticism and research.

MATHEMATICS

The new Mathematics Course of Study adopted by the Alabama Department of Education will begin with the incoming freshman class of 2019-2020. Students will be required to complete Geometry with Statistics and Advanced Algebra within four total mathematics credits in order to graduate.

Students, parents, and teachers must carefully consider the appropriate course selection for the students to achieve academic success. Mathematics must be taken in sequential order so it is imperative that students and parents develop a four year curriculum plan. Any student requesting a course other than that recommended by his teacher must have a completed parental waiver on file in the guidance office. The parents of any junior requesting a course other than that recommended must meet with the teacher to discuss curriculum options and to sign the waiver. It is our hope to help our students succeed academically and to take responsibility in planning for their futures.

NOTE: These common pathways do not reflect all possible pathways. Please see your counselor for further explanation of other pathway options.

Incoming 9th grade students: All incoming 9th graders for the 2019-2020 school year will take Geometry w/statistics. Students will have the option to take this course on an advanced or regular level. Please be sure to mark your selection on the registration card.

Geometry With Statistics - (210010ac) new as of 2019-2020 school year
Advanced Geometry With Statistics - (210012) - predominantly for students who took Algebra 1 in 8th grade
This class is required for all students to graduate. Students perform algebraic calculations that build on foundations of algebra from grades 7 and 8. It extends their earlier understanding of congruence, similarity and linear equations, exploring coordinate geometry and transformations. Proofs are explored through conjecture testing, informal and formal justification. Geometric constructions, area and volumes of complex figures, congruence, similarity, and right triangle trigonometry are also covered. Statistical topics on analysis of univariate and bivariate data sets, linear regressions, residuals and creating linear models are explored in this course.

Intermediate Algebra with Probability - (210005) new as of 2019-2020 school year
This course is required for students who take grade level 7th and 8th grade math before Geometry with Statistics. Emphasis in this course is on functions, including linear, absolute value, quadratic and exponential as well as explicit and recursive forms of functions. Properties of algebra such as factoring, completing the square, composition of functions and transformations are applied to convert between forms of expressions and to solve equations. Graphing equations, inequalities, systems and identification of key features of functions are also covered. Statistical topics are describing categorical data, two-way tables, data trends, probability and sampling.

Advanced Algebra - (210017) - students entering the 10th grade - weighted - new as of 2019-2020 school year
Advanced Algebra - (210006) - students entering the 11th or 12th grade - not weighted

This course is required for all students to graduate. Advanced Algebra is the culmination of the core courses aimed at achieving the essential concepts outlined by the NCTM and is designed to establish a solid foundation for further study of mathematics in any of the specialized math courses that will support progress towards students future goals. This course builds on the algebraic content of Intermediate Algebra, expanding the range of functions considered to include polynomials, trigonometric (specifically sine and cosine), logarithmic, reciprocal, radical, and general piecewise functions. Matrices are introduced. Statistical ideas include advanced linear regression topics, normalization and standard deviation, experimental design and an introduction to statistical inference.

Algebraic Modeling - (210034) new as of 2019-2020 school year

This is a specialized course that satisfies the requirements for graduation. Algebraic Modeling expands on and reinforces the concepts introduced in Advanced Algebra by applying them in the context of modeling. Students use mathematics to represent and analyze data and make predictions regarding real-world phenomena, such as the shapes, locations and relationships between objects in space; changes in measurements such as location, value and population over time; and the range of possible outcomes for future events and its role in decision-making. Measurements are taken from the real world, and technology is used extensively for computation, with heavy emphasis on students’ interpretation and explanation of results in context. The emphasis in this course is on exploration and application rather than an analytic perspective.

Applications of Finite Math - (210036) new as of 2019-2020 school year

This course satisfies the requirements for graduation. It is designed to prepare students for post-secondary programs of study that do not require calculus, such as business, management, economics, information, health and social sciences, teacher prep programs and technical or trade certification programs. It presents mathematics as relevant and meaningful in everyday life. A wide range of topics include logic, counting methods, information processing, graph theory, election theory, and fair division, with emphasis on relevance to real-world problems. Logic includes recognizing and developing logical arguments and using principles of logic to solve problems. Students are encouraged to use a variety of approaches and representations to make sense of advanced counting problems, then develop formulas that can be used to explain patterns. Applications in graph theory allow students to use mathematical structures to represent real world problems and make informed decisions. Election theory and fair division applications also engage student in democratic decision-making so that they recognize the power of mathematics in shaping society.

PRE-CALCULUS (210020)

Grade: 11, 12  Credit: 1.0  Prerequisite: Algebra II with Trigonometry

NOTE: FULFILLS ONE OF THE FOUR MATHEMATICS CREDITS REQUIRED FOR GRADUATION. Pre-Calculus is a course designed for students who have successfully completed the Algebra II with Trigonometry course. This course is considered to be a prerequisite for success in calculus and college mathematics. Algebraic, graphical, numerical, and verbal analyses are incorporated during investigations of the Pre-Calculus content standards. Parametric equations, polar relations, vector operations, conic sections, and limits are introduced. Content for this course also includes an expanded study of polynomial and rational functions, trigonometric functions, and logarithmic and exponential functions. Application-based problem solving is an integral part of the course. Instruction will include appropriate use of technology to facilitate continued development of students’ higher-order thinking skills.

ADVANCED PRE-CALCULUS (210020aa)

Grade: 11, 12  Credit: 1.0  Prerequisite: Algebra II with Trigonometry/Advanced Algebra II with Trigonometry

NOTE: FULFILLS ONE OF THE FOUR MATHEMATICS CREDITS REQUIRED FOR GRADUATION. Pre-Calculus is a course designed for students who have successfully completed the Algebra II with Trigonometry course. This course is considered to be a prerequisite for success in calculus and college mathematics. Algebraic, graphical, numerical, and verbal analyses are incorporated during investigations of the Pre-Calculus content standards. Parametric equations, polar relations, vector operations, conic sections, and limits are introduced. Content for this course also includes an expanded study of polynomial and rational functions, trigonometric functions, and logarithmic and exponential functions. Application-based problem solving is an integral part of the course. Instruction will include appropriate use of technology to facilitate continued development of students’ higher-order thinking skills.

*AP COMPUTER SCIENCE PRINCIPLES  (520018)
*AP COMPUTER SCIENCE PRINCIPLES  (520018aa) Career Academy of Decatur
Grade: 11, 12  Credit: 1.0  Prerequisite: Intermediate Algebra
NOTE: FULFILLS ONE OF THE FOUR MATHEMATICS CREDITS REQUIRED FOR GRADUATION. In fall 2016, the College Board will launch its newest AP course, AP Computer Science Principles. The course introduces students to the foundational concepts of computer science and challenges them to explore how computing and technology can impact the world. The AP Program designed AP Computer Science Principles with the goal of creating leaders in computer science fields and attracting and engaging those who are traditionally underrepresented with essential computing tools and multidisciplinary opportunities. Student taking the course should be strong math students. This is considered to be a first course in computer science.  
*See AP Descriptor

*AP COMPUTER SCIENCE A
Grade:11,12  Credit:1.0  Prerequisite: Advanced Algebra
Equivalent to a first-semester, college-level course in computer science. The course introduces students to computer science with fundamental topics that include problem solving, design strategies and methodologies, organization of data (data structures), approaches to processing data (algorithms), analysis of potential solutions, and the ethical and social implications of computing. The course emphasizes both object-oriented and imperative problem solving and design using Java language. These techniques represent proven approaches for developing solutions that can scale up from small, simple problems to large, complex problems.  *See AP Descriptor

*AP CALCULUS A/B (210025)
Grade: 11, 12  Credit: 1.0  Prerequisite: Precalculus
NOTE: FULFILLS ONE OF THE FOUR MATHEMATICS CREDITS REQUIRED FOR GRADUATION. College-level advanced math course approved by the College Board Advanced Placement (AP) program for calculus; functions, graphs, and limits; derivatives; integrals; polynomial approximations and series. Use of technology is an integral part of this course; therefore, a graphing calculator is required.  *See AP Descriptor

*AP CALCULUS B/C (210026)
Grade: 11, 12  Credit: 1.0  Prerequisite: Precalculus
NOTE: FULFILLS ONE OF THE FOUR MATHEMATICS CREDITS REQUIRED FOR GRADUATION. College-level course approved by the College Board Advanced Placement (AP) Program for calculus; this course is an extension of AP Calculus AB rather than an enhancement; common topics require a similar depth of understanding. Use of technology is an integral part of this course; therefore, a graphing calculator is required.  *See AP Descriptor

*AP STATISTICS (210027)
Grade: 11, 12  Credit: 1.0  Prerequisite: Algebra II with Trigonometry
NOTE: FULFILLS ONE OF THE FOUR MATHEMATICS CREDITS REQUIRED FOR GRADUATION. This Advanced Placement course is accelerated in rigor and pace. This course introduces students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. Students are exposed to four conceptual themes: observing patterns by exploring data, deciding what and how to measure in planning study, producing models using probability theory and simulation, and making statistical inferences from models. Students should expect an intensive course requiring the use of a graphing calculator. There will be applications of concepts through written work.  *See AP Descriptor

CALHOUN DUAL ENROLLMENT PRE-CALCULUS - ALGEBRA & TRIGONOMETRY, MTH 112/113 (907601 & 907602)
Grade: 11, 12  Credit: 1.0  Prerequisite: A minimum prerequisite of high school Algebra I, Geometry, and Algebra II with an appropriate mathematics placement score.
This course is taught as a DUAL ENROLLMENT course with Calhoun Community College on Austin High’s campus. Cost is approximately $550.00. MTH 112 emphasizes the algebra of functions and also covers systems of equations and inequalities, quadratic inequalities, and the binomial theorem. MTH 113 includes the study of trigonometry and inverse trigonometric functions, and includes extensive work with trigonometric identities and equations. Additional topics may include conic sections, sequences, and using matrices to solve linear systems.

CALHOUN DUAL ENROLLMENT CALCULUS I, MTH 125 (907605)
Grade: 12  Credit: 1.0  Prerequisite: A minimum prerequisite of high school Algebra I, Geometry, and Algebra II with an appropriate mathematics placement score.
This course is taught as a DUAL ENROLLMENT course with Calhoun Community College on Austin High’s campus. Cost is approximately $550.00. Course topics include the limit of a function; the derivative of algebraic, trigonometric, exponential, and logarithmic functions; and the definite integral and its basic application to area problems.
SCIENCE

All students are required to complete Biology, Physical Science or Chemistry, and two additional Science courses to meet graduation requirements.

BIOLOGY (220011)

Grade: 9  Credit: 1.0

NOTE: FULFILLS THE “BIOLOGY” GRADUATION REQUIREMENT. Content standards within this course are organized into 4 core ideas: Molecules to Organisms, Ecosystems (Interactions, Energy, and Dynamics) Heredity (Inheritance, and Variations of Traits), and Unity/Diversity. Students will be required to perform laboratory investigations, problem-solving activities, keep records, make reports, present oral and written projects, and participate in discussions regarding the results and conclusions of scientific investigations.

ADVANCED BIOLOGY (220013)

Grade: 9  Credit: 1.0

NOTE: FULFILLS THE BIOLOGY GRADUATION REQUIREMENT. Covers advanced work in the Biology Core content standards; scientific process and application skills; cell processes; cell theory; photosynthesis and cellular respiration; genetics; classification; plants; animals; ecology; biogeochemical cycles. Course requirements may include, but may not be limited to, performing and presenting an integrated science project(s), writing research papers, and performing community service projects related to course topics. This course is in preparation for Advanced Placement (AP) science.

PHYSICAL SCIENCE (220051)

Grade: 10  Credit: 1.0  Prerequisite: Biology

NOTE: FULFILLS THE “A PHYSICAL SCIENCE” GRADUATION REQUIREMENT; is a core science course designed as an inquiry-based introduction to the basic concepts and skills of chemistry and physics. Students will be required to perform laboratory investigations, problem-solving activities, keep records, make reports, present oral and written projects, and participate in discussions regarding the results and conclusions of scientific investigations. When taken at the high-school level, Physical Science fulfills the physical science core for either diploma.

CHEMISTRY (220061)

Grade: 10, 11, 12  Credit: 1.0  Prerequisite: Completion of Algebra and Biology

FULFILLS THE “A PHYSICAL SCIENCE” GRADUATION REQUIREMENT. Covers Chemistry Core content standards; scientific process and application skills; matter classification; carbon chains; periodic table; solutions; kinetic theory; stoichiometry; ideal gases; physical and chemical changes; chemical and nuclear reactions. This course will involve higher order thinking, student centered learning, and inquiry based labs as outlined by the state curriculum. A personal scientific calculator is needed to take this course.

ADVANCED CHEMISTRY (220063)

Grade: 10, 11, 12  Credit: 1.0  Prerequisite: Completion of Algebra and Biology

NOTE: FULFILLS THE “A PHYSICAL SCIENCE” GRADUATION REQUIREMENT. Covers Advanced Chemistry Core content standards; scientific process and application skills; matter classification; carbon chains; periodic table; solutions; kinetic theory; stoichiometry; ideal gases; physical and chemical changes; chemical and nuclear reactions. Provides students with the opportunity to establish a foundation in the modern chemical principles and to develop laboratory techniques. Major topics include measurement, matter and energy, atomic structure, periodic laws, chemical bonding, chemical reactions, stoichiometry, thermochemistry, kinetics, acid-base chemistry, equilibrium, and gas laws. A personal scientific calculator is needed to take this course. The course will involve higher order thinking, pupil centered learning, and inquiry based labs as outlined by the state curriculum. The advanced Chemistry course will also prepare students for AP Chemistry and is a one term condensed course where work is rigorous and students are required to read outside of class and prepare for lessons in advance. Homework and tests will not be repeated and requires students who want to take the course to be hardworking conscientious and dedicated to doing well. Professional career suggestions for Advanced Chemistry would include pharmacy, medicine and engineering.

HUMAN ANATOMY AND PHYSIOLOGY (220026) **AUSTIN HIGH SCHOOL ONLY**

Grade: 11,12  Credit: 1.0  Prerequisite: Completion of biology and a physical science course

An elective biological science with content related to the structure and function of the components of the human body. Studies include, but may not be limited to, structure and function of cells, tissues, and organs; organization of the human body; biochemistry; skeletal, muscular, nervous, endocrine, digestive, respiratory, cardiovascular, integumentary, immune, urinary, and reproductive systems. Students will be required to perform laboratory investigations, problem-solving activities, keep records, make reports, present oral and written projects, and participate in discussions regarding the results and conclusions of scientific investigations. This course includes required dissections.
**AP BIOLOGY (220014)**  
*Grade: 11, 12  Credit: 1.0  Prerequisite: One year of Biology and Chemistry*  
College-level advanced course following the curriculum established by the College Board Advanced Placement (AP) program for biology; scientific process and application skills; molecules; cells; heredity; evolution; organisms; populations. Also included are an overview of viruses, prokaryotes and protists, basic principles of ecology, plus a survey of plant and animal diversity including their classifications, morphology, physiology and reproduction. [See AP Descriptor](#).

**AP CHEMISTRY (220064)**  
*Grade: 11, 12  Credit: 1.0  Prerequisite: Completion of Chemistry and Instructor Approval*  
College-level advanced course following the curriculum established by the College Board Advanced Placement (AP) program for chemistry; atomic theory and structure; chemical bonding; nuclear chemistry; gases; liquids and solids; solutions; reaction types; stoichiometry; equilibrium; kinetics; thermodynamics. All AP chemistry students are required to take the first semester exam. [See AP Descriptor](#).

**AP ENVIRONMENTAL SCIENCE (220032)**  
*Grade: 11, 12  Credit: 1.0  Prerequisite: Completion of Chemistry*  
The AP Environmental Science course is designed to be the equivalent of an introductory college course in environmental science, through which students engage with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world. The course requires that students identify and analyze natural and human-made environmental problems, evaluate the relative risks associated with these problems, and examine alternative solutions for resolving or preventing them. Environmental Science is interdisciplinary, embracing topics from geology, biology, environmental studies, environmental science, chemistry, and geography. [See AP Descriptor](#).

**AP PHYSICS 1 Algebra Based (220057)**  
*Grade: 11, 12  Credit: 1.0  Prerequisite: Completion of Algebra*  
AP Physics 1 is an algebra-based, introductory college-level physics course. Students cultivate their understanding of Physics through inquiry-based investigations as they explore topics such as Newtonian mechanics (including rotational motion); work, energy, and power; mechanical waves and sound; and introductory, simple circuits. [See AP Descriptor](#).

**AP PHYSICS 2 Algebra Based (220058)**  
*Grade: 11, 12  Credit: 1.0  Prerequisite: AP Physics 1*  
AP Physics 2 is an algebra-based, introductory college-level physics course. Students cultivate their understanding of Physics through inquiry-based investigations as they explore topics such as fluid statics and dynamics; thermodynamics with kinetic theory; PV diagrams and probability; electrostatics; electrical circuits with capacitors; magnetic fields; electromagnetism; physical and geometric optics; and quantum, atomic, and nuclear physics. [See AP Descriptor](#).

**AP PHYSICS C: Mechanics (220069)**  
*Grade: 11, 12  Credit: 1.0  Prerequisite: Pre-Calculus/Advanced Math*  
College-level advanced physics course following the curriculum established by the College Board Advanced Placement (AP) Program for physics; this course should provide instruction in Newton’s laws of motion; work, energy and power, systems of particles and linear momentum; circular motion and rotation; and oscillations and gravitation. It is strongly recommended for students who intend to major in engineering or related fields. This class must be taken first in the AP Physics C series, and is a prerequisite for Electricity and Magnetism. [See AP Descriptor](#).

**AP PHYSICS C: Electricity and Magnetism (220075)**  
*Grade: 12  Credit: 1.0  Prerequisite: Pre-Calculus/Advanced Math, Physics, AP Physics C: Mechanics*  
College-level advanced physics course following the curriculum established by the College Board Advanced Placement (AP) Program for physics; this course should provide instruction in electrostatics; conductors; capacitors, and dielectrics; electric circuits; magnetic fields; and electromagnetism. It is strongly recommended for students who intend to major in engineering or related fields. [See AP Descriptor](#).

**PLANT BIOTECHNOLOGY (420053) DECATUR HIGH SCHOOL ONLY**  
*Grade: 11, 12  Credit: 1.0  Prerequisite: Biology and Physical Science*  
NOTE: DOES NOT FULFILL THE GRADUATION REQUIREMENT FOR BIOLOGY OR "A PHYSICAL SCIENCE". Scientific process and application skills; plant phyla; plant reproduction and genetics; plant adaptations; plant structure, function, and organization; photosynthesis and cellular respiration; plant ecology; plant diseases. Designed for the student who wishes to have a better understanding about plant life. Emphasis will be placed on plant physiology, diversity, and plant growth. The student will be required to learn techniques of rooting, fertilizing, preparing, and the upkeep of plants outdoors. The student will apply garden techniques they have learned to our school gardens. Students will raise their own plants. Activities will include laboratory experiments done with plants, learning to care for and maintain domestic plants, and helping to create and maintain a natural plant habitat on the school grounds. Outdoor work and garden gloves are required.
EARTH AND SPACE SCIENCE (220081)
Grade: 11, 12  Credit: 1.0  Prerequisite: Biology and Physical Science
NOTE: DOES NOT FULFILL THE GRADUATION REQUIREMENT FOR BIOLOGY OR "A PHYSICAL SCIENCE". Earth and Space science is an elective science course that focuses on a comprehensive application of all disciplines of science, based on our ever-changing planet and the integration of systems that constantly evolve. Content standards within this course are organized according to 2 core ideas: Earth's Place in the Universe and Earth's systems. Integrated within the disciplinary core ideas of this course are the Engineering, Technology and Applications of Science core ideas.

FIELD STUDIES (220044)
Grade: 11, 12  Credit: 1.0  Prerequisite: Biology and an evaluation for with a Science instructor recommendation. Students must also have a Driver’s License.
This course combines a select group of students from both Decatur and Austin high schools to embark on a unique learning experience at Wetlands Edge Environmental Center (WEEC). Much of the course will be conducted in the field where activities include bioassessment of streams, wading water using nets and seines and more. Emphasis of the course will be on aquatic ecosystems but will include a variety of class and field experiences. Much of the course will be conducted in the field where activities include bioassessment of streams, wading water using nets and seines, handling organisms, specimen collecting, water testing, hiking, orienteering, wildlife inventory, and generally getting wet and dirty. Emphasis of the course will be on aquatic ecosystems but will include a variety of class and field experiences in other areas such as ichthyology, herpetology, and ornithology. Students will also need to have an appreciation for animals as they will be involved in the life support and husbandry of the many organisms displayed in the center. Class will require a strong commitment from students as it can only be taught 4th block and must extend beyond the regular school day (flexibility with your employer if you work). Number will be limited due to the nature of the class. Students will drive or carpool to the WEEC site or other study sites daily for class. *Application in Guidance

HUMAN BODY STRUCTURES AND FUNCTIONS (490015)
Grade: 10, 11, 12  Credit: 1.0  Prerequisite: Medical Professions I
Human Body Structures and Functions is a one-credit course designed to help students develop a basic knowledge of the normal structure and function of the human body. The course uses an integrated approach for teaching medical terminology to the health care student by incorporating medical terminology into instruction regarding human body structures and functions and the disease process. This course is equal to a science credit for 11th or 12th grade year.

MARINE SCIENCE (BIOLOGY) (220040)
Grade: 11, 12  Credit: 1.0  Prerequisite: Biology and Physical Science
Scientific process and application skills. Designed to introduce the concepts of freshwater and marine biology. Students will learn about the physical characteristics such as salinity, pressure, and currents of the ocean as well as marine habitats—coral reefs, open ocean, estuaries, beach life, and deep ocean. An emphasis will be on key ocean animals such as the shark, whales, dolphins, sea lions, and penguins.

SOCIAL STUDIES

All students must complete World History, two years of United States History, Government, and Economics to meet graduation requirements.

WORLD HISTORY: 1500 TO PRESENT (230013)
Grade: 9  Credit: 1.0
Chronological history of the world: the emergence of a global age; the Age of Revolutions; the Age of Isms; era of global war; the world from 1500 to present. This course continues the study of world history from 1500 to the present. Critical thinking and analysis are important in this course. The course directs students to think critically about the forces that combine to shape the world today. Students will analyze development and changes in the European, Asian, African and American civilizations and ways in which the interactions of these cultures have influenced the formation of today's world. Geographic concepts increase learners' comprehension of global connections as they expand their knowledge and understanding of a wide variety of cultures, both historical and contemporary. Knowledge and understanding gained during the previous year's study provide the foundation for the critical analysis required in this course. This is a required social studies course for students in Alabama schools.

ADVANCED WORLD HISTORY: 1500 TO PRESENT (230015)
Grade: 9  Credit: 1.0
Advanced work in the chronological history of the world: the emergence of a global age; the Age of Revolutions; the Age of Isms; era of Global War; the Cold War era; the world from 1500 to present. This course will follow the same course of study as that of grade level and honors World History. However, it will go into greater depth and detail in an attempt to find the connecting patterns in historical study. It will stress development of historical reading comprehension skills and strategies, critical thinking, writing, listening, note-taking, and test-taking skills. The course will also include analysis of
primary historical documents and an introduction to electronic scholarly research. The course is highly recommended for those students preparing for AP U.S. History.

**AP WORLD HISTORY: 1500 TO PRESENT (230027)**  
**DECATUR HIGH SCHOOL ONLY**  
Grade: 9 or 12  
Credit: 1.0  
Advanced work in the chronology of the world: the emergence of a global age; the Age of Revolutions; the Age of Isms; era of Global War; the Cold War era; the world from 1500 to present. This course will follow the same course of study as that of grade level and honors World History. However, it will go into greater depth and detail in an attempt to find the connecting patterns in historical study. It will stress development of historical reading comprehension skills and strategies, critical thinking, writing, listening, note-taking, and test-taking skills. The course will also include analysis of primary historical documents and an introduction to electronic scholarly research. The course is highly recommended for those students preparing for AP U.S. History in 10th grade.

**UNITED STATES HISTORY TO 1877 (230016)**  
Grade: 10  
Credit: 1.0  
Prerequisite: Sophomore Status  
Chronological survey of major events and issues: colonization; American Revolution; development of political system and distinct culture; slavery; reform movements; sectionalism; Civil War; Reconstruction; concepts related to Alabama history and geography. The U.S. History to 1877 is a comprehensive two-year sequence beginning in the 10th grade with beginnings to 1877 and 1877 to present. Students will begin with the earliest discoveries on the North American continent and follow a chronological study of the major events, issues, movements, leaders and groups of people of the United States through the Reconstruction period from a national and Alabama perspective. This course will build upon the foundation of knowledge gained in the 5th and 6th grades as well as the 8th and 9th grades World History. This course will follow the state course of study and emphasize the competencies needed to pass the Social Studies section of the graduation exam.

**ADVANCED UNITED STATES HISTORY 10 (230018)**  
Grade: 10  
Credit: 1.0  
Prerequisite: Advanced or AP World History and Teacher Recommendation  
This course is the first part of the content covered in AP US History. This course is a survey course in American history and is designed to provide students with a solid foundation for understanding and analyzing the history of the United States from colonization through industrialization. This course is rigorous and is intended to prepare students for AP US History and the AP Exam. This course requires students to develop skills in note-taking, organization, logic, analysis, synthesis, evaluation, critical thinking, reading and writing. Students will complete advanced work in the chronological survey of major events and issues: colonization; American Revolution; development of political system and distinct culture; slavery; reform movements; sectionalism; Civil War; Reconstruction; concepts related to Alabama. This course is an above grade-level class equivalent to an introductory college course in United States History through Reconstruction. Students will analyze the political, social, economic, literary and cultural history of the United States. Students will learn to interpret and apply data from original documents, compare and contrast change over time, and be able to support or refute an argument or position. Students in this class are on track to take AP US History. A considerable amount of self-directed study will be required of students who expect to do well on the AP exam. *See AP Descriptor

**UNITED STATES HISTORY FROM 1877 TO PRESENT (230019)**  
Grade: 11  
Credit: 1.0  
Chronological survey of major events and issues: industrialization; Progressivism; foreign policy; World War I; the Great Depression; World War II; post-war United States; contemporary United States, concepts related to Alabama history and geography. This course continues the study of United States History from the tenth grade and follows the current course standards. It studies the economic, geographic, social, and political development of the United States after the Reconstruction era. This course is built upon the previous knowledge foundation obtained in the tenth grade course. It will show how America grew into an international power after Reconstruction. This course is a critical analysis of the United State decision and actions on major domestic issues as well as international affairs.

**AP UNITED STATES HISTORY FROM 1877 TO PRESENT (230022)**  
Grade: 11  
Credit: 1.0  
Prerequisite: Advanced 10 US History  
College-level advanced course following the curriculum established by the College Board Advanced Placement (AP) Program for United States history. This is an above grade-level class equivalent to an introductory college course in United States history, reconstruction through current times. The students will evaluate historical materials to weigh the evidence and interpretation presented by historical research. The students will analyze the political, social, economic, literary and cultural history of the United States. Students will participate in discussion, write essays and use primary sources to write document-based questions (a minimum of 2 timed writings each 9 weeks). This course requires the ability to comprehend college level material, to synthesize new information and be a self-motivated learner. Summer reading is required. *See AP Descriptor

**CALHOUN DUAL ENROLLMENT UNITED STATES HISTORY, HIS 201/202 (905004/905005)**  
Grade: 11  
Credit: 1.0  
Prerequisite: Advanced 10 US History  
Tuition Cost: +/- $450 p/course. Both 201 and 202 are required to receive one high school credit.  
US History 201 this course surveys United States history during colonial, Revolutionary, early national, and antebellum periods. It concludes with the Civil War  
US History 202 This course is a continuation of US History 201; it surveys United States history form the Reconstruction era to the present.
ECONOMICS (230051)
Grade: 12  Credit: .50
A one-semester course required of all seniors paired with US Government includes the basic concept of how our economic system works as compared to other systems, what the unique qualities of the free enterprise system are, and how the individual operates within the system. The study emphasizes the cause and effect of economic actions, consumer planning and participation, consumer problems, and world activities. The course incorporates a study of comparative economics, economic theory, and consumer economics; therefore, a broad conceptual approach is mandated. Also incorporated are basic elements of economics; comparative economic systems and economic theories; role of the consumer; business and labor issues; functions of government; structure of U.S. banking system; role of Federal Reserve bank. The study of man's efforts to satisfy his unlimited wants through the use of his scarce and limited resources. This is a ½ credit course.

UNITED STATES GOVERNMENT (230041)
Grade: 12  Credit: .50
A one-semester course required of all seniors and is paired with Economics. Government is a study of the origins, development, and principles of the United States political system. It includes comparisons of democracy and other political systems while emphasizing the basic civil rights inherent to the American political system. The course also includes a review of the foundations of American government from the point of view of the practical day-to-day workings of the government, political parties, and a detailed study of the legislative, executive, and judicial branches of government. Also incorporated are origins, functions, and branches of U.S. government; representative democracy; federalism; political/civic life; analysis of Constitution, Bill of Rights, and other relevant documents; foreign policy. This is a ½ credit course

*AP UNITED STATES GOVERNMENT AND POLITICS (230047)
*AP UNITED STATES GOVERNMENT AND POLITICS (230047aq) Career Academies of Decatur
Grade: 11, 12  Credit: 1.0  Prerequisite: Approval of the Advanced Placement Teacher
A year long, College-level advanced course following the curriculum established by the College Board Advanced Placement (AP) Program for U.S. government and politics. A two-semester course designed to provide the student with a learning experience obtained in most college introductory American government and politics courses. The course is designed to give students a critical perspective on government and politics in the United States through application of topics and concepts learned in class to current events. The course involves the study of general concepts used to interpret American politics and the analysis of scientific case studies, interpretation of acclaimed readings on American government and politics, and thorough analysis of political current events. It also requires familiarity with the various institutions, groups, practices, beliefs and ideas that make up the American political reality. Topics to be explored are the Constitutional underpinnings of American government, American political beliefs and behaviors, linkage institutions, policy-making institutions, different types of policy, civil liberties, and civil rights. The course is taught on the freshman college level and is designed to prepare students for the AP exam in the spring. *See AP Descriptor

*AP MACROECONOMICS (230054)
Grade: 11, 12  Credit: 1.0  Prerequisite: Approval of the Advanced Placement Teacher
Year long, College-level advanced course following the curriculum established by the College Board Advanced Placement (AP) Program for macroeconomics; basic economic concepts; measurement of economic performance; national income and price determination; financial sector; inflation, unemployment, and stabilization policies; economic growth and productivity; open economy; international trade and finance. A one-semester course for which college credit may be earned. The content will help students develop critical thinking skills through the understanding, application, and analysis of fundamental economic concepts. In this course, students will learn to apply quantitative and mathematical skills to the discipline of Economics. The course teaches the students to test economic propositions empirically, improve their decision-making skills, and apply economic logic to a wide variety of real and hypothetical situations. The course is taught on the freshman college level and is designed to prepare the students for the advanced placement exam in the spring. *See AP Descriptor

*AP HUMAN GEOGRAPHY (230062) Elective credit only
DECATUR HIGH SCHOOL ONLY
Grade: 11, 12  Credit: 1.0  Prerequisite: Approval of the Advanced Placement Teacher
The purpose of the AP course in Human Geography is to introduce students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth's surface. Students employ spatial concepts and landscape analysis to examine human social organization and its environmental consequences. They also learn about the methods and tools geographers use in their science and practice. *See AP Descriptor
FOREIGN LANGUAGES

FRENCH 1 (270023)
Grade: 9, 10, 11, 12  Credit: 1.0
Students study basic grammar, common expressions, vocabulary, and sentence structure. Comprehension and proper pronunciation are emphasized. Each lesson includes oral drills, written practice, reading, and listening exercises. Oral presentations and tests will be assigned. French culture and geography are also explored. It is recommended that students maintain a “C” or above average in previous English/Language Art courses.

FRENCH 2 (270024)
Grade: 9, 10, 11, 12  Credit: 1.0  Prerequisite: French 1
Students focus on listening, speaking, reading, and writing skills in greater depth. A major emphasis is the oral use of the language in everyday situations. Oral presentations and tests will be assigned. Reading skills are expanded through the use of short stories, and dialogues. Students will also be required to write paragraphs in the target language. It is recommended that students complete French 1 with at least a “C” average.

FRENCH 3 (270025)
Grade: 10, 11, 12  Credit: 1.0  Prerequisite: French 2
Students continue to build communicative skills, review grammar, read and write creatively, and gain more insight into French culture, including art and history. Intermediate-level conversation will be an important component of the class, as well as readings from Francophone literature and a French current events magazine. Oral presentations and tests will be assigned. Students will be required to write short compositions in the target language. Little English will be spoken in the class. It is recommended that students complete French 2 with at least a “C” average.

FRENCH 4 (270026)
Grade: 11, 12  Credit: 1.0  Prerequisite: French 3
Students will review all French grammar encountered in the first three years of study. Students will become highly proficient. Students will improve their communicative competence through the study of French history, art, literature, and culture. Students will be required to write compositions and discuss readings in the target language. Little English will be spoken in class. Oral presentations and tests will be assigned. It is recommended that students complete French 3 with at least a “C” average.

FRENCH 5 (270026)
Grade: 11, 12  Credit: 1.0  Prerequisite: French 4
This course is primarily in French. Content includes extensive reading of French literature in French, in depth study of French and French culture and History, as well as composition of essays in French. The student will exhibit a higher skill level of reading, speaking, listening and writing in French.

LATIN (270111) Decatur High School only
Grades: 9, 10, 11, 12  Credit: 1.0
Prerequisite: None.

SPANISH 1 (270153)
Grade: 9, 10, 11, 12  Credit: 1.0
Students will be introduced to the Spanish language and culture of Spanish-speaking nations. Basic skills are stressed in the area of speaking, listening, reading, and writing in Spanish. The acquisition of vocabulary is especially emphasized. Students will be expected to speak Spanish and to participate in activities with other students. Oral presentations and written exercises are required.

ADVANCED SPANISH 1 (270153ae)
Grade: 9, 10, 11  Credit: 1.0
Students who completed a full year of Spanish in 8th grade should take Advanced Spanish 2. Listening and speaking skills including understanding and responding to simple directions, expressions of courtesy, and questions related to daily routines; reading and writing skills including words and phrases used in basic situational contexts; beginning understanding of Spanish-speaking cultures. Includes an in-depth study of vocabulary, grammar and culture, in order to gain facility in the four foreign language skills. The focus will be on application of the four skills. Students are evaluated on the basis of participation, homework, quizzes, oral presentations, unit tests and semester exams.

SPANISH 2 (270154)
Grade: 9, 10, 11, 12  Credit: 1.0  Prerequisite: Spanish 1
Students build upon the vocabulary and basic grammar taught in Spanish I to become more proficient. Students become more adept in creating with language. Students must purchase a Spanish/English dictionary. Learning of a new language through the analysis of texts, film, grammar and vocabulary.

ADVANCED SPANISH 2 (270154aa)
Grade: 9, 10, 11, 12 Credit: 1.0 Prerequisite: Recommended 80 or above in Spanish 1
Students will develop listening and speaking skills including understanding and comprehension of main ideas from simple texts, writing with comprehension of short presentations will further understanding of Spanish-speaking cultures. This course involves developing the four skills further and applying them inside the classroom community and in the wider community as well. Speaking, listening, reading, and writing are developed through the reading, interaction with and analysis of short stories, through various other authentic texts, film, through oral projects and classroom participation, through grammar study and analysis, and through the study of vocabulary. Students are evaluated on the basis of class participation, interactive and individual oral projects, quizzes and tests, writing, homework and semester exams.

SPANISH 3 (270155)
Grade: 10, 11, 12 Credit: 1.0 Prerequisite: Spanish 2
Students continue to build communicative skills, review grammar, read and write creatively, and gain more insight into Spanish culture and civilization. Students will further listening and speaking skills including understanding and responding to factual and interpretive questions, paraphrasing, explaining, and giving cause; interpreting main ideas and supporting details from authentic texts.

SPANISH 4 (270156)
Grade: 11, 12 Credit: 1.0 Prerequisite: Spanish 3 and Teacher Approval
Listening and speaking skills including understanding and responding to factual and interpretive questions; proposing and supporting solutions to issues and problems, creating compositions. Emphasis is on communication in the target language through the use of the four skills: reading, writing, listening and speaking. Culture and language will be studied through authentic texts.

*AP SPANISH (270157)
Grade: 11, 12 Credit: 1.0 Prerequisite: Successful completion of Spanish 4 or Instructor Approval
This course work is conducted primarily in Spanish. Content includes extensive reading of Spanish literature in Spanish, in depth study of Spanish and Hispanic culture and history, as well as composition of essays in Spanish. The student will exhibit skill levels of reading, speaking, listening and writing consistent with those in sophomore level college classes by the completion of this fourth year of Spanish.
*See AP Descriptor

SPANISH FOR NATIVE SPEAKERS (270164) DECATUR HIGH SCHOOL ONLY
Grade: 9, 10, 11, 12 Credit: 1.0
This course reviews grammatical and lexical concepts of the Spanish language. This course fosters native language literacy and covers Latin American literature and current events.

ARMY JROTC

The mission of JROTC is to “Motivate young people to be better citizens.” JROTC is a progressive development program that teaches citizenship and provides high school students the opportunity to learn and practice leadership. The curriculum is designed to help the high school cadets to develop the following core capabilities: Build capacity for lifelong learning, communication skills, personal responsibility, citizenship, teamwork, leadership, fitness, and critical reasoning & decision-making. To gain maximum benefit, cadets are encouraged to enroll their freshman year and remain in the program through their senior year. The JROTC program is flexible to accommodate new students to enroll at any time.

ARMY JROTC LEADERSHIP EDUCATION AND TRAINING (LET I) (480041)
Grade: 9 Credit: 1.0
A one-credit course designed for first-year cadets. The class is both classroom and laboratory instruction about the history, customs, traditions and purpose of Army JROTC. Emphasis is placed on basic leadership principles, values, teamwork, and personal responsibility.

ARMY JROTC LEADERSHIP EDUCATION AND TRAINING (LET II) (480042)
Grade: 10 Credit: 1.0 Prerequisite: 1st year, JROTC Leadership Education & Training (LET 1)
A one-credit course designed to build on LET 1 first year JROTC classes. The course provides cadets intermediate instruction on leadership theories,
methods and practical application in the classroom and during labs and JROTC unit activities outside the classroom. Emphasis is placed on communication techniques, citizenship, fitness and map reading / orienteering skills.

ARMY JROTC LEADERSHIP EDUCATION AND TRAINING (LET III) (480043)
Grade: 11  Credit: 1.0  Prerequisite: 1st & 2nd Years, JROTC Leadership Education & Training LET 1/2
A one-credit course designed to provide advanced instruction in leadership, communication, and problem-solving. Students will have hands-on experiences as leaders in the unit and assist in the integration, training and team building of (LET 1 and LET 2) less experienced cadets. Emphasis is placed on negotiation skills, communication, fitness and management principles.

ARMY JROTC LEADERSHIP EDUCATION AND TRAINING (LET IV) (480044)
Grade: 12  Credit: 1.0  Prerequisite: 1st, 2nd and 3rd Years, JROTC Leadership Education & Training LET 1/2
A one-credit course provides leadership opportunities for students to develop as leaders in assigned command, staff and project leadership positions. Students are assigned leadership positions within the JROTC unit organization and fulfill responsibilities for planning according to their position, assigned projects and specialty teams that they choose to join. Emphasis is placed on improving communication techniques, planning and executing training, decision making and life skills after high school.

ARMY JROTC SPECIALTY TEAMS (480077)
Grade: 9 - 12  Credit: 1.0  Prerequisite: Approval from instructor

FINE ARTS

VISUAL ARTS - AUSTIN HIGH SCHOOL COURSE OFFERINGS

Introduction to Visual Arts (286100)
Grades: 9, 10, 11, 12  Credit: 1.0
Create; produce; elements and principles of design; two-and-three- dimensional techniques and media; art history; art vocabulary; aesthetics; criticism; solution of art problems to communicate ideas; safety issues with handling and storage of materials. This course is a study of the basic fundamentals of art and is a prerequisite for advanced art courses. It provides students with an overview introduction to media and to various techniques in the areas of drawing, painting, sculpture, ceramics, printmaking, crafts, art history, and critique. Visual Arts I is offered to all students.

286101- Ceramics & Crafts
Grades: 10, 11, 12  Credit: 1.0
This class is an introduction to clay, fine crafts, and 3-D design with an emphasis on hand building and learning throwing techniques. Applied (functional) art techniques will also be taught. Students are encouraged to explore creative expression by solving problems of three dimensional form and utilizing surface embellishment. Other techniques may include but are not limited to jewelry, stained glass, textiles, and mixed-media.

286207- Ceramics & Crafts II, 286307-Ceramics & Crafts III, or 286407-Ceramics & Crafts IV
Grades: 11, 12  Credit: 1.0
A continuation of the previous course with an emphasis on building a body of work and preparing the student’s portfolio for college and scholarship applications.

286100b- Drawing I
Grades: 9, 10, 11, 12  Credit: 1.0
If you love to draw, or don’t know how and want to learn, this is the class for you! This is a one-credit course where you will learn two-dimensional design; problem-solving using a variety of drawing media and techniques; elements and principles of design; aesthetics; criticism and art history; evaluation of artwork.

286210-Drawing II, 286310-Drawing III, or 286410-Drawing IV
Grades: 10, 11, 12  Credit: 1.0
A continuation of the previous course with an emphasis on building a body of work and preparing the student’s portfolio for college and scholarship applications.
**286100c-Painting I**

*Grades: 9, 10, 11, 12  Credit: 1.0*

For everyone who wants to paint! This is a one-credit course where you will learn two-dimensional design; problem-solving using a variety of painting media and techniques; elements and principles of design; aesthetics; criticism and art history; evaluation of artwork.

**286208-Painting II, 286308 Painting III, or 286408 Painting IV -** A continuation of the previous course with an emphasis on building a body of work and preparing the student’s portfolio for college and scholarship applications.

**286103-Digital Photography I**

*Grades: 10, 11, 12  Credit: 1.0*

Document the world around you and tell your story through photographs. This is a one-credit course where you will learn elements and principles of design; aesthetics; criticism; art/photography history; evaluation of artwork; proper care and storage of photography supplies; integration of appropriate media and techniques; communication of ideas; solution of artistic problems; use of technology.

**DIGITAL CAMERA WITH MANUAL SETTING REQUIRED; NO CELL PHONE CAMERA**

**286203-Digital Photography II**

*Grades: 11, 12  Credit: 1.0*

A continuation of the previous course with an emphasis on building a body of work and preparing the student’s portfolio for college and scholarship applications.

**Prerequisites:** Digital Photography I

**282103- Video Game Design (Sequential Art) -**

*Grades: 10, 11, 12  Credit: 1.0*

Video games are a multi-billion dollar industry, and you can get a head start in the field while still in high school. Sequential art introduces you to video game design, animation, and comics and then allows you to focus on developing your skills as a videogame designer. This is a one-credit course where you will learn two-dimensional design; problem-solving as it relates to storytelling; art as communication; elements and principles of design; aesthetics; the history of sequential art; evaluation of artwork.

**282203- Video Game Design II, 282303-Video Game Design III**

*Grades: 11, 12  Credit: 1.0*

A continuation of the previous course with an emphasis on building a body of work and preparing the student’s portfolio for college and scholarship applications.

**Prerequisite:** Video Game Design I

**282105- Movie Making**

*Grades: 10, 11, 12  Credit: 1.0*

This one credit course, proficient level, introduces the creative and conceptual aspects of designing and producing moving and sequential images for the variety of cinematic, film/video, static sequential, and multimedia presentations including: fictional dramas, documentaries, music videos, artistic and experimental presentations and/or installations, interactive, immersive and performance media, traditional and digital comics, etc. Typical course topics include: aesthetic meaning, appreciation and analysis of moving imagery; all processes of development including: storytelling, pre-production planning and organization, production and post-production methods, tools and processes; moving image presentation, transmission, distribution and marketing; as well as contextual, cultural, and historical aspects and considerations.

**282205-Movie Making II- Continuation of Movie Making-**

*Grades: 11, 12  Credit: 1.0*

This course topics include: aesthetic meaning, appreciation and analysis of moving imagery; all processes of development including: storytelling, pre-production planning and organization, production and post-production methods, tools and processes; moving image presentation, transmission, distribution and marketing; as well as contextual, cultural, and historical aspects and considerations.

**AP ART HISTORY (280101)**

*Grades: 11, 12  Credit: 1.0*

AP Art History is a college level survey course that includes the traditional history of European art as well as the art of other cultures worldwide. Students will learn to analyze artwork visually as well as contextually, taking into consideration factors such as patronage, religion, politics, class, function, gender, and ethnicity. No prior art experience is necessary. This class is recommended for 11th and 12th graders who have done well in a humanities course such as history or literature and are ready for college level work. *See AP Descriptor*
**AP STUDIO ART DRAWING (280102)**

*Grades: 11, 12 Credit: 1.0*

College-level advanced course approved by the College Board Advanced Placement (AP) Program for art; portfolio production; demonstrate mastery of drawing in concept, composition, and execution; develop a body of work investigating a visual idea in drawing; variety of concepts and approaches in drawing; documentation. *See AP Descriptor*

**Grade: 12 Credit: 1.0**

**Prerequisite: Visual Arts Levels I, II and III**

**VISUAL ARTS - DECATURE HIGH SCHOOL COURSE OFFERINGS**

**ART I (286100)**
Create; produce; elements and principles of design; two-and three-dimensional techniques and media; art history; art vocabulary; aesthetics; criticism; solution of art problems to communicate ideas; safety issues with handling and storage of materials. This course is a study of the basic fundamentals of art and is a prerequisite for advanced art courses. It provides students with an overview introduction to media and to various techniques in the areas of drawing, painting, sculpture, ceramics, printmaking, crafts, art history, and critique. Visual Arts I is offered to all students.

*Grades: 9, 10, 11, 12 Credit: 1.0*

**Prerequisite: None**

**ART II (286210)**

(Drawing and Painting)
Create; visual relationships; problem solve using a variety of media and techniques; elements and principles of design; aesthetics; criticism; art history; art vocabulary; evaluation of artwork; interdisciplinary connections. Visual Arts II is a review of various art media, techniques, skills, and art appreciation. Emphasis is on observational drawing skills and the creative process. Students will learn to think conceptually while increasing their skills in the following areas: composition, drawing, painting, and printmaking.

*Grade: 10, 11, 12 Credit: 1.0*

**Prerequisite: Art I**

**ART III (286310)**

(Drawing and Painting)
Create; problem solve; utilize variety of media and techniques; communicate concepts, emotions, intentions; elements and principles of design; technology; independent research; self-directed sketchbook; critical analysis; aesthetics; art history; interdisciplinary connections. Visual Arts III gives students the opportunity to work in areas of special interest in regard to media and theme. This course is primarily geared toward, but not limited to, students preparing for the AP Visual Art course. Primary emphasis will be on producing portfolio quality pieces for the breadth and quality sections of the AP art portfolio.

*Grade: 11, 12 Credit: 1.0*

**Prerequisite: Art I and II**

**GRAPHIC ARTS (Graphic Design) (286106)**

Elements and principles of design; problem-solving using appropriate media, techniques, or processes; integration of technology; aesthetics; criticism; art history; evaluation of artwork. This class incorporates the use of a computer along with various software programs to produce professional imagery that could be used in the advertising and promotional field. Art skills are beneficial but not required. Creativity, imagination, and a good work ethic are vital to be successful in this class. This class is primarily intended for those interested in the graphic arts field. This course is not a prerequisite for advanced classes.

*Grades: 9, 10, 11, 12 Credit: 1.0*

**Prerequisite: None**

**PHOTOGRAPHY, LEVEL I (286102)**

Elements and principles of design; aesthetics; criticism; art/photography history; evaluation of artwork; proper care and storage of photography supplies; integration of appropriate media and techniques; communication of ideas; solution of artistic problems; use of technology. This course offers instruction in color digital photography. Students will learn how to use a camera understanding its many functions. They will also learn terminologies relative to photography. Students will learn techniques in capturing quality subject matter and editing photos using computer software. In addition, students will learn art history pertaining to photography. Works will be critiqued and displayed often.

*Grade: 9, 10, 11, 12 Credit: 1.0*
THREE-DIMENSIONAL ART (Ceramics/Crafts) (286207)
Three-dimensional design; problem-solving using a variety of media and techniques; elements and principles of design, technology; aesthetics; criticism and art history; evaluation of artwork. This course concentrates on the aesthetic use of clay in regard to hand-built pottery, sculpture, pottery wheel experience, and glazing. Crafts projects are varied and changing. Projects may include batik, mask making, weaving, mosaic, ornament construction, altered books, and any added projects.
Grade: 10, 11, 12  Credit: 1.0
Prerequisite: Visual Arts Levels I, II and III

*AP ART HISTORY (280101)
AP Art History is a college level survey course that includes the traditional history of European art as well as the art of other cultures worldwide. Students will learn to analyze artwork visually as well as contextually, taking into consideration factors such as patronage, religion, politics, class, function, gender, and ethnicity. No prior art experience is necessary. This class is recommended for 11th and 12th graders who have done well in a humanities course such as history or literature and are ready for college level work. *See AP Descriptor
Grade: 11, 12  Credit: 1.0
Prerequisite: Teacher recommendation required

*AP STUDIO ART DRAWING (280102)
College-level advanced course approved by the College Board Advanced Placement (AP) Program for art; portfolio production; demonstrate mastery of drawing in concept, composition, and execution; develop a body of work investigating a visual idea in drawing; variety of concepts and approaches in drawing; documentation. *See AP Descriptor
Grade: 12  Credit: 1.0
Prerequisite: Visual Arts Levels I, II and III

*AP STUDIO ART TWO-DIMENSIONAL DESIGN (280103)
College-level advanced course approved by the College Board Advanced Placement (AP) Program for art; portfolio production; demonstrate mastery of design in concept, composition, and execution; develop a body of work investigating a visual idea in 2-D design; variety of concepts and approach in 2-D design; documentation. *See AP Descriptor
Grade: 12  Credit: 1.0
Prerequisite: Visual Arts Levels I, II and III

BAND - **AUSTIN HIGH SCHOOL COURSE OFFERINGS**

283100-Concert Band: (Teacher permission only) is one of the performing instrumental ensembles offered at Austin. It consists of students in grades 9-12 who have passed an audition by the director and whose instrumental ability is on or above the B level of music. The marching band performs for all football games, homecoming parade, Christmas parade, and special community activities. The band actively participates in District and State Band Festivals and usually one out-of-state competition. The individual students are required to participate in Solo and Ensemble Festival and strongly encouraged to participate in All-State Band auditions.

283200-Symphony Band: (Teacher permission only) is one of the performing instrumental ensembles offered at Austin. It consists of students in grades 9-12 who have passed an audition by the director and whose instrumental ability is on or above the A level. The marching band performs for all football games, homecoming parade, Christmas Parade, and special community activities. The band actively participates in District and State Band Festivals, and usually one out-of-state competition. The individual students are required to participate in Solo and Ensemble Festival and strongly encouraged to participate in All-State Band auditions.

283112- Percussion: (Teacher permission only) is one of the performing instrumental ensembles offered at Austin. It consists of students in grades 9-12 who play concert and marching percussion instruments and who have passed an audition by the director. Members of this ensemble perform with the Symphony Band, the Concert Band, the Cadet Band, and the Marching Band as well as performing with the Percussion Ensemble.

283119- Instrumental Music: (Teacher permission only) are small groups of students scheduled through the day in instrumental music classes. Instruction is on an individual basis, with individual practice required and private lessons given at least once or twice a week to each student by the band director. Music Theory is taught as a part of the class when the makeup of the class lends itself to being a productive activity for the students. Students are expected to audition and participate in All-State and Solo and Ensemble Festival.

283219- Color Guard: (Teacher permission only) is one of the performing ensembles that accompanies the Marching and performing bands.
BAND - DECATURE HIGH SCHOOL COURSE OFFERINGS

COLOR GUARD  (280039)
This class is designed for members of the DHS band color guard only. It allows this auxiliary group a chance for structured daily rehearsal. It is required to register for this class for both 1st and 2nd semester to be a member of the color guard. This course will count as either a Fine Arts or P.E. credit.
Grade: 9, 10, 11, 12
Credit: 1.0
Fee: $55.00

TRACK (802208bc)

VOLLEYBALL (802208bd)

ADV. SPORTS CONDITIONING BOYS (802208cq)
ADV. SPORTS CONDITIONING GIRLS (802208cr)
The Advanced Sports Conditioning courses are designed to provide weight training and conditioning for all athletes. The boys and girls will have their own independent classes.

ADDITIONAL ELECTIVES

AUSTIN HIGH SCHOOL COURSE OFFERINGS

COMPUTER SCIENCE- PYTHON (S20054)
Grades: 11, 12 Credit: 1.0 Pre-requisite: AP Computer Science Principles
This elective course uses text-based programming, exclusively in Python, in multiple environments, to help students understand the connection between hardware and software. In this course, students will apply acquired knowledge to design solutions to various challenges. Emphasis is on learning the python language, with the support of web-based software tools to learn text-based programming through the iterative process of catching errors and debugging programs.

HEALTH EDUCATION (250002)
Grades: 10 Credit: .5
It is a diversified course covering many contemporary topics. The units covered will include, but not be limited to: mental wellness, personal fitness, nutrition, parenting, CPR, first aid, and sexually transmitted diseases. THIS COURSE REQUIRED FOR ALL DIPLOMA TYPES.

DRIVER AND TRAFFIC SAFETY EDUCATION (290001)
Grades: 10 Credit: .5 A valid driver’s permit is required.
Safe driving theory; in class study; driving hazards; boating safety; behind the wheel experience, safety practices and a practical application of traffic laws.

ACT PREP CLASS (802200ab)
Grades: 11, 12 Credit: 1.0
This is a class for students that wish to improve their test taking abilities and better prepare for the college entrance exams.

AUSTIN AMBASSADOR (802110)
Grades: 10, 11, 12 Credit: 1.0 Pre-requisite: YOU MUST BE AN AUSTIN AMBASSADOR
Students will travel to elementary schools daily and mentor students in grades K-5. In addition, students will enhance and utilize their leadership skills. Must have approval from Mrs. A. Williams-B201 to register for this course.

OFFICE ASSISTANT (802206)
Grades: 11, 12 Credit: 1.0
Chrome Aide, Guidance, Business Education, Lab Assistant, and Main Office assistants provide the opportunity to develop skills for solving problems, demonstrating initiative, and interacting with students, faculty, and the public under the supervision of the office staff. Criteria for selection: be in good academic standing and continue to make good grades, absences of any offenses against the Student Code of Conduct, good attendance record, recommendations from current teachers, and a written request explaining what expertise the student has to offer. A written application for Office Assistant must be submitted in the Guidance Office.
ACADEMIC TUTOR (802207)

Grades: 12  Credit: 1.0

Provides students the opportunity to learn about teaching and interacting with others by assisting students in various academic subjects under the supervision of the classroom teacher. Tutors will be assigned to a teacher and subjects based on their area(s) of expertise. It is expected that both tutors and students being tutored will experience academic and social growth. Criteria for selection: a senior with a minimum of “B” cumulative average (3.0 GPA), absence of any offenses against the Student Code of Conduct, good attendance record, at least two teacher recommendations, and a written request explaining what expertise the student has to offer. **A written application for participation in Academic Tutoring must be submitted to the Guidance Office.**

YEARBOOK (802202AB)

Grades: 10, 11, 12  Credit: 1.0

(Teacher permission only) exposes students to the principles of layout design, copywriting, editing, photography (basics), photo preparation, and caption writing. By meeting deadlines, students will learn to work under time pressure. Their main responsibility will be to prepare the school yearbook for publication. This includes duties involving photo scheduling, yearbook sales, and fundraising activities. This course is an elective credit and not an English credit. **See Ms. Cheatham** A107 for more information.

DIGITAL MEDIA (200052AA)

Grades: 10, 11, 12  Credit: 1.0

A course designed to educate students on the ever-changing digital world, as well as to provide hands-on experience with industry standard software and equipment. Topics covered in classes include graphic design, animation, audio production, video production, and web design. See Ms. Cheatham A107 for an application.

FASHION (510041)

Grades: 10, 11, 12  Credit: 1.0  **Pre-requisite: Family and Consumer Science**

$30 class fee, $20 FCCLA dues

A one-credit course designed to introduce students to the selection and care of clothing and accessories for individuals and families throughout the life span. A school-based laboratory is required for this course.

FASHION DESIGN (510044)

Grades: 11, 12  Credit: 1.0  **Pre-requisite: Fashion**

$30 class fee, $20 FCCLA dues

A one-credit course designed for students interested in pursuing a career in fashion design. It provides students with knowledge and skills for application of artistic expression related to textiles, apparel, and fashion design. A fashion design studio is the required school-based laboratory for this course.

FASHION MERCHANDISING (410015)

Grades: 11, 12  Credit: 1.0  **Pre-requisite: Fashion Design**

$30 class fee, $20 FCCLA dues

A one-credit course designed for students interested in pursuing a career in the fashion and retail industry. Students will explore fashion business operations, merchandising techniques, and technology used in the industry.

**802206ac-Library Assistant** provides the opportunity to develop skills for solving problems, demonstrating initiative, and interacting with students, faculty, and the public under the supervision of the Library Media Specialist. Duties include: operating the school supply Store, maintaining the library collection and library, checking out books, helping students and staff use resources, including the electronic catalog, and maintaining the library media center. Criteria for selection: be in good academic standing and continue to make good grades, be an example of one who follows school policy in all matters, a willingness to uphold all of these responsibilities each class meeting, absences of any offenses against the Student Code of Conduct, good attendance record, recommendations from current teachers, and a written request explaining what expertise the student has to offer. See Ms. Sabrina Smith in the library for an application.

HISTORY OF AMERICAN FILM  (230032al)

NOTE: A HISTORY ELECTIVE THAT DOES NOT FULFILL ANY OF THE SOCIAL STUDIES CREDITS REQUIRED FOR GRADUATION. The History of American Film is a chronological survey course on movies and their cultural significance to the nation. Students will study the development of the film industry and consider the place of Hollywood in American popular culture. Films will be studied both in and out of class and students will learn to make critical judgments on how films both reflect and shape the lives of Americans. Students will also learn to see how movies influence pop culture and vice versa. Class discussion on films will ultimately lead to higher thinking skills as students decide if Hollywood is producing great works of art or merely entertainment. 
**AP PSYCHOLOGY (230072)**

The AP Psychology course is designed to introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. They also learn about the ethics and methods psychologists use in their science and practice. *See AP Descriptor*

Fee: AP test  
Credit: 1.0

Grades: 11, 12  
Prerequisite: Student must read on or above grade level

**DECATUR HIGH SCHOOL COURSE OFFERINGS**

**ACADEMIC TUTOR:**

Ben Davis (802207ab)  
Eastwood (802207aa)  
Oak Park (802207ac)  
Banks-Caddell (802207ad)  
Walter Jackson (802207ae)  
Somerville Road (802207af)  
Leon Sheffield (802206ag)

Supervised tutoring services offered by students. Students will work in academic areas with individual students and small groups of students. A student applying for this course must have his/her own means of transportation.  
Grade: 11, 12  
Credit: 1.0

Prerequisite: Approval of Decatur High School guidance counselor and administration. Must have good history of attendance along with a good discipline record.

**COMPUTER SCIENCE - PYTHON (520054)**

Grades: 11, 12  
Credit: 1.0  
Pre-requisite: AP Computer Science Principles

This elective course uses text-based programming, exclusively in Python, in multiple environments, to help students understand the connection between hardware and software. In this course, students will apply acquired knowledge to design solutions to various challenges. Emphasis is on learning the python language, with the support of web-based software tools to learn text-based programming through the iterative process of catching errors and debugging programs.

**ACT PREP CLASS WITH WRITING FOCUS (802200ab)**

Grades: 10, 11, 12  
Credit: 0.5

Prerequisite: None

**AFRICAN AMERICAN HISTORY (802208ag)**

*NOTE: DOES NOT FULFILL ANY OF THE SOCIAL STUDIES CREDITS REQUIRED FOR GRADUATION.*

Grades: 11, 12  
Credit: 1.0

Prerequisite: None

**AMERICAN BIOGRAPHY (230032)**

*NOTE: DOES NOT FULFILL ANY OF THE SOCIAL STUDIES CREDITS REQUIRED FOR GRADUATION.*

Grades: 10, 11, 12  
Credit: 0.5

Prerequisite: None

**AP HUMAN GEOGRAPHY (230062)**

*NOTE: DOES NOT FULFILL ANY OF THE SOCIAL STUDIES CREDITS REQUIRED FOR GRADUATION.* AP Human Geography introduces students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth’s surface. Students learn to employ spatial concepts and landscape analysis to examine human socioeconomic organization and its environmental consequences. They also learn about the methods and tools geographers use in their research and applications. *See AP Descriptor*
**AP PSYCHOLOGY (230072)**
The AP Psychology course is designed to introduce students to the systematic and scientific study of the behavior and mental processes of human beings and other animals. Students are exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. They also learn about the ethics and methods psychologists use in their science and practice. *See AP Descriptor*

**STUDY SEMINAR (802104)**

**CONTEMPORARY LITERATURE (200024)**

**CONTEMPORARY WORLD AFFAIRS III (230032aa)**

(Fall and Spring Semester) NOTE: DOES NOT FULFILL ANY OF THE FOUR SOCIAL STUDIES CREDITS REQUIRED FOR GRADUATION. An elective course for juniors. This course emphasizes class discussion, class research, and limited homework. Students will discuss current world issues and how these issues affect the student. This course may be taken either semester or both semesters.

**CREATIVE WRITING (200033)**

**DRIVER AND TRAFFIC SAFETY EDUCATION (290001)**

**HISTORY OF AMERICAN FILM (230032af)**

**JOURNALISM 1 (200051)**

This course would be on a permission basis and students who are considering a career in the publication/writing industry considered first. The first year (or semester) students would learn the structure and ethics of journalism, practice writing and research skills, and maintain the DHS Raider Press website.
JOURNALISM 2 (200052)
Grade: 10, 11, 12  Credit: 1.0
Prerequisite: Journalism 1

MYTHOLOGY (200026)
NOTE: DOES NOT FULFILL ANY OF THE FOUR ENGLISH CREDITS REQUIRED FOR GRADUATION. In this English elective course, students read, discuss, analyze, and write about myths and fables from ancient Greece and Rome, and other ancient cultures. Students explore the influence of mythology on modern language, culture, and daily life and compare ancient and modern epic heroes. This course may be taken as elective credit for one semester.
Grade: 9, 10, 11, 12  Credit: 0.5
Prerequisite: None

MUSICAL PERFORMANCE AND SONGWRITING (284752)
This course is designed to develop emerging songwriters and musicians who wish to learn to grow in their talents and musical abilities. In addition to songwriting development, students will also learn vocal expression, style enhancement, visual performance, as well as song recording, publishing, copyright and protection. Work produced during this course will also have an opportunity to be shared in a live performance. Please note that this course is solely intended for students who have had some songwriting/creative writing/poetry experience and musical and vocal ability. It is possible for others to perform and develop works by those who have writing abilities but lack music and vocal abilities. This course is not intended for those who have no previous songwriting, musical, and vocal experience.
Grade: 10, 11, 12  Credit: 1.0
Prerequisite: Approval of Gary Evans

PLAY WRITING (280080)
This course is designed to provide students with the skills to write scripts for the performing arts. Emphasis will be given to the process of research, analysis, interpretation, and language study which are essential to any successful script development. Recent productions of comedies, tragedies, and historical plays will be compared, analyzed, and evaluated from a playwriting perspective.
Grade: 9, 10, 11, 12  Credit: 0.5
Prerequisite: None

POETRY (200036)
Grade: 9, 10, 11, 12  Credit: 0.5
Prerequisite: None

PUBLIC SPEAKING (200042)
NOTE: DOES NOT FULFILL ANY OF THE FOUR ENGLISH CREDITS REQUIRED FOR GRADUATION. Extemporaneous, demonstrative, persuasive, informative oral communication; videotape; speech writing and delivery. An interactive course that will provide students with the opportunity to gain skill, confidence, and fluency in oral communication by exploring persuasive and informative speech preparation, delivery, and evaluation. Students will learn to apply basic communication principles and public speaking strategies in interpersonal situations, group interactions, and professional settings. Students will also learn how to use visual aids, nonverbal cues, analyze communication events such as the media, and apply interviewing skills effectively.
Grade: 9, 10, 11, 12  Credit: 0.5
Prerequisite: Approval of English Teacher

RENAISSANCE TEAM (802105)
Students must complete an application packet and be selected to remain in this course. The DHS Renaissance Team will work on improving school climate and culture for both students and educators. Service hours outside of the regular school day will be required by this team.
Grade: 9, 10, 11, 12  Credit: 1.0
Prerequisite: Application required. See Coach Boy and Mrs. Jones

STUDENT AIDES:
Main Office (802206al)
South Office (802206am)
Guidance Office (802206ak)
Library Media Center (802206an)
Developmental Program (802206ah)
Genius Bar (802206) - Student HelpDesk assigned to assist DCS Technology Department with individual school technology needs.
Grade: 10, 11, 12  Credit: 1.0
Prerequisite: Approval of Decatur High School administrator. Student must have a good history of attendance along with a good discipline record.
STUDY OF THE SHORT STORY (200030)  
NOTE: DOES NOT FULFILL ANY OF THE FOUR ENGLISH CREDITS REQUIRED FOR GRADUATION  
Grades:  9, 10, 11, 12  Credit:  0.5  
Prerequisite:  None

SURVEY OF BRITISH LITERATURE (200036)  
NOTE: DOES NOT FULFILL ANY OF THE FOUR ENGLISH CREDITS REQUIRED FOR GRADUATION  
Grades:  9, 10, 11, 12  Credit:  0.5  
Prerequisite:  None

YEARBOOK (SCHOOL PUBLICATIONS) (802202)  
Grades:  9, 10, 11, 12  Credit: 1.0  
Prerequisite 9: Approval from middle school yearbook sponsor  
Prerequisite 10-12: Approval from Mrs. Hurst
Career Academies provide students opportunities to engage in rigorous career relevant coursework utilizing state of the art technology while preparing for high-wage, high-skill, and high-demand careers. Students have the opportunity to earn industry certifications as well as dual enrollment and articulated college credits. These programs prepare students to be both college and career ready by integrating core academic skills with employability skills and current industry specific technology. Students registering for courses at the Career Academies of Decatur must follow the link to complete the online application: https://goo.gl/forms/hHRv5SP7dKQ5QXfm1

NOTE: Elective course offerings are subject to minimum enrollment quotas. If minimum enrollment requirements are not met, the elective course may be cancelled.

### Automotive Technology Academy

This career academy provides students with the opportunity to participate in programs that prepare students for careers in the Automotive Technology pathway. This academy aims to prepare students for the workforce, offering them a curriculum that provides hands-on experience and certification opportunities in the Automotive Technologies industry.

#### BUSINESS TECHNOLOGY APPLICATIONS (450006) – At AHS or DHS

**Grade:** 9  
**Credit:** 1.0  
**Prerequisite(s):** None  

**Certification Opportunity:** MOS  
A one-credit foundation course designed to assist students in developing technological proficiencies in word processing, spreadsheets, databases, presentations, communications, Internet use, ethics, and careers using technology applications. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

#### MAINTENANCE AND LIGHT REPAIR A (570071) First Semester

**Grade:** 11  
**Credit:** 1.0  
**Prerequisite(s):** None

**Fee(s):** $30, SkillsUSA $20
A one-credit course that provides students with foundational knowledge and skills relative to safety, engine repair, automatic transmissions and manual drive trains.

#### MAINTENANCE AND LIGHT REPAIR B (570072) Second Semester

**Grade:** 11  
**Credit:** 1.0  
**Prerequisite(s):** MAINTENANCE AND LIGHT REPAIR A (570071)

**Fee(s):** $30
A one-credit course that provides students with foundational knowledge and skills relative to safety, suspension and steering, and brakes.

#### MAINTENANCE AND LIGHT REPAIR C (570073) First Semester

**Grade:** 12  
**Credit:** 1.0  
**Prerequisite(s):** MAINTENANCE AND LIGHT REPAIR B (570072)

**Fee(s):** $30, SkillsUSA $20
A one-credit course that provides students with foundational knowledge and skills relative to safety, brakes, and electrical/electronic systems.

#### MAINTENANCE AND LIGHT REPAIR D (570074) Second Semester

**Grade:** 12  
**Credit:** 1.0  
**Prerequisite(s):** MAINTENANCE AND LIGHT REPAIR C (570073)

**Fee(s):** $30
A one-credit course that provides students with foundational knowledge and skills relative to safety, engine performance, electrical/electronic systems, and heating and air conditioning.

Students enrolled in the Automotive Technology Academy have the opportunity to earn certification in the following areas:

- ASE Student Maintenance and Light Repair
- ASE Automobile Service Technology
- ASE Student Suspension and Steering
- ASE Student Brakes
- ASE Student Electrical/Electronic Systems
- ASE Student Engine Performance
- ASE Student Engine Repair
- ASE Student Automatic Transmission/Transaxle
- ASE Student Manual Drive Train and Axles
- ASE Student Heating and Air Conditioning
Barbering Academy

This career academy provides students with the opportunity to participate in programs that prepare students for careers in the Barbering and/or Cosmetology pathway. This academy aims to prepare students for the workforce, offering them a curriculum that provides hands-on experience and certification opportunities in Cosmetology.

*Students must apply and be accepted into an Academy.

BUSINESS TECHNOLOGY APPLICATIONS (450006) – At AHS or DHS
Grade: 9  Credit: 1.0  Prerequisite(s): None
A one-credit foundation course designed to assist students in developing technological proficiencies in word processing, spreadsheets, databases, presentations, communications, Internet use, ethics, and careers using technology applications. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

INTRODUCTION TO BARBERING (510160) First Semester
Grade: 11  Credit: 1.0  Prerequisite(s): None
Fee(s): $30, SkillsUSA $20
Introduction to Barbering is a one-credit course that provides students with a study of concepts related to the Barbering profession. Specific topics include Barbering history and career opportunities, professional image, infection control, and basic fundamentals and principles of hair care and design. Students also gain initial practical experience in sanitation, shampooing, hair shaping, and hairstyling. Upon successful completion of this course, students are able to practice safety and sanitary precautions as they perform basic Barbering procedures.

CTE LAB IN BARBERING I (510074) Second Semester
Grade: 11  Credit: 1.0  Prerequisite(s): INTRODUCTION TO BARBERING (510160)
Fee(s): $30
This one-credit course is an extended laboratory experience to address the advancement and specialization of careers within Human Services through individualized or small group instruction. This course allows students to enhance the essential and intermediate skills learned through barbering courses within the career cluster and prepare for industry credentialing opportunities.

CTE LAB IN BARBERING II (510077) First Semester
Grade: 12  Credit: 1.0  Prerequisite(s): NATURAL HAIR STYLING PRACTICUM (510076)
Fee(s): $30, SkillsUSA $20
This one-credit course is an extended laboratory experience to address the advancement and specialization of careers within Cosmetology through individualized or small group instruction. This course allows students to enhance the essential and intermediate skills learned through program courses within the career cluster and prepare for industry credentialing opportunities.

SENIOR CAREER PATHWAY PROJECT - BARBERING (510069) Second Semester
Grade: 12  Credit: 1.0  Prerequisite(s): CTE LAB IN BARBERING II (510077)
Fee(s): $30
A one-credit course designed for students who have completed a minimum of two career and technical education courses to select an area of interest; engage in in-depth exploration of the area; employ problem-solving, decision-making, and independent learning skills; and present a culminating pathway project before a selected audience.

Students enrolled in the Barbering Academy have the opportunity to earn certification in the following areas:

• Barbering Licensure
Building Science Academy

This career academy is designed for the student interested in pursuing a career in the construction field. The program offers students a wide introduction to all areas of the construction trades. Students will learn safety procedures, blueprint comprehension, tool usage, and carpentry knowledge.

*Students must apply and be accepted into an Academy.

**BUSINESS TECHNOLOGY APPLICATIONS (450006) – At AHS or DHS**

**Grade:** 9  **Credit:** 1.0  **Prerequisite(s):** None

A one-credit foundation course designed to assist students in developing technological proficiencies in word processing, spreadsheets, databases, presentations, communications, Internet use, ethics, and careers using technology applications. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

**NCCER CARPENTRY 1 (432301) First Semester**

**Grade:** 11  **Credit:** 1.0  **Prerequisite(s):** None

Fee(s): $30, SkillsUSA $20

This is the first of 3 required one-credit courses in the Carpentry pathway. It is designed to complete all core requirements for NCCER Core credentialing and to provide students with fundamental knowledge and skills emphasizing use of hand and power tools, building materials, fasteners, adhesives, and flooring systems needed for NCCER Carpentry Level I Credentialing.

**NCCER CARPENTRY 2 (432302) Second Semester**

**Grade:** 11  **Credit:** 1.0  **Prerequisite(s):** NCCER CARPENTRY 1 (432301)

Fee(s): $30

A one-credit course designed to provide students with advanced knowledge and skills emphasizing floor wall, ceiling, and basic construction layout needed for NCCER Carpentry Level I Credentialing.

**NCCER CARPENTRY 3 (432303) First Semester**

**Grade:** 12  **Credit:** 1.0  **Prerequisite(s):** NCCER CARPENTRY 2 (432302)

Fee(s): $30, SkillsUSA $20

A one-credit course designed to provide students with advanced knowledge, skills and practice emphasizing wall, ceiling, and roof framing, windows, entrance doors, and stair layout needed for NCCER Carpentry Level I Credentialing.

**NCCER BUILDING CONSTRUCTION 1: CONSTRUCTION FRAMING (412101) Second Semester**

**Grade:** 12  **Credit:** 1.0  **Prerequisite(s):** NCCER CARPENTRY 3 (432303)

Fee(s): $30

A one-credit course designed to complete all Core requirements for NCCER Core credentialing and to facilitate students’ understanding of the framing components of typical structures. Emphasis is placed on safety, floor systems, wall and ceiling framing, stair construction, and roof framing.

Students enrolled in the Building Science Academy have the opportunity to earn certification in the following areas:

- NCCER Construction Technology
- NCCER Core (all modules)
- NCCER Carpentry Level 1
- NCCER Carpentry Level 1+
# Business Academy (@ Decatur and Austin)

This career academy provides students with the opportunity to improve skills with self-paced, interactive, and engaging online training. It will provide students with the 21st century technology skills necessary to acquire certification and be competitive in today’s rapidly evolving workplace.

*Students must apply and be accepted into an Academy.*

COURSE PROGRESSION: Finance Pathway

BUSINESS TECHNOLOGY APPLICATIONS (450006)
Grade: 9 Credit: 1.0 Prerequisite(s): None
Fee(s): $20 FBLA dues
A one-credit foundation course designed to assist students in developing technological proficiencies in word processing, spreadsheets, databases, presentations, communications, Internet use, ethics, and careers using technology applications.

ACCOUNTING (470012)
Credit: 1.0 Fee(s): $20 FBLA dues
A one-credit course designed to help students understand the basic principles of the accounting cycle. Emphasis is placed on basic accounting, analyzing and recording business transactions, preparing and interpreting financial statements, and performing banking and payroll activities. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

PERSONAL FINANCE (400021)
Credit: 1.0 Fee(s): $20 FBLA dues
A one credit course designed to introduce students to the management of personal and family resources to achieve personal goals and financial literacy.

ADVANCED ACCOUNTING (470013)
Credit: 1.0 Fee(s): $20 FBLA dues
A one-credit course designed to provide students with an increased emphasis on accounting principles and techniques for solving business problems and making financial decisions. The prerequisite for this course is Accounting. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

BANKING AND FINANCIAL SERVICES (470011)
Credit: 1.0 Fee(s): $20 FBLA dues
A one-credit course designed to help students develop skills related to banking and related services as they process customer transactions, maintain cash drawer, process documents, and respond to customer requests to provide other customer services. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

COURSE PROGRESSION: Sports and Entertainment Marketing Pathway

MARKETING PRINCIPLES (550011)
Credit: 1.0 Fee(s): $20 DECA dues
A one-credit course designed to provide students with an overview of in-depth marketing concepts. Students develop a foundational knowledge of marketing and its functions, including marketing information management, pricing, product and service management, entrepreneurship, and promotion and selling.

INTERNET MARKETING (550012)
Credit: 1.0 Fee(s): $20 DECA dues
Internet Marketing is a one-credit course which focuses on applying tools, strategies and processes to communicate digitally with targeted customers. Emphasis is placed on creating, implementing, and critiquing online advertising, email marketing, websites, social media, mobile marketing, search-engine optimization, video/images and podcasts/webcasts. Students will apply project management techniques to guide and control digital communications efforts. They will also create and repurpose content for use in digital environments. Technology, employability skills, leadership and communications will be incorporated in classroom activities. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.
SPORTS AND ENTERTAINMENT MARKETING (550013)
Credit: 1.0    Fee(s): $20 DECA dues
Sports and Entertainment Marketing is a one credit specialized course designed to offer students an opportunity to gain knowledge and develop skills related to the growing sports and entertainment industry. Students will develop skills in the areas of merchandising, advertising, public relations/ publicity, event marketing, sponsoring, ticket distribution, and career opportunities as they relate to the sports and entertainment industry. Students will foster a realistic understanding of the business environment in which marketing activities are performed and develop an understanding and appreciation of business ethics. Technology, employability skills, leadership and communications will be incorporated in classroom activities. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

ADVANCED SPORTS AND ENTERTAINMENT MARKETING (550023)
Credit: 1.0    Fee(s): $20 DECA dues
Advanced Sports and Entertainment Marketing is a one-credit specialized course designed to help students gain knowledge and develop skills in determining the economic impact of sports and entertainment events, price setting, research, marketing, positioning, product/service management, and promotion and sales strategies. Throughout the course, students are presented problem-solving situations for which they must apply academic and critical-thinking skills. Sports and Entertainment Marketing is a required prerequisite for this course. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

Students enrolled in the Business Academy have the opportunity to earn certification in the following areas:
- Microsoft Office – Excel 2016 Expert
- Microsoft Office – Word 2016 Expert
- Microsoft Office Specialist 2016 (MOS) (Two of the following areas REQUIRED)
  - Access
  - Excel
  - Outlook
  - PowerPoint
  - SharePoint
  - Word
This career academy provides students with the opportunity to participate in programs that prepare students for careers in the Cosmetology pathway. This academy aims to prepare students for the workforce, offering them a curriculum that provides hands-on experience and certification opportunities in Cosmetology.

*Students must apply and be accepted into an Academy.

**BUSINESS TECHNOLOGY APPLICATIONS (450006) - At AHS or DHS**
Grade: 9    Credit: 1.0    Prerequisite(s): None
A one-credit foundation course designed to assist students in developing technological proficiencies in word processing, spreadsheets, databases, presentations, communications, Internet use, ethics, and careers using technology applications. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

**INTRODUCTION TO COSMETOLOGY (510060) - First Semester**
Grade: 11    Credit: 1.0    Prerequisite(s): None
Fee(s): $30, SkillsUSA $20
A one-credit course designed to provide students with a study of concepts related to the cosmetology profession. Students gain initial practical experience in sanitation, shampooing, hair shaping, and hairstyling.

**NATURAL HAIR STYLING PRACTICUM (510076) - Second Semester**
Grade: 11    Credit: 1.0    Prerequisite(s): INTRODUCTION TO COSMETOLOGY (510060)
Fee(s): $30
Natural Hair Styling Practicum is a one credit course designed to provide instruction on natural hair care services and techniques for styling and grooming natural hair. Core domain service areas include work area and client preparation, set-up of supplies, safe work practices, procedures related to services and design, and blood exposure procedure.

**HAIR COLORING (510061) - First Semester**
Grade: 12    Credit: 1.0    Prerequisite(s): NATURAL HAIR STYLING PRACTICUM (510076)
Fee(s): $30, SkillsUSA $20
A one-credit course designed to provide students with the study and experience in hair coloring and lightening. Emphasis is placed on color application, laws, and levels and classifications of color. The prerequisite for this course is Introduction to Cosmetology.

**INTRODUCTION TO SPA TECHNIQUES (510063) - Second Semester**
Grade: 12    Credit: 1.0    Prerequisite(s): Introduction to Cosmetology
Fee(s): $30
A one-credit course that focuses on the structure and function of various systems of the body. This course also provides hands-on experiences in facial massage techniques, skin care, and hair removal.

Students enrolled in the Cosmetology Academy have the opportunity to earn certification in the following areas:

- Cosmetology Licensure
- Natural Hair Styling Licensure
- Nail Care Licensure
- Esthetics Licensure
Culinary Arts Academy

This career academy is a major in the Career Connections Program. Students are prepared for a variety of careers in culinary arts and the hospitality industry. The required school-based laboratory for the Culinary Arts pathway is a food service kitchen with a food serving and dining area. Formal presentations and portfolios are developed to showcase students’ work. Connecting Experiences are a requirement of the major. Family, Career and Community Leaders of America (FCCLA), an integral part of the curriculum, enhances leadership development skills and provides opportunities for community service.

*Students must apply and be accepted into an Academy.

FAMILY AND CONSUMER SCIENCES (510004)
Grade: 9 Credit: 1.0 Prerequisite(s): None
Fee(s): $30 class fee, $20 FCCLA dues
A one-credit course that provides students with core knowledge and skills in the areas of marriage and family, parenting and care giving, consumer sciences, apparel, housing, food and nutrition, and technology. A school-based laboratory is required for this course.

HOSPITALITY AND TOURISM (500011) - First Semester
Grade: 10 Credit: 1.0 Prerequisite(s): Pass FOOD AND NUTRITION (510011) with a C or higher and FACS teacher recommendation
Fee(s): $30 class fee, $20 FCCLA dues
A one-credit course that serves as the prerequisite for all pathways included in the Hospitality and Tourism cluster. Major topics include introduction to hospitality and tourism, recreation, travel and tourism, lodging, restaurant and food and beverage services, safety and sanitation, customer relations, and quality services. The required school-based laboratory for the Hospitality and Tourism cluster is a commercial food service kitchen with a food-serving and dining area. School-based laboratory experiences are essential for students to develop skills in the hospitality and tourism industry.

CULINARY ARTS I (500012) - Second Semester
Grade: 10 Credit: 1.0 Prerequisite(s): HOSPITALITY AND TOURISM (500011)
Culinary Arts I will introduce students to basic food production, management, and service activities in both the back- and front-of-the-house. Emphasis is placed on sanitation, safety, and basic food preparation. Skills in mathematics, science, and communication are reinforced in this course.

CULINARY ARTS II (500013) - First Semester
Grade: 11 Credit: 1.0 Prerequisite(s): CULINARY ARTS I (500012)
Fee(s): $30 class fee, $20 FCCLA dues
Culinary Arts II provides advanced experiences in food production, management, and service. Topics include food service operations, advanced food production, and professionalism. Skills in mathematics, communication, creative thinking, and entrepreneurship are reinforced in this course.

BAKING AND PASTRY ARTS (500014) - Second Semester
Grade: 11 Credit: 1.0 Prerequisite(s): CULINARY ARTS II (500013)
This course follows Culinary II and is designed to provide students with the principles of baking and pastry techniques. The course includes baking technologies, equipment, preparation procedures, productions methods, pastry methods, science of bread baking, confections, and desserts, showpieces, cost control, food safety, and presentation techniques to create fundamental baking to the latest baking and pastry trends.

EVENT PLANNING (500015) - First Semester
Grade: 12 Credit: 1.0 Prerequisite(s): BAKING AND PASTRY ARTS (500014)
Fee(s): $30 class fee, $20 FCCLA dues
Students will learn to organize and plan all aspects of business and social events including the food, location, and décor associated with hiring an event planner. Concepts taught in the course to meet the needs of clients include planning for the event with activities, establishing a budget, determining the theme, planning the guest list, determining the location, developing an event plan schedule, planning transportation needs, training of staff, staging the event, calculating room and space requirements, providing necessary
technology and equipment, planning food and beverage services, securing entertainment, understanding legal issues in
event planning, and conducting post-evaluations of event.

**CTE LAB IN HOSPITALITY & TOURISM (500041) - Second Semester**

**Grade:** 12  **Credit:** 1.0  **Prerequisite(s):** EVENT PLANNING (500015)

This one-credit course is an extended laboratory experience to address the advancement and specialization of careers within Hospitality & Tourism through individualized or small group instruction. This course allows students to enhance the essential and intermediate skills learned through program courses within the career cluster and prepare for industry credentialing opportunities.

Students enrolled in the Culinary Academy have the opportunity to earn certification in the following areas:

- ServSafe - Manager
Cyber Security Academy

The Cyber Security Academy, introduces students to the broad field of Cyber Security. Students learn multiple numbering systems, become familiar with Microsoft Windows, and LINUX operating systems. They learn networking, vulnerability assessment, and cyber forensics. Students participate in the national CyberPatriot competition. Opportunities also exist for student internships and industry recognized certifications. Cyber Security is designed to be a college preparatory high school program and thus, should provide a rigorous, but accessible, introduction to cyber security.

*Students must apply and be accepted into an Academy.

2nd year upper level classes will be held at time TBD after the regular school day.

FOUNDATIONS OF INFORMATIONAL SECURITY (INFOSEC I) (520038)
Grade: 9  Credit: 1.0
Fee(s): SkillsUSA $20
This course introduces students to the field of Cyber Security. Students will become familiar with Microsoft Windows and Linux Operating Systems. They will learn to use multiple numbering systems and how these systems are used in network addressing and operating system configuration. Students will also gain experience in the areas of vulnerability identification, risk assessment, risk mitigation techniques, Wi-Fi security, IP Addressing, and Informational Ethics. This course is weighted 10 points on a 100-point scale.

PRINCIPLES OF INFORMATION SECURITY (INFOSEC II) (520039)
Grade: 10  Credit: 1.0  Prerequisite(s): Foundations of Informational Security (INFOSEC I)
Fee(s): SkillsUSA $20
This course introduces students to computer network systems that are most commonly the focus of attack. Students will build and configure the common elements found on the Internet to include database servers, web servers, and web application servers. Students will be introduced to remote access terminal shells which will be vital toward penetration testing and attack vectors. This course is weighted 10 points on a 100-point scale.

CYBER FORENSICS (INFOSEC III) (520040)
Grade: 11  Credit: 1.0  Prerequisite(s): Principles of Information Security (INFOSEC II)
Fee(s): $30, SkillsUSA $20
This class covers the methodologies behind cyber-attacks and the various types of attack techniques. Students will participate in hands on lab exercises using the latest attack tools and learn to evaluate the potential vulnerabilities of network targets. Students will be required to participate on a competitive cyber team. This course is weighted 10 points on a 100-point scale.

ADVANCED CYBER SECURITY/FORENSICS (INFOSEC IV) (540042)
Grade: 12  Credit: 1.0  Prerequisite(s): Cyber Security and teacher recommendation
Fee(s): $30, SkillsUSA $20
This second-year course provides the student with experiences in how to look for the weaknesses and vulnerabilities in target systems and uses the same knowledge and tools as a hacker. This course may lead to the Certified Ethical Hacker certification from the IC-Council. This course is weighted 10 points on a 100-point scale.

Students enrolled in the Cyber Security Academy have the opportunity to earn certification in the following areas:

- CompTIA A+
- CompTIA Network+
- CompTIA Security+
- CompTIA IT Fundamentals
- CompTIA Linux+ Powered by LPI
- Certified Ethical Hacker
**Educator Training Academy**

This program provides students with knowledge and skills needed for teaching and professional training consultant careers. Courses provide an overview of teaching and learning theories; curriculum development; teaching techniques; instructional resources and the use of technology; types of assessments; classroom management strategies; and ethics and professionalism. This new academy will be located on the campus of the Career Academies of Decatur.

*Students must apply and be accepted into an Academy.*

**BUSINESS TECHNOLOGY APPLICATIONS** (450006) At AHS or DHS

</table>

A one-credit course designed for students interested in pursuing an internship experience in an educational field. Students who have completed Teaching II are eligible to enroll in the Education and Training Internship. A school-based laboratory (actual classroom providing grade level subject-matter instruction) is required for the internship. Student must be able to provide their own transportation.

Students enrolled in the Educator Training Academy have the opportunity to earn certification in the following areas:

- Athens State University Education and Training Certification
- Praxis II: Principles of Learning and Teaching: Grades K-6
- Praxis II: Principles of Learning and Teaching: Grades 5-9
- Praxis II: Principles of Learning and Teaching: Grades 7-12
- ETS Praxis Core Academic Skills (Must pass Reading, Writing, and Mathematics)
- ASK Institute – Concepts of Entrepreneurship and Management
Engineering Design and Advanced Manufacturing Academy

This program is designed for students interested in engineering and related advanced manufacturing fields. Students will gain valuable knowledge and develop marketable skills that will greatly benefit them in a future engineering or manufacturing profession. Students are taught how to design, build, and test the designs in real-world situations. These courses require higher-level thinking skills to solve open-ended design and manufacturing problems. Emphasis is placed on mechanical and 3D design.

*Students must apply and be accepted into an Academy.

BUSINESS TECHNOLOGY APPLICATIONS (450006)
Grade: 9  Credit: 1.0  Prerequisite(s): None
A one-credit foundation course designed to assist students in developing technological proficiencies in word processing, spreadsheets, databases, presentations, communications, Internet use, ethics, and careers using technology applications. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

INTRODUCTION TO DRAFTING DESIGN (410005)
Grade: 10  Credit: 1.0  Prerequisite(s): None
Fee(s): $30, SkillsUSA $20
A one-credit course designed to provide students with instruction and experiences in computer-aided drafting (CAD) functions and techniques using CAD software applications.

FOUNDATIONS OF ENGINEERING DESIGN (590306)
Grade: 10  Credit: 1.0  Prerequisite(s): INTRODUCTION TO DRAFTING DESIGN (410005)
Fee(s): $30, SkillsUSA $20
This course for high school students builds on the skills introduced through the Greenpower F24 Middle Grades Program. Students use software to design, build, and race an electric car. Students work to create an F24 race car utilizing advanced manufacturing technologies and compete at GreenpowerUSA events.

INTERMEDIATE ENGINEERING DESIGN (590307)
Grade: 11  Credit: 1.0  Prerequisite(s): FOUNDATIONS OF ENGINEERING DESIGN (590306)
Fee(s): $30, SkillsUSA $20
This course builds on the skills introduced through the Foundations of Engineering Design. Students also work to create a more advanced F24 race car utilizing additive manufacturing technologies and compete at GreenpowerUSA events.

ENGINEERING DESIGN AND ADVANCED MANUFACTURING (560116)
Grade: 11  Credit: 1.0  Prerequisite(s): INTERMEDIATE ENGINEERING DESIGN (590307)
Fee(s): $30, SkillsUSA $20
Students will engage in the hands-on engineering design and manufacturing processes associated with Additive Manufacturing: fused deposition, laser sintering and composite layup. Students will continue advanced CAD drafting by designing and then creating parts both for understanding and to meet a customer or design challenge chosen and apply for CAD certification. The customer interface, which can be with an industry partner, will provide the student with skills in designing to meet requirements – essential in the career field. Students work to create a more advanced F24 race car utilizing advanced manufacturing technologies and compete at GreenpowerUSA events.

ADVANCED ENGINEERING DESIGN AND MANUFACTURING (560117)
Grade: 12  Credit: 1.0  Prerequisite(s): ENGINEERING DESIGN AND ADVANCED MANUFACTURING (560116)
Fee(s): $30, SkillsUSA $20
Students will engage in a personally tailored engineering design and manufacturing project associated with Additive Manufacturing as a capstone event. Students will be exposed to state-of-the-art engineering design concepts such as 3D scanning and advanced CAD software tools. Students will add to their knowledge base with information detailing the manufacturing process and go in depth into composites by creating molds, working with resins and polymers, and investigating effects of temperature and pressure. Students work to create a customized F24 race car utilizing advanced manufacturing technologies and compete at GreenpowerUSA events.
CTE LAB – ENGINEERING DESIGN AND ADVANCED MANUFACTURING (432910)
Grade: 12     Credit: 1.0     Prerequisite(s): ADVANCED ENGINEERING DESIGN AND MANUFACTURING (560117)
Fee(s): $30, SkillsUSA $20

This one-credit course is an extended laboratory experience to address the advancement and specialization of careers within Engineering Design and Advanced Manufacturing through individualized or small group instruction. This course allows students to enhance the essential and intermediate skills learned through program courses within the career cluster and prepare for industry credentialing opportunities.

Students enrolled in the Engineering Design & Advanced Manufacturing Academy have the opportunity to earn certification in the following areas:

- SolidEdge Certified Associate
Fashion (@ Austin Only)

This program is for students who are interested in pursuing careers in the fashion and retail industry. Courses provide students with knowledge of fashion, fashion design, apparel and textile design technology, and fashion business operations, media, and merchandising.

*Students must apply and be accepted into an Academy.

FAMILY AND CONSUMER SCIENCES (510004)
Grade: 9  Credit: 1.0
Prerequisite(s): None
$30 class fee, $20 FCCLA dues
A one-credit course that provides students with core knowledge and skills in the areas of marriage and family, parenting and care giving, consumer sciences, apparel, housing, food and nutrition, and technology. A school-based laboratory is required for this course.

FASHION (510041)
Grade: 10  Credit: 1.0
Prerequisite(s): Family and Consumer Sciences
$30 class fee, $20 FCCLA dues
A one-credit course designed to introduce students to the selection and care of clothing and accessories for individuals and families throughout the life span. A school-based laboratory is required for this course.

FASHION DESIGN (510044)
Grade: 11  Credit: 1.0
Prerequisite(s): Fashion
$30 class fee, $20 FCCLA dues
A one-credit course designed for students interested in pursuing a career in fashion design. It provides students with knowledge and skills for application of artistic expression related to textiles, apparel, and fashion design. A fashion design studio is the required school-based laboratory for this course.

Students enrolled in the Fashion Academy have the opportunity to earn certification in the following areas:

- ASK Institute – Concepts of Entrepreneurship and Management
- ServSafe- Manager
Fire & Emergency Services Academy

This career academy provides specialized classroom and laboratory experiences for students who are entering the field of Fire and Emergency Services.

*Students must apply and be accepted into an Academy. There will be limited seats available in the Fire & Emergency Services Academy.

BUSINESS TECHNOLOGY APPLICATIONS (450006)
Grade: 9  Credit: 1.0  Prerequisite(s): None
A one-credit foundation course designed to assist students in developing technological proficiencies in word processing, spreadsheets, databases, presentations, communications, Internet use, ethics, and careers using technology applications. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

INTRODUCTION TO FIRE SCIENCE (530011) – First Semester
Grade: 11  Credit: 1.0  Prerequisite(s): None
A one-credit course designed to introduce students to the basic principles and procedures of fire-fighting. Emphasis is placed on safety, fire behavior, communication equipment, fire extinguishers, structural design, personal protective equipment, ropes and knots, search and rescue, ground ladders, ventilation, fundamentals of a water supply system, fire hose, and water streams.

FIRE FIGHTING (530012) – Second Semester
Grade: 11  Credit: 1.0  Prerequisite(s): INTRODUCTION TO FIRE SCIENCE
A one-credit course designed to provide students with instruction in techniques of fire-fighting. Emphasis is placed on safety, fire prevention and control, hazardous materials, sprinkler systems, first responder, and public relations. The prerequisite for this course is Introduction to Fire Science.

SENIOR CAREER PATHWAY PROJECT-FIRE & EMERGENCY SERVICES (530024) – First Semester
Grade: 12  Credit: 1.0  Prerequisite(s): FIRE FIGHTING
A one-credit course designed for students who have completed a minimum of two career and technical education courses to select an area of interest; engage in in-depth exploration of the area; employ problem-solving, decision-making, and independent learning skills; and present a culminating pathway project before a selected audience.

CTE LAB IN FIRE & EMERGENCY SERVICES (530025) – Second Semester
Grade: 12  Credit: 1.0  Prerequisite(s): SENIOR CAREER PATHWAY PROJECT-FIRE & EMERGENCY SERVICES
This one-credit course is an extended laboratory experience to address the advancement and specialization of careers within Fire & Emergency Services through individualized or small group instruction. This course allows students to enhance the essential and intermediate skills learned through program courses within the career cluster and prepare for industry credentialing opportunities.
Food, Wellness, and Dietetics (@ Decatur & Austin Campuses)

This program is for students who are interested in pursuing careers in nutrition, wellness, and health and disease prevention. Courses provide students with knowledge in event planning, photographic styling applications, social media and design techniques, developing and adapting food products for marketing and specific nutrition needs, meal planning, food safety, and the scientific investigation of production, processing, preparation, evaluation, and utilization of food.

*Students must apply and be accepted into an Academy.*

FAMILY AND CONSUMER SCIENCES (510004)
Grade: 9  Credit: 1.0  Prerequisite(s): None
Fee(s): $30 class fee, $20 FCCLA dues
A one-credit course that provides students with core knowledge and skills in the areas of marriage and family, parenting and care giving, consumer sciences, apparel, housing, food and nutrition, and technology. A school-based laboratory is required for this course.

FOOD AND NUTRITION (510011)
Grade: 10  Credit: 1.0  Prerequisite(s): Family and Consumer Sciences
Fee(s): $30 class fee, $20 FCCLA dues
A one-credit course designed to enable students to explore the relationship between food, nutrition, fitness, and wellness. Students learn how to select and prepare nutritious foods. A school-based laboratory is required for this course.

FOOD INNOVATIONS AND MEDIA (510016)
Grade: 11  Credit: 1.0  Prerequisite(s): FOOD AND NUTRITION (510011)
Fee(s): $30 class fee, $20 FCCLA dues
Course content provides opportunities for students to explore global food systems; examine trends in food processing and food innovations; research influences on purchasing behavior of consumers; develop and analyze recipes for new food products through experimental food labs; apply social media and digital design techniques, photographic styling applications, and journalism skills; and explore career options in this specific food industry.

SPORTS NUTRITION (560017)
Grade: 12  Credit: 1.0  Prerequisite(s): FOOD AND NUTRITION (510011)
Fee(s): $30 class fee, $20 FCCLA dues
This course examines the relationship between nutrition, physical performance, and overall wellness. Students will learn how to choose nutritious foods for healthy lifestyles and peak performance. Health and disease prevention through nutrition, physical activity, and wellness practices are essential components of the course. This course emphasizes the metabolic process and management of food choices for optimal health and physical performance. Students are challenged to develop personal fitness and nutrition plans.

Students enrolled in the Fashion Academy have the opportunity to earn certification in the following areas:

- ASK Institute – Concepts of Entrepreneurship and Management
- ServSafe- Manager
Medical Career Academy

The rigorous and relevant Health Science Academy allows students to investigate the roles of health science and medical professionals as they study the concepts of human medicine, physiology, genetics, microbiology, and public health. Students examine the structures and interactions of human body systems and explore the prevention, diagnosis, and treatment of disease, all while working collaboratively to understand and design solutions to the most pressing health challenges of today and the future.

*Students must apply and be accepted into an Academy.

INTRO TO MEDICAL CAREER PATHWAYS (490007) – At AHS or DHS

Grade: 9  
Credit: 1.0  
Prerequisite(s): None

Fee(s): $30 class fee, $20 HOSA dues

Foundations of Health Science can be substituted for the required health credit for graduation.

A one-credit foundational course that introduces students to integrated academics, employability and career development skills, legal and ethical issues, communications, safety, and life skills. This course is a prerequisite to all courses in the Health Science cluster.

MEDICAL TERMINOLOGY (490033) - At AHS or DHS

Grade: 10  
Credit: 1.0  
Prerequisite(s): INTRO TO MEDICAL CAREER PATHWAYS (490007)

Fee(s): $30 class fee, $20 HOSA dues

A one-credit course designed for students to develop health care-specific knowledge for a career in the medical field. The course uses an integrated approach for teaching the language by incorporating medical terminology with anatomy and physiology and the disease process.

THERAPEUTIC SERVICES (490023)

Grade: 11  
Credit: 1.0  
Prerequisite(s): MEDICAL TERMINOLOGY (490033)

Fee(s): $30 class fee, $20 HOSA dues

A one-credit course that introduces students to occupations and functions in the therapeutic services pathways. Careers in this area include nursing, medicine, physical therapy, surgical technology, respiratory therapy, emergency medical technician, and more.

HUMAN BODY STRUCTURES (490015)

Grade: 11  
Credit: 1.0  
Prerequisite(s): THERAPEUTIC SERVICES (490023)

Fee(s): $30 class fee, $20 HOSA dues

A one-credit course designed to help students learn care content that emphasizes the structure and functions of cells, tissues, organs, organization of the human body systems, and medical terminology. Scientific processes, problem-based learning and critical thinking are integral parts of the course.

MEDICAL INTERNSHIP I (490013)

Grade: 12  
Credit: 1.0  
Prerequisite(s): INSTRUCTOR APPROVAL

Fee(s): $30 class fee, $15 malpractice insurance, $20 HOSA dues, school scrub uniform, white shoes, and a watch with a second hand

A two-credit course focusing on basic knowledge and skills necessary for beginning health care workers. Health Science Internship reinforces and applies knowledge learned in classroom and laboratory settings.

OR

MEDICAL INTERNSHIP II (490014)

Grade: 12  
Credit: 2.0  
Prerequisite(s): INSTRUCTOR APPROVAL

Fee(s): $30 class fee, $15 malpractice insurance, $20 HOSA dues, school scrub uniform, white shoes, and a watch with a second hand

A two-credit course focusing on basic knowledge and skills necessary for beginning health care workers. Health Science Internship reinforces and applies knowledge learned in classroom and laboratory settings.

Students enrolled in the Medical Career Academy have the opportunity to earn certification in the following areas:

- Certified Patient Care Technician (CPCT)
- Certified EKG Technician (CET)
- Certified Pharmacy Technician (CPhT)
Precision Machining Academy

This career academy provides specialized classroom and laboratory experiences for students who are entering the field of manufacturing and engineering technology. Instruction is provided in the areas of blueprint reading, safety, bench work, lathe work, millwork, grinding, drill press, and Computer Numerical Control (CNC) programming. Particular emphasis is given to the use of precision measuring tools and gauges. Course content reflects the National Skills Standards of the National Institute for Metalworking Skills. Hands-on work experiences and SkillsUSA leadership activities enhance classroom instruction.

*Students must apply and be accepted into an Academy.

**BUSINESS TECHNOLOGY APPLICATIONS (450006)**

**Grade:** 9  
**Credit:** 1.0  
**Prerequisite(s):** None

A one-credit foundation course designed to assist students in developing technological proficiencies in word processing, spreadsheets, databases, presentations, communications, Internet use, ethics, and careers using technology applications. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

**INTRODUCTION TO MILLING (540048) – First Semester**

**Grade:** 10  
**Credit:** 1.0  
**Prerequisite(s):** None

Fee(s): $30, SkillsUSA $20

A one-credit course that provides an introduction to manufacturing processes including milling techniques, drill press techniques, and grinding techniques. Career and technical student organizations, Skills USA are integral, co-curricular components of each career and technical education course. NIMS (National Institute for Metal Working Skills) credentials can be earned while enrolled in this course.

**INTRODUCTION TO LATHE (540047) – Second Semester**

**Grade:** 10  
**Credit:** 1.0  
**Prerequisite(s):** INTRODUCTION TO MILLING (540048)

Fee(s): $30, SkillsUSA $20

A one-credit course that provides an introduction to the manufacturing process that uses basic lathe operations. Job shadowing and internship may be included as work-based learning strategies for this course. The prerequisite for this course is Introduction to Precision Machining. Career and technical student organizations, Skills USA are integral, co-curricular components of each career and technical education course. NIMS (National Institute for Metal Working Skills) credentials can be earned while enrolled in this course.

**INTERMEDIATE MILL AND SURFACE GRINDER (540050) – First Semester**

**Grade:** 11  
**Credit:** 1.0  
**Prerequisite(s):** INTRODUCTION TO LATHE (540047)

Fee(s): $30, SkillsUSA $20

A one-credit course that provides an introduction to manufacturing processes including instruction in advanced milling and grinding operations. The prerequisite for this course is Introduction to Milling, Drill Press, and Surface Grinder. Career and technical student organizations, Skills USA are integral, co-curricular components of each career and technical education course. NIMS (National Institute for Metal Working Skills) credentials can be earned while enrolled in this course.

**INTERMEDIATE LATHE AND BENCHWORK (540049) – Second Semester**

**Grade:** 11  
**Credit:** 1.0  
**Prerequisite(s):** INTERMEDIATE MILL AND SURFACE GRINDER (540050)

A one-credit course that provides an introduction to machining technologies and job opportunities for students who are pursuing careers in manufacturing. The prerequisite for this course is Introduction to Lathe. Career and technical student organizations, Skills USA are integral, co-curricular components of each career and technical education course. NIMS (National Institute for Metal Working Skills) credentials can be earned while enrolled in this course.

**INTRODUCTION TO COMPUTER NUMERICAL CONTROL (540042) – First Semester**

**Grade:** 12  
**Credit:** 1.0  
**Prerequisite(s):** INTERMEDIATE LATHE AND BENCHWORK (540049)

Fee(s): $30, SkillsUSA $20

A one-credit course that introduces students to manufacturing processes and job opportunities in manufacturing with emphasis on National Skills Standards of the National Tool and Dies Association, Machining Association, and NIMS. The prerequisite for this course is Introduction to Precision Machining. This entry-level course may be taken as one of the optional technical courses with credit applied to
the Industrial Systems and Maintenance program. Career and technical student organizations, Skills USA are integral, co-curricular components of each career and technical education course. NIMS (National Institute for Metal Working Skills) credentials can be earned while enrolled in this course.

INTERMEDIATE COMPUTER NUMERICAL CONTROL (540043) – Second Semester
Grade: 12  Credit: 1.0  Prerequisite(s): INTRODUCTION TO COMPUTER NUMERICAL CONTROL (540042)
A one-credit course that provides practical applications to manufacturing processes including advanced CNC programming, set-up, and proper operations. The prerequisite for this course is Introduction to Computer Numerical Control. Career and technical student organizations, Skills USA are integral, co-curricular components of each career and technical education course. NIMS (National Institute for Metal Working Skills) credentials can be earned while enrolled in this course.

Students enrolled in the Precision Machining Academy have the opportunity to earn certification in the following areas:
- NIMS Level 1 Measurement, Materials & Safety
- NIMS Level 1 Job Planning, Benchwork & Layout
- NIMS Level 1 Manual Milling Skills I
- NIMS Level 1 Turning Operations: Turning Between Centers
- NIMS Level 1 Turning Operations: Turning Chucking Skills
- NIMS Level 1 Grinding Skills I
- NIMS Level 1 Drill Press Skills I
- NIMS Level 1 CNC Turning: Programming Setup & Operations
- NIMS Level 1 CNC Milling: Programming Setup & Operations
- NIMS Level 1 CNC Turning: Operations
- NIMS Level 1 CNC Milling: Operations
Sports Medicine Academy

The rigorous Sports Medicine Academy is designed for students interested in fields such as athletic training, physical therapy, medicine, fitness, exercise physiology, kinesiology, nutrition and other sports medicine related fields.

*Students must apply and be accepted into an Academy.

INTRO TO MEDICAL CAREER PATHWAYS (490007) - At AJHS, AHS or DHS
Grade: 9       Credit: 1.0       Prerequisite(s): None
Fee(s): $30 class fee, $20 HOSA dues

Foundations of Health Science can be substituted for the required health credit for graduation.
A one-credit foundational course that introduces students to integrated academics, employability and career development skills, legal and ethical issues, communications, safety, and life skills. This course is a prerequisite to all courses in the Health Science cluster.

SPORTS MEDICINE I (490025)
Grade: 10       Credit: 1.0       Prerequisite(s): INTRO TO MEDICAL CAREER PATHWAYS (490007)
Fee(s): $30 class fee, $20 HOSA dues
Sports Medicine Intermediate is a one credit course that teaches fundamental skills to include therapeutic exercise regimens within the field of sports medicine. Students will explore the study of sports medicine and the relationship to risk management and injury prevention. Students will demonstrate an understanding of anatomy and physiology, with emphasis on the musculoskeletal system. The importance of health promotion, wellness, injury and disease prevention will be emphasized. Students will examine sports medicine facilities, policies, procedures, and protocols utilized in patient care.

SPORTS MEDICINE II (490026)
Grade: 11       Credit: 1.0       Prerequisite(s): SPORTS MEDICINE I (490025)
Fee(s): $30 class fee, $20 HOSA dues
Sports Medicine Advanced is a one credit course with strong emphasis on musculoskeletal injuries as well as the psychological and sociological responses to injuries and illness. Students will demonstrate critical thinking skills, patient care skills related to prevention, rehabilitation, and management, and communicate appropriate outcomes through oral and written communication. Course content will include an understanding of basic pathophysiology, kinesiology, and principles of treatment. An analysis of a variety of health situations involved in the sports medicine pathway will be conducted through project based learning, laboratory, simulation, and clinical experiences.

SPORTS MED INTERNSHIP (490014)
Grade: 12       Credit: 2.0       Prerequisite(s): SPORTS MEDICINE II (490026)
Fee(s): $30 class fee, $15 malpractice insurance, $20 HOSA dues, school scrub uniform, white shoes, and a watch with a second hand
A two-credit course focusing on basic knowledge and skills necessary for beginning health care workers. Health Science Internship reinforces and applies knowledge learned in classroom and laboratory settings

Students enrolled in the Medical Career Academy have the opportunity to earn certification in the following areas:

- Certified Patient Care Technician (CPCT)
- Certified EKG Technician (CET)
Welding Craft Academy (@ GlobalTech)

This career academy provides students with a fundamental understanding of blueprint reading, weld symbols and weld joints, rules for safety, and identification of shop equipment. Students acquire knowledge for safe operation of oxy-fuel cutting and shielded metal arc welding processes. Upon completion of this course, students are able to interpret lines, views, and dimensions of weld joint configurations and weld symbols; identify oxy-fuel cutting equipment and components; determine proper setup of equipment for application; identify safety hazards and welding equipment related to shielded metal arc welding; and make quality welds with E-6010 and E-7018 electrodes in the flat, horizontal, vertical, and overhead positions.

*Students must apply and be accepted into an Academy.

BUSINESS TECHNOLOGY APPLICATIONS (450006)
Grade: 9  Credit: 1.0
A one-credit foundation course designed to assist students in developing technological proficiencies in word processing, spreadsheets, databases, presentations, communications, Internet use, ethics, and careers using technology applications. The student organization, Future Business Leaders of America (FBLA), is an integral part of the curriculum and FBLA projects will be included in the course.

NCCER WELDING 1 (432901) – First Semester
Grade: 11  Credit: 1.0
Prerequisite(s): BUSINESS COMMUNICATION AND TECHNOLOGY (450006) or another CTE Foundation Course
This is the first of four required one-credit courses in the Welding Technologies Pathway. It is designed to complete all core requirements for NCCER Core credentialing and to provide students with fundamental knowledge and skills emphasizing use of hand tools, power tools, welding theory and practice for use in the manufacturing and construction industry. This entry-level course is required for NCCER Welding Level I credentialing and may be taken as one of the optional technical courses with credit applied to the Industrial Maintenance Technology area. Personal protective clothing is required for this course.

NCCER WELDING 2 (432902) – Second Semester
Grade: 11  Credit: 1.0  Prerequisite(s): NCCER Welding 1
This is the second of four required one-credit courses in the welding Technologies pathway. Topics include: basic shielded metal arc welding, blueprint reading, weld symbols and joint identification and print reading. Emphasis is placed on fundamental knowledge guided practice and NCCER Welding Level I requirements. Personal protective clothing is required for this course.

NCCER WELDING 3 (432903) – First Semester
Grade: 12  Credit: 1.0  Prerequisite(s): NCCER Welding 2
This is the third of four required one-credit courses in the Welding Technologies pathway. It is designed to provide students with theory, practice, and skills development. Emphasis is placed on application and operation of shielded metal arc welding (SMAW) equipment in the vertical, 3-F and overhead, 4-F positions leading to NCCER Welding Level I Credentialing. Personal protective clothing is required for this course.

NCCER WELDING 4 (432904) – Second Semester
Grade: 12  Credit: 1.0  Prerequisite(s): NCCER Welding 3
This is the fourth of four required one-credit courses in the Welding Technologies pathway. It is designed to provide students with additional practice, and skills development. Emphasis is placed on application and operation of shielded metal arc welding (SMAW) equipment and mastery in the vertical, 3-F and overhead, 4-F positions leading to NCCER Welding Level I Credentialing and AWS Plate certification. Personal protective clothing is required for this course.
Work-Based Learning

Work-Based Learning is a structured component of the Career and Technical Education (CTE) curriculum that integrates classroom instruction with productive, progressive, supervised, work-based experiences/apprenticeships (paid) and internships (unpaid) that may be related to student’s career objectives. Content is planned for students through a cooperative arrangement between the school and employer as a component of work-based learning.

Work-Based Experiences/Apprenticeships are paid work experiences and Work-Based Experiences/Internships are unpaid work experiences for eligible 11th and 12th grade students. Student work hours and wages earned are monitored and documented by the student, employer, and the coordinator. Students may earn one or more credits; 140 hours is required for each credit earned.

Students must apply to participate in Work-Based Learning. The requirements for participating are listed below.

Requirements:

- Eligible 11th and 12th grade students.
- Earned College and Career Ready Status.
- Work-Based Learning will not be placed on a student’s schedule until the application process is complete and the student is approved by the Work-Based Learning Coordinator.
- Student is at least 16 years of age.
- It is recommended, but not required, that a student obtain concentrator status, (two courses within a CTE program) prior to enrollment in cooperative education. Students who have not obtained concentrator status must have successfully completed a minimum of one CTE credit or a career preparedness course.
- Student must have a clearly defined career objective.
- Student has an acceptable attendance, grade, and discipline record as validated by the Coordinator (Minimum 2.0 GPA).
- Possesses the knowledge, skills, behavioral qualities, and abilities required for successful employment.
- Have three educator recommendations that may include the teacher of the career cluster course, if applicable.

COOPERATIVE EDUCATION WORK-BASED EXPERIENCE – FIRST CREDIT (400122)

<table>
<thead>
<tr>
<th>Grade: 11-12</th>
<th>Credit: 1.0</th>
</tr>
</thead>
</table>
A one-credit work-based experience requiring a minimum of 140 continuous and successful hours of employment performed under the supervision of a workplace mentor and the work-based learning/cooperative education coordinator.

COOPERATIVE EDUCATION WORK-BASED EXPERIENCE – SECOND CREDIT (400133)

<table>
<thead>
<tr>
<th>Grade: 11-12</th>
<th>Credit: 1.0</th>
</tr>
</thead>
</table>
A one-credit work-based experience requiring a minimum of 140 continuous and successful hours of employment performed under the supervision of a workplace mentor and the work-based learning/cooperative education coordinator.

COOPERATIVE EDUCATION WORK-BASED EXPERIENCE – THIRD CREDIT (400144)

<table>
<thead>
<tr>
<th>Grade: 11-12</th>
<th>Credit: 1.0</th>
</tr>
</thead>
</table>
A one-credit work-based experience requiring a minimum of 140 continuous and successful hours of employment performed under the supervision of a workplace mentor and the work-based learning/cooperative education coordinator.

COOPERATIVE EDUCATION WORK-BASED EXPERIENCE – FOURTH CREDIT (400212)

<table>
<thead>
<tr>
<th>Grade: 11-12</th>
<th>Credit: 1.0</th>
</tr>
</thead>
</table>
A one-credit work-based experience requiring a minimum of 140 continuous and successful hours of employment performed under the supervision of a workplace mentor and the work-based learning/cooperative education coordinator.
Virtual Academy

Students enrolled at the Career Academies of Decatur have the opportunity to take core classes online through the Virtual Academy. Applications should be completed during registration for the 2019 - 2020 school year. Applications can be accessed online from the Career Academies of Decatur website.

TECHNICAL DUAL ENROLLMENT

Dual Enrollment options are available through Calhoun Community College and UA Early College. Both universities offer a wide range of courses. All Dual Enrollment courses come with a tuition requirement. Please see a guidance counselor for more information if you are interested in pursuing these options.

Calhoun Community College has opened up the following Advanced Manufacturing courses to 11th-12th grade students:

ADM 101 - Precision Measurement 3 credits
This course covers the use of precision measuring instruments and an introduction to basic geometric dimensioning and tolerancing (GD&T) concepts. Emphasis is placed on the inspection of machine parts and use of a wide variety of measuring instruments. Upon completion students should be able to demonstrate correct use of measuring instruments. This supports CIP code 15.0613. This is a CORE course and is aligned with NIMS certification standards.

ADM 104 - Introduction to Thermal/Electrical Principles 3 credits
This course emphasizes the fundamental principles for air conditioning and refrigeration. Instruction is provided in the theory and principles of refrigeration and heat transfer, HVAC/R system components, common and specialty tools for HVAC/R, and application of the concepts of basic compression refrigeration. In addition, this course covers electrical/electronic fundamentals and principles. Emphasis is placed on electrical theory and science, semiconductor devices, motors, transformers, digital concepts, programmable logic controllers, and circuit analysis of resistive, capacitive, logic controllers, and circuit analysis of resistive, capacitive, resonant, and tuned circuits. Upon completion, students will have knowledge of basic electricity and electronics, and be able to identify system components and understand their functions, identify and use common and specialty HVAC/R tools, and maintain components of a basic compression refrigeration system. This supports CIP code 15.0613. This is a CORE course.

ADM 105 Fluid Systems 3 credits
This course includes the fundamental concepts and theories for the safe operation of hydraulic and pneumatic systems used with industrial production equipment. Topics include the physical concepts, theories, laws, air flow characteristics, actuators, valves, accumulators, symbols, circuitry, filters, servicing safety, and preventive maintenance and the application of these concepts to perform work. Upon completion, students should be able to service and perform preventive maintenance functions on hydraulic and pneumatic systems. This is a CORE course. This course supports CIP code 15.0613.

ADM 106 Quality Control Concepts 3 credits
This course covers quality assurance principles including the history of the quality movement, group problem solving, data collection, control charts, and statistical methods such as statistical process control (SPC), process capability studies, and the concepts associated with lean manufacturing. This supports CIP code 15.0613. This is a CORE course.

ADM 107 CAD Concepts 3 credits
This course provides an introduction of Computer Aided Drafting (CAD) techniques and terminology. Concepts to include CAD Software and skills necessary to perform the basic computer aided drafting functions. Related lab projects are developed from CAD to reinforce knowledge of various shop drawing concepts and software commands.

ADM 111 Manufacturing Safety Practices 1 credit
This course is an introduction to general issues, concepts, procedures, hazards, and safety standards found in an industrial environment. This safety course is to make technicians aware of safety issues associated with their changing work environment and attempt to eliminate industrial accidents. This course will offer credentialing for NCCER and OSHA 10 hour.
The following suggested course pathways are designed to help students plan for particular career interests. The pathways should serve as a long-range guide for course selection during the registration process. Students interested in a particular career should consult that suggested course pathway and work with their high school counselor to individualize a four-year plan. If student’s career interest is not listed, please consult with your high school counselor for course suggestions.

Automotive Technologies

This career academy provides students with the opportunity to participate in programs that prepare students for careers in the Automotive Technology pathway. This academy aims to prepare students for the workforce, offering them a curriculum that provides hands-on experience and certification opportunities in the Automotive Technologies industry.

1 Course will be taken at the Career Tech Center.
Building Sciences

This career academy is designed for the student interested in pursuing a career in the construction field. The program offers students a wide introduction to all areas of the construction trades. Students will learn safety procedures, blueprint comprehension, tool usage, and carpentry knowledge.

Culinary Arts

This career academy is a major in the Career Connections Program. Students are prepared for a variety of careers in culinary arts and the hospitality industry. Introduction to Culinary Arts and Hospitality, Culinary Arts 1, Advanced Culinary Arts, Culinary Senior Project, Travel and Tourism 1 and 2 are the courses included in this major. The required school-based laboratory for the Culinary Arts pathway is a food service kitchen with a food serving and dining area. Formal presentations and portfolios are developed to showcase students’ work. Connecting Experiences are a requirement of the major. Family, Career and Community Leaders of America (FCCLA), an integral part of the curriculum, enhances leadership development skills and provides opportunities for community service.

Cyber Security

The Cyber Security Academy introduces students to the broad field of Cyber Security. Students learn multiple numbering systems, become familiar with Microsoft Windows, and LINUX operating systems. They learn networking, vulnerability assessment, and cyber forensics. Students participate in the national CyberPatriot competition. Opportunities also exist for student internships and industry-recognized certifications. Prerequisite: It is recommended that students have completed Geometry w/ Statistics prior to enrolling or be concurrently enrolled in Geometry w/ Statistics. Cyber Security is designed to be a college preparatory high school program and thus, should provide a rigorous, but accessible, introduction to cyber security.

Engineering Design & Advanced Manufacturing

This program is designed for students interested in engineering and related advanced manufacturing fields. Students will gain valuable knowledge and develop marketable skills that will greatly benefit them in a future engineering or manufacturing profession. Students are taught how to design, build, and test the designs in real-world situations. These courses require higher-level thinking skills to solve open-ended design and manufacturing problems. Emphasis is placed on mechanical and 3D design.

* We recommend that students research postsecondary program admission requirements to determine which high school courses will provide the best preparation.

**Credit-eligible options may include: Advanced Placement, post-secondary courses, or SDE-approved courses.
Fine Arts-Instrumental Music

This program is for students who are interested in furthering their skills in instrumental music. Instrumental music incorporates instruction on an individual basis through private lessons given during class. Music theory is also included. Courses will prepare students in advance performance techniques and help prepare for auditions in local, area, and state level groups. Students may also prepare for college scholarship auditions.

Health Science

The rigorous and relevant Health Science Academy allows students to investigate the roles of health science and medical professionals as they study the concepts of human medicine, physiology, genetics, microbiology, and public health. Students examine the structures and interactions of human body systems and explore the prevention, diagnosis, and treatment of disease, all while working collaboratively to understand and design solutions to the most pressing health challenges of today and the future.

Precision Machining

This career academy provides specialized classroom and laboratory experiences for students who are entering the field of manufacturing and engineering technology. Instruction is provided in the areas of blueprint reading, safety, bench work, lathe work, mill work, grinding, drill press, and Computer Numerical Control (CNC) programming. Particular emphasis is given to the use of precision measuring tools and gauges. Course content reflects the National Skills Standards of the National Institute for Metalworking Skills. Hands-on work experiences and SkillsUSA leadership activities enhance classroom instruction.

ADVANCED PLACEMENT INFORMATION (AP DISCLAIMER)

AP courses are college-level courses endorsed by the College Board in which TIMED ASSESSMENTS ARE ADMINISTERED. All Advanced Placement courses carry the cost of an exam in the spring.

In order to receive weighted credit (10 points) for the AP course student must demonstrate the following:

- Take the AP test administered in May 2020.
- Attend at least 3 supplementary sessions for each AP exam he/she is taking. A minimum of four per course will be offered.
- Commit to completing the requirements of the class.
- Maintain an average of “C” (70%) or above in the AP course.
- Student and parent must sign contract committing to course completion.

Please see following pages for AP Contracts:

- AP CONTRACT 2019-2020 (A+ supported)
- AP CONTRACT 2019-2020 (non-A+ supported)
AP CONTRACT 2019-2020 (A+ supported)

Student Name: __________________________________________________

Class: __________________________________________________________

I. Description of the Advanced Placement Program:
The Advanced Placement program is a nationally recognized program sponsored by the College Board which enables students to complete college-level studies while still in high school, and to obtain college placement or credit on the basis of their performance on Advanced Placement examinations. All Advanced Placement courses carry the cost of an exam in the spring, which is $94 per exam. There will be a reduced charge for students who receive free/reduced lunch.

II. In order to receive weighted credit for the course an AP student will demonstrate the following criteria:
Take the AP test administered in May 2020.
Attend three Saturday supplementary sessions to be administered at Decatur High School, at least one of which will be a mock administration of an AP Exam.
Take the course midterm at the end of the first semester.
Commit to completing the requirements of the class.
Maintain an average of “C” (70%) or above in the AP course.

Return this signed form to your AP teacher by August 17 or 18 (depending on class meeting date).
You must fill out a form for each AP course in which you are enrolled

Student Agreement
My signature below confirms that I understand the expectations of the AP program and accept its academic challenges. I agree to devote my best efforts to complete the course successfully. I understand that my success in the AP course is primarily my responsibility.

Initial beside the option that applies to you

_______ I will take the AP exam for this course in May 2020

_______ I will not take the AP exam for this course in May 2020, and understand I will not be receiving weighted credit for the course.

Electives (2.5 Credits)

Total Credits Required for Graduation = 24
In order to receive the following endorsements to the Alabama High School Diploma, a student must complete the standard coursework and also follow the guidelines for that endorsement. (This endorsement will remain in effect for Cohorts 2019, 2020 and 2021.)

**Advanced Academic Endorsement w/ Honors**

In order to receive this diploma endorsement, a student must complete the academic requirements below and maintain a cumulative numerical average of 90.0 or above in the four core subject areas.

- **Language Arts:** 4 credits must be advanced level courses and the advanced courses must be taken in the 9th, 10th, 11th and 12th grades.
- **Mathematics:** 4 credits to include the equivalent of: Algebra I, Geometry, Algebra II w/Trig, One other Math credit
- **Science:** 4 credits to include the equivalent of any AP science
- **Social Studies:** 4 credits must be advanced level courses and the advanced courses must be taken in the 9th, 10th, 11th and 12th grade.
- **Physical Education:** 1 credit – One JROTC credit may be used to meet this requirement
- **Health Education:** (½) credit
- **Career Preparedness Course:** 1 credit (Career and Academic Planning, Computer Applications, Financial Literacy).
- **CTE and/or Art Education:** 1 credit- Students choosing CTE, Arts Education, and or Foreign Language are encouraged to complete two courses in sequence.
- **Foreign Language:** 2 credits- must be completed in a sequence
- **Electives:** 2.5 credits

**Career/Tech Endorsement with Credential**

To receive this endorsement, the student must complete the same curriculum as the Standard diploma along with the following requirements: Career/Technology-career tech sequence and pass the credential test for subject area

---

**Advanced Academic Endorsement**

In order to receive this diploma endorsement, a student must complete the academic requirements below.

- **Language Arts:** 4 credits, 2 of the 4 credits must be advanced level courses and the advanced courses must be taken in the 11th and 12th grades. It is recommended that students take 9th and 10th grade advanced classes.
- **Mathematics:** 4 credits to include the equivalent of: Algebra I, Geometry, Algebra II w/Trig, One other Math credit
- **Science:** 4 credits to include the equivalent of: Biology, Chemistry and two additional science credits
- **Social Studies:** 4 credits, 2 of the 4 must be advanced level courses and the advanced courses must be taken in the 10th, 11th or 12th grade.
- **Physical Education:** 1 credit – One JROTC credit may be used to meet this requirement
- **Health Education:** (½) credit
- **Career Preparedness Course:** 1 credit (Career and Academic Planning, Computer Applications, Financial Literacy).
- **CTE and/or Art Education:** 1 credit- Students choosing CTE, Arts Education, and or Foreign Language are encouraged to complete two courses in sequence.
- **Foreign Language:** 2 credits- must be completed in a sequence
- **Electives:** 2.5 credits

---

**Career/Tech Endorsement with Credential**

To receive this endorsement, the student must complete the same curriculum as the Standard diploma along with the following requirements: Career/Technology-career tech sequence and pass the credential test for subject area
In order to receive the following endorsements to the Alabama High School Diploma, a student must complete the standard coursework and also follow the guidelines for that endorsement. (This endorsement takes effect beginning with the Cohort of 2022.)

**Advanced Academic Endorsement w/ Honors**

In order to receive this diploma endorsement, a student must complete the academic requirements below and maintain a cumulative numerical average of 90.0 or above in the four core subject areas.

**Language Arts:** 4 credits must be advanced level courses taken in the 9th and 10th grades and must be AP or Dual Enrollment courses taken in 11th and 12th grades.

**Mathematics:** 4 credits to include the equivalent of: Algebra I, Geometry, Algebra II w/Trig. One other Math credit above Algebra II w/Trig

**Science:** 4 credits must be advanced level courses taken in the 9th and 10th grades and must be AP or Dual Enrollment courses taken in 11th and 12th grades.
